Environment across Cultures E. Ehlers, Carl Friedrich Gethmann, 2013-11-11 Disparate perceptions and conceptual frameworks of environment and the relationship between humans and nature often lead to confusion constraints on co

operation and collaboration and even conflict when society tries to deal with today's urgent and complex environment research and policy challenges. Such disparities in perception and world view are driven by many factors. They include differences in culture, religion, ethical frameworks, scientific methodologies and approaches, disciplines, political, social and philosophical traditions, life styles and consumption patterns, as well as alternative economic paradigms. Distribution of poverty or wealth between north and south may thus be seen as consequence of the above mentioned disparities which is a challenge for its universal reasoned evaluation. This volume discusses a wide range of factors influencing Environment across Cultures with a view to identifying ways and means to better understand, reflect and manage such disparities within future global environmental research and policy agendas for bridging the gap between ecology and economy as well as between societies. The book is based upon the results of a scientific symposium on this topic and covers the following sections: Cross Cultural Perception of Environment, Ethics and Nature, Environment Sustainability and Society. Corresponding contributions were made by well known scientific authors representing different cultural spheres in accordance with the inter cultural approach of this effort.

Children, Nature and Cities Claire Freeman, Yolanda van Heezik, 2018-06-14. That children need nature for health and well being is widely accepted but what type of nature? Specifically what type of nature is not only necessary but realistically available in the complex and rapidly changing worlds that children currently live in. This book examines child nature definitions through two related concepts: the need for connecting to nature and the processes by which opportunities for such contact can be enhanced. It analyses the available nature from a scientific perspective of habitats, species and environments together with the role of planning to identify how children in cities can and do connect with nature. This book challenges the notion of a universal child and childhood by recognizing children's diverse life worlds and experiences which guide them into different and complex ways of interacting with the natural world. Unfortunately not all children have the freedom to access the nature that is present in the cities where they live. This book addresses the challenge of designing biodiverse cities in which nature is readily accessible to children.

Nature and Identity in Cross-Cultural Perspective A. Buttner, L. Wallin, 2013-04-17. Nature and Identity in Cross Cultural Perspective presents 20 essays which explore diverse cultural interpretations of the earth's surface. Contrasted with each other and with the potentially cosmopolitan culture of science, these detailed studies of ways in which different cultures conceptualise nature appear in the context of global environmental change. Understanding across cultural lines has never been more important. This book shows how individual cultures see their own histories as offering protection for nature while often viewing others as lacking such ethical restraints. Through such writing a discourse of understanding and common action becomes possible. The authors come from the places they discuss and offer passionate as well as scholarly visions of nature within their cultural homes.

Audience: This volume is of interest to academics and professionals working in the fields of cultural geography, environmental history, environmental studies, history of environmental ideas, environmental education, landscape and literature, nature and culture. It

can be used for courses in the above mentioned areas and seminars in comparative literature It can also be used as a complimentary text to provide cultural context to literary readings and for seminars on cultural aspects of the environment

Kenneth Dorter, 2018-04-30 A welcome contribution to the burgeoning multicultural revolution in philosophy persuasively shows that ethics cannot be innocent of metaphysics Bryan W Van Norden author of *Introduction to Classical Chinese Philosophy* Kenneth Dorter's *Can Different Cultures Think the Same Thoughts* is a study of fundamental issues in metaphysics and ethics across major philosophical traditions of the world including the way in which metaphysics can be a foundation for ethics as well as the importance of metaphysics on its own terms Dorter examines such questions through a detailed comparison of selected major thinkers and classic works in three global philosophical traditions those of India China and the West In each chapter Dorter juxtaposes and compares two or more philosophers or classic works from different traditions from Spinoza and Shankara to Confucius and Plato to Marcus Aurelius and the Bhagavad Gita In doing so he explores different perspectives and reveals limitations and assumptions that might otherwise be obscure The goal of Dorter's cross cultural approach is to consider how far works from different cultures can be understood as holding comparable philosophical views Although Dorter reveals commonalities across the different traditions he makes no claim that there is such a thing as a universal philosophy Clearly there are fundamental disagreements among the philosophers and works studied Yet in each of the case studies of a particular chapter we can discover a shared or at least analogous way of looking at issues across different cultures All those interested in metaphysics ethics Indian philosophy Chinese philosophy and comparative philosophy will find much of interest in this book

