*Chekhov's Children* Nadya L. Peterson, 2021-08-15 Anton Chekhov's representations of children have generally remained on the periphery of scholarly attention Yet his stories about children which focus on communication and the emergence of personhood also illuminate the process by which the author forged his own language of expression and occupy a uniquely important place within his work Chekhov's Children explores these stories dating from Chekhov's early writings in the 1880s as a distinct body of work unified by the theme of maturation and by the creation of a literary model of childhood Nadya Peterson describes the evolution of Chekhov's model and its connection with the prevalent views on children in the literature education medicine and psychology of his time As with his later writing Chekhov's portrayals of young protagonists exhibit complexity diversity and a broad reach across the writer's cultural and literary landscape dealing with such themes as the distinctiveness of a child's perspective the relationship between the worlds of children and adults the nature of child development socialization gender differences and sexuality While reconstructing a particular literary model of childhood this book brings to light a body of discourse on children childhood development and education prominent in Russia in the late nineteenth century Chekhov's Children accords this topic the significance it deserves by placing Chekhov's model of childhood within the broad context of his time and reassessing established notions about the child's place in the author's oeuvre

**Herbert Marcuse** John Abromeit, W. Mark Cobb, 2014-06-03 The Legacy of Herbert Marcuse A Critical Reader is a collection of brand new papers by seventeen Marcuse scholars which provides a

comprehensive reassessment of the relevance of Marcuse's critical theory at the beginning of the 21st century. Although best known for his reputation in critical theory, Herbert Marcuse's work has had impact on areas as diverse as politics, technology, aesthetics, psychoanalysis, and ecology. This collection addresses the contemporary relevance of Marcuse's work in this broad variety of fields and from an international perspective. In Part One, veteran scholars of Marcuse and the Frankfurt school examine the legacy of various specific areas of Marcuse's thought, including the quest for radical subjectivity, the maternal ethic, and the negative dialectics of imagination. Part Two focuses on a very new trend in Marcuse scholarship: the link between Marcuse's ideas and environmental thought. The third part of this collection is dedicated to the work of younger Marcuse scholars with the aim of documenting Marcuse's reception among the next generation of critical theorists. The final section of the book contains recollections on Marcuse's person rather than his critical theory, including an informative look back over his life by his son Peter.

Details the author's successful treatment protocols for Hashimoto's thyroiditis, hypothyroidism, and hyperthyroidism developed over more than 30 years of Ayurvedic practice. Explores the underlying causes of thyroid malfunction, the thyroid's connections to the liver and gall bladder, and the importance of early detection. Also includes treatments for common symptoms of thyroid disease such as insomnia, depression, fatigue, and osteoporosis, as well as for weight loss and hair growth. In this comprehensive guide for practitioners and those concerned with thyroid health, Marianne Teitelbaum, D.C., integrates the ancient medicine of Ayurveda with modern scientific findings to address the growing epidemic of thyroid disease. Revealing how the thyroid is the victim of many factors that conspire to create ill health and how many cases of thyroid disease go undiagnosed, Teitelbaum focuses not only on treating thyroid problems and symptoms but also on diagnosing them at their earliest, most reversible stages. She outlines the basic principles of Ayurveda, including pulse diagnosis, a key tool for early detection, and explains the successful treatment protocols she has developed over more than 30 years of Ayurvedic practice. She details the underlying reasons for thyroid malfunction, such as inflammation, malnutrition, and toxins, and how the thyroid is connected with the health of the rest of the body, including the liver and gall bladder. She explores the Ayurvedic treatment of thyroid-related conditions, such as Hashimoto's thyroiditis, hypothyroidism, and hyperthyroidism, offering guidance on the targeted use of herbs, specific dietary recommendations, proper detoxification, and Ayurvedic recipes. She also includes treatments and remedies for common symptoms of thyroid disease, including insomnia, depression, fatigue, and osteoporosis, as well as for luxurious hair growth and weight loss. Based on the treatment of thousands of patients, this book also shares success stories of thyroid healing and the scientific studies that support the author's Ayurvedic thyroid protocols. Offering an easy-to-follow yet comprehensive guide, Teitelbaum shows that optimum thyroid health, as well as overall health, are within everyone's reach.

Watt,2001-03-01 In this case study of the Republic of Geneva Jeffrey R Watt convincingly argues the early modern era marked decisive change in the history of suicide His analysis of criminal proceedings and death records shows that magistrates of the sixteenth and early seventeenth centuries often imposed penalties against the bodies and estates of those who took their lives According to beliefs shared by theologian John Calvin magistrates and common folk self murder was caused by demon possession Similar views and practices were found among both Protestants and Catholics throughout Reformation Europe By contrast in the late eighteenth century many philosophies defended the right to take one s life under certain circumstances Geneva s magistrates in effect decriminalized suicide and even commoners blamed suicide on mental illness or personal reversals not on satanic influences Watt uses Geneva s uniquely rich and well organized sources in this first study to provide reliable evidence on suicide rates for premodern Europe He places his findings within a wide range of historical and sociological scholarship and while suicide was rare through the seventeenth century he shows that Geneva experienced an explosion in self inflicted deaths after 1750 Quite simply early modern Geneva witnessed nothing less than

the birth of modern suicide both in attitudes toward it thoroughly secularized medicalized and stripped of diabolical undertones and the frequency of it     Aesthetics and contemporary discourse Herbert Grabes,1994     **Regenerative Leadership** Giles Hutchins,2019-07-16 This book by leadership and sustainability experts Giles Hutchins and Laura Storm provides an exciting and comprehensive framework for building regenerative life affirming businesses It offers a multitude of business cases fascinating examples from nature s living systems insights from the front line pioneers and tools and techniques for leaders to succeed and thrive in the 21st century Regenerative Leadership draws inspiration from pioneering thinking within biomimicry circular economy adult developmental psychology anthropology biophilia sociology complexity theory and next stage leadership development It connects the dots between these fields through a powerful framework that enables leadership to become regenerative in harmony with life building thriving prosperous organizations amid transformational times The book is a combination of theoretical frameworks case studies tools practices Everything the leader needs to be successful in the 21st century Regenerative Leadership what s it all about While the future is uncertain we clearly see an upward trend towards sustainable conscious business And this is more than just a trend we re witnessing a new kind of organization emerging An organization which is able to rapidly sense and respond to the ever changing business climate by innovating how and why it creates and delivers value and the way it engages internally and externally with its ecosystem of employees customers suppliers resources investors society and environment This new kind of organization is the organization as living system that is designed on the Logic of Life life affirming businesses that thrive from the inside out by cultivating conditions conducive for life internally and externally These organizations nurture flourishing cultures while focusing on products and services that enhance society and the environment Regenerative organizations will be tomorrow s success stories     *On Hegel* Karin de Boer,2010-07-07 Focusing on the Science of Logic this wide ranging and innovative reading exposes the force as well as the limit of Hegel s philosophy Drawing on Hegel s early account of tragic conflicts De Boer brings into play a form of negativity that challenges the optimism inherent in modernity and Hegelian dialectics alike
