Nature Study And Science:

Teaching Children Science Sally Gregory Kohlstedt, 2010-05-15 In the early twentieth century a curriculum known as nature study flourished in major city school systems streetcar suburbs small towns and even rural one room schools This object based approach to learning about the natural world marked the first systematic attempt to introduce science into elementary education and it came at a time when institutions such as zoos botanical gardens natural history museums and national parks were promoting the idea that direct knowledge of nature would benefit an increasingly urban and industrial nation The definitive history of this once pervasive nature study movement *Teaching Children Science* emphasizes the scientific pedagogical and social incentives that encouraged primarily women teachers to explore nature in and beyond their classrooms Sally Gregory Kohlstedt brings to vivid life the instructors and reformers who advanced nature study through on campus schools summer programs textbooks and public speaking Within a generation this highly successful hands on approach migrated beyond public schools into summer camps afterschool activities and the scouting movement Although the rich diversity of nature study classes eventually lost ground to increasingly standardized curricula Kohlstedt locates its legacy in the living plants and animals in classrooms and environmental field trips that remain central parts of science education today *The Nature-study Review*, 1911

Nature Science Series: Nature study B. F. Clark, George O. Hendrickson, 1934 A series of nature study workbooks **The Nature-Study Idea** Liberty Hyde Bailey, 2024-01-15 In *The Nature Study Idea* Liberty Hyde Bailey articulated the essence of a social movement led by ordinary public school teachers that lifted education out of the classroom and placed it into firsthand contact with the natural world The aim was simple but revolutionary sympathy with nature to increase the joy of living and foster stewardship of the earth With this definitive edition John Linstrom reintroduces *The Nature Study Idea* as an environmental classic for our time It provides historical context through a wealth of related writings and introductory essays relate Bailey's vision to current work in education and the intersection of climate change and culture In this period of planetary turmoil Bailey's ambition to cultivate wonder in adults as well as children and lead readers back into the natural world is more important than ever **Nature Study and the Child** Charles B. Bulletin United States. Office of Education, 1948 *The Nature-study Idea* Liberty Hyde Bailey, 1909 **Technology, Science Teaching, and Literacy** Kenneth P. King, 2005-12-27 This book deals with the use of technology in science teaching The author is not nor has ever had an intention of being a techie Rather I spent the first decade of my professional life as a high school physics teacher making occasional uses of technology to further student understanding and to automate my own teaching practices During my graduate work my interest in the use of technology continued Catalyzed to some extent by the increasing availability of graphical interfaces for computers the realization struck that the computer was more and

more becoming a tool that all teachers could use to support their teaching practice not simply those with a passion for the technology itself The rapid changes in the hardware and software available however frequently caused me to reflect on the usefulness of technology if it were to change at such a rapid pace would anyone save for those who diligently focused on the development of these tools be able to effectively use technology in science teaching Was change to rapid to yield a useful tool for teachers To address this interest I examined the nature of science teaching during this century using the equally fluid notion of scientific literacy which formed the organizing principle for this study The result is a examination of how technology was used to accomplishing this goal of producing scientifically literate citizens What was observed is that technology indeed consistently came to the service of teachers as they attempted to achieve this goal