The Nature of Kingship Kathryn Dyt, 2024-12-31 The Nature of Kingship is an innovative exploration of dynastic power and the environment in nineteenth century Vietnam It offers important insights into Vietnamese kingship by delving into the intricate workings of the Nguyen court and its interactions with the natural world Weaving together a rich array of sources including official histories royal poetry astrological manuals geography texts and provincial gazetteers Kathryn Dyt vividly demonstrates how Nguyen governance and court hierarchies were intertwined with a powerful agentive and emotional weather world a world inhabited by ecological actors such as rain wind land and skies While previous narratives have often faulted Nguyen rulers for being aloof and detached from their surroundings this new study considers how Nguyen dynastic rule was in fact highly responsive

to its setting and sensitive to the environment It shows that Nguyen kings were not static inert individuals cut off from the world but rather were intensely engaged with their environment and its cosmological and spiritual dimensions Placing kings in the thick of lived experience in a land perceived to be alive and responsive to human incantations prayers and pleas this account demonstrates how Nguyen rulers consolidated their authority through displays of superior weather knowledge and modes of affective rule rooted in reciprocal emotional resonance with the weather world The king's exemplary affective responsiveness to the weather was central to his preeminence and it was a means by which the court validated its power within Vietnam's extensive social field Exploring kingship from phenomenological perspectives this wide reaching study addresses diverse forms of court engagement with the environment including the observation of astronomical and meteorological phenomena divination practices rainmaking rituals travel through the kingdom the writing of environmental histories and imperial poetry

Nature and the Environment in Amish Life David L. McConnell, Marilyn D. Loveless, 2018-11-01 The Amish relationship to the environment is much more complicated than you might think The pastoral image of Amish communities living simply and in touch with the land strikes a deep chord with many Americans Environmentalists have lauded the Amish as iconic models for a way of life that is local self sufficient and in harmony with nature But the Amish themselves do not always embrace their ecological reputation and critics have long questioned the portrayal of the Amish as models of environmental stewardship In *Nature and the Environment in Amish Life* David L. McConnell and Marilyn D. Loveless examine how this prevailing notion of the environmentally conscious Amish fits with the changing realities of their lives Drawing on 150 interviews conducted over the course of 7 years as well as a survey of household resource use among Amish and non Amish people they explore how the Amish understand nature in their daily lives and how their actions impact the natural world Arguing that there is considerable diversity in Amish engagements with

nature at home at school at work and outdoors McConnell and Loveless show how the Amish response to regional and global environmental issues such as watershed pollution and climate change reveals their deep skepticism of environmentalists They also demonstrate that Amish households are not uniformly lower in resource use compared to their rural non Amish neighbors though aspects of their home economy are relatively self sufficient The first comprehensive study of Amish understandings of the natural world this compelling book complicates the image of the Amish and provides a more realistic understanding of the Amish relationship with the environment *Nature Wars* Roy Ellen, 2020-11-01 Organized around issues debates and discussions concerning the various ways in which the concept of nature has been used this book looks at how the term has been endlessly deconstructed and reclaimed as reflected in anthropological scientific and similar writing over the last several decades Made up of ten of Roy Ellen s finest articles this book looks back at his ideas about nature and includes a new introduction that contextualizes the arguments and takes them forward Many of the chapters focus on research the author has conducted amongst the Nuaulu people of eastern Indonesia **Civilizing Nature** Bernhard Gissibl,, Sabine Höhler, Patrick Kupper, 2012-01-15 Since their first designation in the United States in the 1860s and 1870s they have become a global phenomenon
