## **Nature By Design People Natural Process And Ecological Design:**

*Nature by Design* Eric Higgs, 2003-04-25 Ecological restoration is the process of repairing human damage to ecosystems. It involves reintroducing missing plants and animals, rebuilding soils, eliminating hazardous substances, ripping up roads, and returning natural processes such as fire and flooding to places that thrive on their regular occurrence. Thousands of restoration projects take place in North America every year. In *Nature by Design*, Eric Higgs argues that profound philosophical and cultural shifts accompany these projects. He explores the ethical and philosophical bases of restoration and the question of what constitutes good ecological restoration. Higgs explains how and why the restoration movement came about, where it fits into the array of approaches to human relationships with the land, and how it might be used to secure a sustainable future. Some environmental philosophers and activists worry that restoration will dilute preservation and conservation efforts and lead to an even deeper technological attitude toward nature. They ask whether even well-conceived restoration projects are in fact just expressions of human will. Higgs prefaces his responses to such concerns by distinguishing among several types of ecological restoration. He also describes a growing gulf between professionals and amateurs. Higgs finds much merit in criticism about technological restoration projects which can cause more damage than they undo. These projects often ignore the fact that changing one thing in a complex system can change the whole system. For restoration projects to be successful, Higgs argues, people at the community level must be engaged. These focal restorations bring communities together, helping volunteers develop a dedication to place and encouraging democracy.

*Wild by Design* Laura J. Martin, 2022-05-17 Laura J. Martin examines ecological restoration's long history. Since the early 1900s, restorationists have confronted vexing philosophical questions: Which states of nature should be restored? Who should choose? Is human-designed wilderness really wild? Restoration work leads us to reimagine nature and the nature of environmental justice.

**Environmental Ethics** Marion Hourdequin, 2024-01-25 What is environmental virtue? Is developing good habits enough? What does climate justice require? Is ecological restoration just another form of the human domination of nature? Exploring these questions and more, this book provides an up-to-date and balanced introduction to environmental ethics. It first examines ethical theory, then ties theory to practice, showing how values guide environmental policies but also how policies and institutions shape environmental values. Updated and expanded to engage with the latest scholarship, scientific findings, and societal challenges, this 2nd edition features new sections on food ethics, multispecies justice, intergenerational ethics, and the Anthropocene. Contemporary case studies focus on the rights of nature, the use of biotechnology in ecological restoration, and just climate transitions. Expanded coverage of diverse philosophical traditions, including Confucian, Daoist, and Indigenous ethical perspectives. Updated discussion questions, further reading sections, and online resources. Exploring the possibilities and limitations inherent in both classical ethical models and modern theoretical approaches to the environment, this is a key resource for teaching students to think ethically about the world we live in.

France,2016-04-19 A fusion of ecological restoration and sustainable development restorative redevelopment represents an emerging paradigm for remediating landscapes Rather than merely fixing the broken bits and pieces of nature restorative development advocates the reuse of devastated landscapes to improve the value and livability of a location for humans at the

**Placing Nature on the Borders of Religion, Philosophy and Ethics** Dr Forrest Clingerman,Mr Mark H Dixon,2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three

interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place

Restoration of Boreal and Temperate Forests John A. Stanturf, 2015-08-14 Humans have influenced the landscapes and forests throughout the temperate and boreal zones for millennia Restoration of Boreal and Temperate Forests Second Edition focuses on the negative impact of human activity and explains the importance of forest restoration as a way to repair habitat restore forest structure and function and counteract it

**Beyond Naturalness** David N. Cole, Laurie Yung, 2012-06-22 The central concept guiding the management of parks and wilderness over the past century has been naturalness to a large extent the explicit purpose in establishing these special areas was to keep them in their natural state But what does that mean particularly as the effects of stressors such as habitat fragmentation altered disturbance regimes pollution invasive species and climate change become both more pronounced and more pervasive Beyond Naturalness brings together leading scientists and policymakers to explore the concept of naturalness its varied meanings and the extent to which it provides adequate guidance regarding where when and how managers should intervene in ecosystem processes to protect park and wilderness values The main conclusion is the idea that naturalness will continue to provide an important touchstone for protected area conservation but that more specific goals and objectives are needed to guide stewardship The issues considered in Beyond Naturalness are central not just to conservation of parks but to many areas of ecological thinking including the fields of conservation biology and ecological restoration and represent the cutting edge of discussions of both values and practice in the twenty first century This book offers excellent writing and focus along with remarkable clarity of thought on some of the difficult questions being raised in light of new and changing stressors such as global environmental climate change

Sustaining the West Liza Piper, Lisa Szabo-Jones, 2015-04-06 Western Canada's natural environment faces intensifying threats from industrialization in agriculture and resource development social and cultural complicity in these destructive practices and most recently the negative effects of global climate change The complex nature of the problems being addressed calls for productive interdisciplinary solutions In this book arts and humanities scholars and literary and visual artists tackle these pressing environmental issues in provocative and transformative ways Their commitment to environmental causes emerges through the fields of environmental history

environmental and ecocriticism ecofeminism ecoart ecopoetry and environmental journalism This indispensable and timely resource constitutes a sustained cross pollinating conversation across the environmental humanities about forms of representation and activism that enable ecological knowledge and ethical action on behalf of Western Canadian environments yet have global reach Among the developments in the contributors construction of environmental knowledge are a focus on the power of sentiment in linking people to the fate of nature and the need to decolonize social and environmental relations and assumptions in the West

