Listening to British Nature Michael Guida, 2022 Listening to British Nature Wartime Radio and Modern Life 1914 1945 argues that trench warfare created new practices of listening to nature in order to cultivate an intimate connection with its vibrations to understand danger and to imagine survival In focusing on the sensing of sounds and rhythms this study demonstrates how nature retained its emotional potency as the pace of life seemed to increase and new man made sounds and sonic media appeared all around

Natures in Translation Alan Bewell, 2017-01-02 Understanding the dynamics of British colonialism and the enormous ecological transformations that took place through the mobilization and globalized management of natures For many critics Romanticism is synonymous with nature writing for representations of the natural world appear during this period with a freshness concreteness depth and intensity that have rarely been equaled Why did nature matter so much to writers of the late eighteenth and early nineteenth centuries And how did it play such an important role in their understanding of themselves and the world In *Natures in Translation* Alan Bewell argues that there is no Nature in the singular only natures that have undergone transformation through time and across space He examines how writers as disparate as Erasmus and Charles Darwin Joseph Banks Gilbert White William Bartram William Wordsworth John Clare and Mary Shelley understood a world in which natures were traveling and resettling the globe like never before Bewell presents British natural history as a translational activity aimed at globalizing local natures by making them mobile exchangeable comparable and representable Bewell explores how colonial writers in the period leading up to the formulation of evolutionary theory responded to a world in which new natures were coming into being while others disappeared For some of these writers colonial natural history held the promise of ushering in a cosmopolitan nature in which every species through trade and exchange might become a true citizen of the world Others struggled with the question of how to live after the natures they depended upon were gone Ultimately *Natures in Translation* demonstrates that far from being separate from the dominant concerns of British imperial culture nature was integrally bound up with the business of empire

Environment and Tourism

Andrew Holden, 2016-04-25 The global demand for tourism continues to increase as economic growth creates opportunities for its consumption as a lifestyle option across cultures. The spatial reach of recreational tourism into remoter environments reflects a desire to reconnect to nature that is partially created by the global trend toward urbanisation. At the same time, anthropogenic created environmental problems have led us to re-evaluate our relationship to nature and the values that are held by the environment. This third edition of *Environment and Tourism* incorporates additional material on environmental philosophies and ontologies of nature and how these influence our understanding of tourism's relationship with the natural environment. In an epoch representing a critical juncture for the future well-being of the planet based on our relationship to nature, the text has been updated to reflect the growth in significance of the interaction between tourism and the natural environment as a part of this discourse. It communicates a range of key conceptual debates on the ethics and economics of the consuming nature for tourism and relates these to real-world examples whilst evaluating environmental planning and management responses. The book seeks to highlight the relevance of the significance of tourism for nature within the framework of society as a system of inter-connected places across space and time, exploring the relationship of the environments of where tourists come from with the ones that they travel to. The updated features include new chapters on philosophies and constructs of the environment, environmental ethics and tourist consumption, an extensive range of international case studies used to illustrate the theoretical ideas presented, boxes offering bite-sized insights and think points designed to encourage students to further engage with the topics discussed. *Environment and Tourism* emphasises a holistic view of the tourism system and how it interacts with nature, illustrating the positive and negative effects of this relationship. It emphasises how ontologies of the environment influence the planning and management of tourism for natural resource conservation and human development. It is an invaluable tool for anyone studying Human Geography, Tourism and Environmental Studies as well as for policy makers and consultants working in the field of tourism development.
