Pigott,2020-03-12 The Maya Literary Renaissance is a growing yet little known literary phenomenon that can redefine our understanding of literature universally By analyzing eight representative texts of this new and vibrant literary movement the book argues that the texts present literature as a trans species phenomenon that is not reducible only to human creativity Based on detailed textual analysis of the literature in both Maya and Spanish as well as first hand conversations with the writers themselves the book develops the first conceptual map of how literature constantly emerges from wider creative patterns in nature This process defined as literary inhabitation is explained by synthesizing core Maya cultural concepts with diverse philosophical literary anthropological and biological theories In the context of the Yucatan Peninsula where the texts come from literary inhabitation is presented as an integral part of bioregional becoming the evolution of the Peninsula as a constantly unfolding dialogue      *Nature in North America* Reader's Digest Association (Canada),1992      *The Poetics of Natural History* Christoph Irmscher,2019-09-08 Winner of the 2000 American Studies Network Prize and the Literature and Language Award from the Association of American Publishers Inc Early American naturalists assembled dazzling collections of native flora and fauna from John Bartram's botanical garden in Philadelphia and the artful display of animals in Charles Willson Peale's museum to P T Barnum's American Museum infamously characterized by Henry James as halls of humbug Yet physical collections were only one of the myriad ways that these naturalists captured catalogued and commemorated America's rich biodiversity They also turned to writing and art from John Edward Holbrook's forays into the fascinating world of herpetology to John James Audubon's masterful portraits of American birds In this groundbreaking now classic book Christoph Irmscher argues that early American natural historians developed a distinctly poetic sensibility that allowed them to imagine themselves as part of and not apart from their environment He also demonstrates what happens to such inclusiveness in the hands of Harvard scientist turned Amazonian explorer Louis Agassiz whose racist pseudoscience appalled his student William

James This expanded full color edition of *The Poetics of Natural History* features a preface and art from award winning artist Rosamond Purcell and invites the reader to be fully immersed in an era when the boundaries between literature art and science became fluid      *Bulletin of the New York State Museum of Natural History* ,1947
