Nature Borders:

Cartographies of Nature Maano Ramutsindela, 2014-06-19 The ascendancy of border studies in the last two decades or so and the burgeoning work on nature and society neither drew attention to ecological theories of borders nor capitalised on nature as a useful avenue through which border research could be advanced This volume fills this void by engaging with the following key questions What insights can be drawn from species borders to broaden understandings of bordering What sorts of borders are engendered by various types of conservation areas What border stories does each of these areas tell us What do conservation related borders teach us about multiple lines that divide societies Answers to these questions help researchers understand a typology of nature related borders The primary objectives of this volume are twofold The first objective is to expand and deepen the links between nature conservation and border studies by bringing species borders into conversation with border studies while at the same time paying attention to diverse conservation areas and conservation practices The second objective is to highlight forms of borders associated with various types of conservation areas and the protection of certain types of natural resources The manner in which nature conservation produces borders and the forms those borders take has the potential to enrich the conceptualisation of borders The point of departure in this volume is that conservation practices produce feedback loops on social reality Authors in the volume variously show that concerns with environmental protection and management offer possibilities for exploring and even disrupting borders within society and those between society and nature Conservation areas in particular are crucial for a meaningful analysis of nature's borders and the discourses and narratives related to them and how such discourses influence conservation practice This volume is an invaluable resource for research and upper level courses on border studies political ecology conservation and biodiversity management and environmental change and social impact

The Nature of Borders Lissa K. Wadewitz, 2012-09-10 Winner of the 2014 Albert Corey Prize from the American Historical Association Winner of the 2013 Hal Rothman Award from the Western History Association Winner of the 2013 John Lyman Book Award in the Naval and Maritime Science and Technology category from the North American Society for Oceanic History For centuries borders have been central to salmon management customs on the Salish Sea but how those borders were drawn has had very different effects on the Northwest salmon fishery Native peoples who fished the Salish Sea which includes Puget Sound in Washington State the Strait of Georgia in British Columbia and the Strait of Juan de Fuca drew social and cultural borders around salmon fishing locations and found ways to administer the resource in a sustainable way Nineteenth century Euro Americans who drew the Anglo American border along the forty ninth parallel took a very different approach and ignored the salmon's patterns and life cycle As the canned salmon industry grew and more people moved into the region class and ethnic relations changed Soon illegal fishing broken contracts and fish piracy were endemic conditions that contributed to rampant overfishing social tensions and international mistrust The Nature of Borders is about the ecological effects of imposing cultural and political borders on this

critical West Coast salmon fishery This transnational history provides an understanding of the modern Pacific salmon crisis and is particularly instructive as salmon conservation practices increasingly approximate those of the pre contact Native past The Nature of Borders reorients borderlands studies toward the Canada U S border and also provides a new view of how borders influenced fishing practices and related management efforts over time Watch the book trailer <http://www.youtube.com/watch?v=7ffLPgtCYHA> feature channel_video_title

Making Sense of Nature Noel Castree, 2013-08-15 We listen to a cacophony of voices instructing us how to think and feel about nature including our own bodies The news media wildlife documentaries science magazines and environmental NGOs are among those clamouring for our attention But are we empowered by all this knowledge or is our dependence on various communities allowing our thoughts sentiments and activities to be unduly governed by others Making Sense of Nature shows that what we call nature is made sense of for us in ways that make it central to social order social change and social dissent By utilising insights and extended examples from anthropology cultural studies human geography philosophy politics sociology science studies this interdisciplinary text asks whether we can better make sense of nature for ourselves and thus participate more meaningfully in momentous decisions about the future of life human and non human on the planet This book shows how nature can be made sense of without presuming its naturalness The challenge is not so much to rid ourselves of the idea of nature and its collateral concepts such as genes but instead we need to be more alert to how why and with what effects ideas about nature get fashioned and deployed in specific situations Among other things the book deals with science and scientists the mass media and journalists ecotourism literature and cinema environmentalists advertising and big business This innovative text contains numerous case studies and examples from daily life to put theory and subject matter into context as well as study tasks a glossary and suggested further reading The case studies cover a range of topics range from forestry in Canada and Guinea to bestiality in Washington State to how human genetics is reported in Western newspapers to participatory science experiments in the UK Making Sense of Nature will empower readers from a wide range of fields across the social sciences humanities and physical sciences

