Nature In Our Biblical:

Nature in Our Biblical Heritage Nogah Hareuveni,1980 Nogah Kedumim continued his research and writing all geared to one purpose reaching a comprehensive understanding of the interrelationship between the phenomena of nature in the land of Israel and the broad structure of Jewish holidays and Judeo Christian tradition BOOK JACKET **The Evil And Bloody Nature Of Our Biblical God. Yahweh Guilty Of Crimes Against Humanity** Maximillien De Lafayette,2015-02-17 The Nature and Value of Good Government and Our Christian Duties as Good Citizens and Subjects, Especially in the Present Crisis. [A Discourse on 1 Tim. I. 2.] Charles GIRDLESTONE,1848 **A Christian Understanding of Human Nature** Michael B. Raschko,2010 This is a fascinating study of Christian Anthropology grace and sin and is intended for the educated lay person This is a challenging and engaging study for all who want to explore these themes more deeply *Reconstructing a Christian Theology of Nature* Anna Case-Winters,2016-04-08 In the present ecological crisis it is imperative that human beings reconsider their place within nature and find new more responsible and sustainable ways of living Assumptions about the nature of God the world and the human being shape our thinking and consequently our acting Some have charged that the Christian tradition has been more a hindrance than a help because its theology of nature has unwittingly legitimated the exploitation of nature This book takes the current criticism of Christian tradition to heart and invites a reconsideration of the problematic elements its desacralization of nature its preoccupation with the human being to the neglect of the rest of nature its dualisms and elevation of the spiritual over material reality and its habit of ignoring or resisting scientific understandings of the natural world Anna Case Winters argues that Christian tradition has a more viable theology of nature to offer She takes a look at some particulars in Christian tradition as a way to illustrate the undeniable problems and to uncover the untapped possibilities In the process she engages conversation partners that have been sharply critical and particularly insightful feminist theology process thought and the religion and science dialogue The criticisms and insights of these partners help to shape a proposal for a reconstructed theology of nature that can more effectively fund our struggle for the fate of the earth The Nature and Design of Christianity. Extracted from a Treatise on Christian Perfection. An abridgment, by John Wesley, of the first chapter of "A Practical Treatise upon Christian Perfection," by William Law CHRISTIANITY.,1784 Biotechnology, Human Nature, and Christian Ethics Gerald McKenny,2018-01-19 In public debates over biotechnology theologians philosophers and political theorists have proposed that biotechnology could have significant implications for human nature They argue that ethical evaluations of biotechnologies that might affect human nature must take these implications into account In this book Gerald McKenny examines these important yet controversial arguments which have in turn been criticized by many moral philosophers and professional bioethicists He argues that Christian ethics is in principle committed to some version of the claim that human nature has normative status in relation to biotechnology Showing how both criticisms and defences of this claim have often been facile he identifies develops and critically evaluates

three versions of the claim and contributes a fourth distinctively Christian version to the debate Focusing on Christian ethics in conversation with secular ethics McKenny's book is the first thorough analysis of a controversial contemporary issue

Laws of Nature, Laws of God? Louise Hickman, Neil Spurway, 2015-09-18 Up until the time of Newton scientists regarded the understandings of the physical world at which they were arriving as glimpses of the working of the Creator's mind Thus the generalisations being formulated about the behaviour of matter the Laws of Nature were seen as the Creator's injunctions to created matter as to how it was to act They were laws in the same sense as laws Divine or human about how people should behave that is why the same word was used for both And even now scientific laws are occasionally spoken of as being obeyed However it is doubtful whether any practising scientist religious believer or not now thinks of laws in the way that the word literally implies How instead scientists do or should view scientific laws has been debated since the time of Hume and Kant and it is a vigorous field of investigation among current philosophers of science In this book scientists physical and biological historians and students of ideas all of them theologically informed tackle this topic from many angles They do so in relation to the lead public lecture at the conference from which the book stems given by the eminent and iconoclastic philosopher of science Professor Nancy Cartwright She asked the question How could laws make things happen and her answer was They couldn't

God in our Nature Peter Kenneth Stevenson, 2007-09-01 Arguably the leading Scottish theologian of the nineteenth century John McLeod Campbell's theology is much criticized and often misunderstood Previous accounts have tended to overlook both his sermons and his Christology This reassessment of his thought breaks new ground by offering a detailed study of his sermons and by identifying the distinctive Christology which contributes to a clearer understanding of his doctrine of atonement Drawing upon the full range of Campbell's work *God in our Nature* brings to light a trinitarian theologian whose pilgrimage represents a journey within evangelicalism rather than a departure from the evangelical fold

The Physical Nature of Christian Life Warren S. Brown, Brad D. Strawn, 2012-06-11 This book explores the implications of recent insights in modern neuroscience for the church's view of spiritual formation Science suggests that functions of the brain and body in collaboration with social experience rather than a disembodied soul provide physical basis for the mental capacities interpersonal relations and religious experiences of human beings The realization that human beings are wholly physical but with unique mental relational and spiritual capacities challenges traditional views of Christian life as defined by the care of souls a view that leads to inwardness and individuality Psychology and neuroscience suggest the importance of developmental openness attachment imitation and stories as tools in spiritual formation Accordingly the idea that care of embodied persons should be fundamentally social and communal sets new priorities for encouraging spiritual growth and building congregations