Old World and New World Perspectives in Environmental Philosophy Martin Drenthen, Jozef Keulartz, 2014-07-28 This is the first collection of essays in which European and American philosophers explicitly think out their respective contributions and identities as environmental thinkers in the analytic and continental traditions The American European as well as Analytic Continental collaboration here bears fruit helpful for further theorizing and research The essays group around three well defined areas of questioning all focusing on the amelioration management of environmentally historically and traditionally diminished landscapes The first part deals with differences between New World and the Old World perspectives on nature and landscape restoration in general the second focuses on the meaning of ecological restoration of cultural landscapes and the third on the meaning of the wolf and of wildness It does so in a way that the strengths of each philosophical school continental and analytic comes to the fore in order to supplement the other s approach This text is open to educated readers across all disciplines particularly those interested in restoration adaptation ecology the cultural construction of place and landscape the ongoing conversation about wilderness the challenges posed to global environmental change The text may also be a gold mine for doctoral students looking for dissertation projects in environmental philosophy that are inclusive of continental and analytic traditions This text is rich in innovative approaches to the questions they raise that are reasonably well thought out The fact that the essays in each section really do resonate with one another directly is also intellectually exciting and very helpful in working out the full dimensions of each question raised in the volume

**Restoration of Ecosystems - Bridging Nature and Humans** Stefan Zerbe, 2023-02-13 In this interdisciplinary textbook which bridges the gap between the natural and social sciences both the scientific principles of restoration ecology and practical aspects of ecosystem restoration are comprehensively presented The diversity of land use types with a focus on Central Europe is highlighted and case studies of practical restoration projects are presented The textbook offers students who deal with the environment as well as scientists and practitioners a profound and up to date but also critical overview of the state of knowledge This book opens up the broad spectrum of degraded ecosystems of Central European natural and cultural landscapes In further chapters marine ecosystems and their restoration as well as development potentials and the limits of restoration are discussed in more detail The ecological fundamentals are expanded through an interdisciplinary perspective taking into account environmental ethics sociology anthropology and economics In addition to an up to date overview of the various areas and fields of activity in restoration ecology and

ecosystem restoration the textbook provides a valuable basis for studies science and practice The students also receive assistance in searching for literature and critical fact analysis and the lecturers on teaching formats and interdisciplinary approaches to discussion in restoration ecology

*Rethinking Post-Disaster Recovery* Laura Centemeri, Sezin Topçu, J. Peter Burgess, 2021-11-18 This book presents an original interdisciplinary approach to the study of the so called recovery phase in disaster management centred on the notion of repairing The volume advances thinking on disaster recovery that goes beyond institutional and managerial challenges descriptions and analyses It encourages socially politically and ethically engaged questioning of what it means to recover after disaster At the centre of this analysis contributions examine the diversity of processes of repairing through which recovery can take place and the varied meanings actors attribute to repair at different times and scales of such processes It also analyses the multiple arenas juridical expert political in which actors struggle to make sense of the what ness of a disaster and the paths for recovery These struggles are interlinked with interest based and power based struggles which maintain structural inequality and exploitation existing social hierarchies and established forms of marginality The work uses case studies from all over the world cutting edge theoretical discussions and original empirical research to put critical and interpretative approaches in social sciences into dialogue opening the venue for innovative approaches in the study of environmental disasters This book will be of much interest to students of disaster management sociology anthropology law and philosophy

**River Futures** Gary J. Brierley, Kirstie A. Fryirs, 2012-09-26 Across much of the industrialized world rivers that were physically transformed and ecologically ruined to facilitate industrial and agricultural development are now the focus of restoration and rehabilitation efforts River Futures discusses the emergence of this new era of river repair and documents a comprehensive biophysical framework for river science and management The book considers what can be done to maximize prospects for improving river health while maintaining or enhancing the provision of ecosystem services over the next fifty to one hundred years It provides a holistic overview of considerations that underpin the use of science in river management emphasizing cross disciplinary understanding that builds on a landscape template The book frames the development of integrative river science and its application to river rehabilitation programs develops a coherent set of guiding principles with which to approach integrative river science considers the application of cross disciplinary thinking in river rehabilitation experiences from around the world examines the crossover between science and management outlining issues that must be addressed to promote healthier river futures Case studies explore practical applications in different parts of the world highlighting approaches to the use of integrative river science measures of success and steps that could be taken to improve performance in future efforts River Futures offers a positive practical and constructive focus that directly addresses the major challenge of a new era of river conservation and rehabilitation that of bringing together the diverse and typically discipline bound sets of knowledge and practices that are involved in repairing rivers It is a valuable resource for anyone involved in river restoration and management including restorationists scientists

managers and policymakers as well as undergraduate and graduate students      Sustainability Science Michael P. Weinstein, R. Eugene Turner, 2012-06-05 The object of this book is to highlight how the nascent field of sustainability science is addressing a key challenge for scientists that is understanding the workings of complex systems especially when humans are involved A consistent thread in the sustainability science movement is the wide acknowledgement that greater degrees of integration across what are now segmented dimensions of extant Science and Technology systems will be a key factor in matching the most appropriate science and technology solutions to specific sustainability problems in specific places

Ecological Restoration and Environmental Change Stuart K. Allison, 2012 This volume addresses and challenges issues which question the core values of the science and practice of restoration ecology It analyzes the paradox arising from the desire to produce ecological restorations that fit within an historical ecological context produce positive environmental benefits and also result in landscapes with social meaning      **Routledge Handbook of Nature and Environmental**
