Stamos,2012-02-01 Since the 1859 publication of *On the Origin of Species* the concept of species in biology has been widely debated with its precise definition far from settled And yet amazingly there have been no books devoted to Charles Darwin's thinking on the term until now David N Stamos gives us a groundbreaking historical reconstruction of Darwin's detailed yet often misinterpreted thoughts on this complex concept Stamos provides a thorough and detailed analysis of Darwin's extensive writings both published and unpublished in order to reveal Darwin's actual species concept Stamos argues that Darwin had a unique evolutionary species concept in mind one that was not at all a product of his time Challenging currently accepted views that believe Darwin was merely following the species ascriptions of his fellow naturalists Stamos works to prove that this prevailing nominalistic view should be overturned This book also addresses three issues pertinent to the philosophy of science the modern species problem the nature of concept change in scientific revolutions and the contextualist trend in professional history of science      Hills and Highways Baroness Katharine Campbell Hopkinson Chorley Chorley,Katharine Chorley,1928      **A Cormac McCarthy Companion** Edwin T. Arnold,Dianne C. Luce,2009-09-28 The first book to examine McCarthy's three masterpiece novels as a cohesive whole      *The Pastoral Vision of Cormac McCarthy* Georg Guillemin,2004 The study shows that more than any of the other landscapes evoked by McCarthy the Southwestern desert becomes the stage for his dramatizations of a wild sense of the pastoral McCarthy's fourth novel *Suttree* which is the only one set in an urban environment is used in the introductory chapter to discuss the relevant compositional aspects of his fiction and the methodology of the chapters to come The main

part of the study devotes chapters to McCarthy's Southern novels his keystone work *Blood Meridian* and the Western novels known as the Border Trilogy The concluding chapter discusses the broader context of American pastoralism and suggests that McCarthy's ecopastoralism is animistic rather than environmentalist in character Jacket