Workers without Borders Ines Wagner, 2018-11-15 How the European Union handles posted workers is a growing issue for a region with borders that really are just lines on a map A 2008 story dissected in Ines Wagner's Workers without Borders about the troubling working conditions of migrant meat and construction workers exposed a distressing dichotomy how could a country with such strong employers associations and trade unions allow for the establishment and maintenance of such a precarious labor market segment Wagner introduces an overlooked piece of the puzzle re regulatory politics at the workplace level She interrogates the position of the posted worker in contemporary European labour markets and the implications of and regulations for this position in industrial relations social policy and justice in Europe Workers without Borders concentrates on how local actors implement European rules and opportunities to analyze the balance of power induced by the EU around policy issues Wagner examines the particularities of posted worker dynamics at the

workplace level in German meatpacking facilities and on construction sites to reveal the problems and promises of European Union governance as regulating social justice Using a bottom up approach through in depth interviews with posted migrant workers and administrators involved in the posting process Workers without Borders shows that strong labor market regulation via independent collective bargaining institutions at the workplace level is crucial to effective labor rights in marginal workplaces Wagner identifies structures of access and denial to labor rights for temporary intra EU migrant workers and the problems contained within this system for the EU more broadly

How Border Peripheries are Changing the Nature of Arab States Maha Yahya,2023-01-01 This book addresses the multiple dimensions of the limited reach or breakdown of central authority in border regions of Arab states and their implications for state sovereignty and modes of governance These include the emergence of illicit networks of exchange the rise of new nonstate actors in border regions including paramilitary or jihadi groups and the transformation of border areas into areas of regional conflict

Collectively the essays in this volume address such processes which have been observable in conflict stricken countries such as Syria Iraq and Yemen and in fragile political or economic contexts like the ones in Lebanon Tunisia and Algeria as well as in relatively stable Emirates such as Kuwait The contributions also shed light on how border peripheries in the Arab world have impacted the center of political and economic power in their states

More Borderlines: 30 Reproducible Borders Dianne Draz,1998 **Transgression as a Rule** Ulrich Best,2007 Whereas currently German Polish relations are marked by irritations the previous phase of politics and discourse from 1990 leading up to the EU accession of Poland was marked by an increasing stress on Europe in both countries This was connected with changing practices of cross border cooperation as well as a change in academic border studies Transgression as a Rule argues that resulting from this cross border cooperation has become a rule The actors negotiate new contradictory spaces for their actions supported by the state but partly uncomfortable with it drawing on the powerful discourse of cooperation and trying to escape from it Their practices can also inform the practices of border studies

Scott,2018-09-24 In the aftermath of the Ukraine crises borders within the wider post Cold War and post Soviet context have become a key issue for international relations and public political debate These borders are frequently viewed in terms of military preparedness and confrontation but behind armed territorial

conflicts there has been a broader shift in the regional balance of power and sovereignty This book explores border conflicts in the EU's eastern neighbourhood via a detailed focus on state power and sovereignty set in the context of post Cold war politics and international relations By identifying changing definitions of sovereignty and political space the authors highlight competing strategies of legitimising and challenging borders that have emerged as a result of geopolitical transformations of the last three decades This book uses comparative studies to examine country specific variation in border negotiation and conflict and pays close attention to shifts in political debates that have taken place between the end of State Socialism the collapse of the Soviet Union and the outbreak of the Ukraine crises From this angle Post Cold War Borders sheds new light on change and variation in the political rhetoric of the EU the Russian Federation Ukraine and neighbouring EU member countries Ultimately the book aims to provide a new interpretation of changes in international order and how they relate to shifting concepts of sovereignty and territoriality in post Cold war Europe Shedding new light on negotiation and conflict over post Soviet borders this book will be of interest to students researchers and policy makers in the fields of Russian and East European studies international relations geography border studies and politics

light on the heart of Deleuze and Guattari's intellectual project