The Nature and Destiny of Man: A Christian Interpretation Reinhold Niebuhr, 1996-11-01 *The Nature and Destiny of Man* issues a vigorous challenge to Western

civilization to understand its roots in the faith of the Bible particularly the Hebraic tradition The growth corruption and purification of the important Western emphases on individuality are insightfully chronicled here This book is arguably Reinhold Niebuhr s most important work It offers a sustained articulation of Niebuhr s theological ethics and is considered a landmark in twentieth century thought The Library of Theological Ethics series focuses on what it means to think theologically and ethically It presents a selection of important and otherwise unavailable texts in easily accessible form Volumes in this series will enable sustained dialogue with predecessors though reflection on classic works in the field

Explorations in Neuroscience, Psychology and Religion Professor Kevin S Seybold,2013-05-28 In the 1990s great strides were taken in clarifying how the brain is involved in behaviors that in the past had seldom been studied by neuroscientists or psychologists This book explores the progress begun during that momentous decade in understanding why we behave think and feel the way we do especially in those areas that interface with religion What is happening in the brain when we have a religious experience Is the soul a product of the mind which is in turn a product of the brain If so what are the implications for the Christian belief in an afterlife If God created humans for the purpose of having a relationship with him should we expect to find that our spirituality is a biologically evolved human trait What effect might a disease such as Alzheimer s have on a person s spirituality and relationship with God Neuroscience and psychology are providing information relevant to each of these questions and many Christians are worried that their religious beliefs are being threatened by this research Kevin Seybold attempts to put their concerns to rest by presenting some of the scientific findings coming from these disciplines in a way that is understandable yet non threatening to Christian belief

Nature and Scripture in the Abrahamic Religions: God, Scripture and the rise of modern science (1200-1700) Jitse M. van der Meer,Scott Mandelbrote,2008 These volumes describe how the development of the different styles of interpretation found in reading scripture and nature have transformed ideas of both the written word and the created world

Christian Attitudes Toward Nature George H. Williams,2015-10-16 In this essay the author George Huntston Williams explores the views of nature which have been held throughout the history of the Christian church

The Good Book of Human Nature Carel van Schaik,Kai Michel,2016-05-24 How reading the Bible as a work of cultural and scientific evolution can reveal new truths about how our species conquered the Earth The Bible is the bestselling book of all time It has been venerated or excoriated as God s word but so far no one has read the Bible for what it is humanity s diary chronicling our ancestors valiant attempts to cope with the trials and tribulations of life on Earth In *The Good Book of Human Nature* evolutionary anthropologist Carel van Schaik and historian Kai Michel advance a new view of Homo sapiens cultural evolution The Bible they argue was written to make sense of the single greatest change in history the transition from egalitarian hunter gatherer to agricultural societies Religion arose as a strategy to cope with the unprecedented levels of epidemic disease violence inequality and injustice that confronted us when we abandoned the bush and which still confront

us today Armed with the latest findings from cognitive science evolutionary biology archeology and religious history van Schaik and Michel take us on a journey through the Book of Books from the Garden of Eden all the way to Golgotha The Book of Genesis they reveal marked the emergence of private property one can no longer take the fruit off any tree as one could before agriculture The Torah as a whole is the product of a surprisingly logical even scientific approach to society s problems This groundbreaking perspective allows van Schaik and Michel to coax unexpected secrets from the familiar stories of Adam and Eve Cain and Able Abraham and Moses Jesus of Nazareth and Mary The Bible may have a dark side but in van Schaik and Michel s hands it proves to be a hallmark of human indefatigability Provocative and deeply original The Good Book of Human Nature offers a radically new understanding of the Bible It shows that the Bible is more than just a pillar for religious belief it is a pioneering attempt at scientific inquiry

Thomas Merton Patrick F. O'Connell, 2013 Thomas Merton the Trappist monk who died in 1968 was one of the great spiritual writers of the twentieth century His published works include a hundred volumes in many genres But it was perhaps in the essay that he found his natural element Especially in the last decade of his life Merton showed in his essays an increasing willingness to dispense with pre fabricated conclusions bringing his deeply spiritual profoundly Catholic sensibility to bear on matters beyond the usual religious and monastic milieu This volume is the first to provide a broad cross section of Merton s work as an essayist collecting pieces that reflect characteristic examples of his astonishing output and the fantastic breadth of his interests The 33 essays collected here range from interreligious dialogue to racial justice from the wisdom of the desert fathers to the novels of Faulkner and Camus from the nuclear threat to the philosophy of solitude and throughout the centrality of the Christian mystery to authentic human identity

A Catechism on the Christian name and the nature of the baptismal vow James HODSON (Swedenborgian Minister.), 1797

Ending the War Between Humanity and Nature Patrick C. Lee, 2020-08-19 This book offers plausible explanations for people s puzzling unwillingness to address the human nature interactions that have led us to the precipice that is climate change today Humanity and nature are at war the evidence is all around us catastrophic weather events rising sea levels extinction of species famine wildfires melting polar ice millions of environmental refugees and toxic pollution of air water and soil The list goes on and on What is causing this war and how can it be stopped Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions This book takes the question and its answer to a deeper level It argues that the root cause of our war on nature might be found in the time honored historically deep myths narratives and stories we tell ourselves and have been telling ourselves for centuries about humanity s place in or out of the natural world
