Nature's Spokesman M. Krishnan, 2000 This Collection Showcases Some Of Krishnan S Finest Essays On Large Mammals Little Creatures Nature In Temple Art And Folklore Nature S Desecration And Conservation *The Man Who Organized Nature* Gunnar Broberg, 2025-05-20 A vivid portrait of the life and work of Carl Linnaeus Carl Linnaeus 1707 1778 known as the father of modern biological taxonomy formalized and popularized the system of binomial nomenclature used to classify plants and animals Linnaeus himself classified thousands of species the simple and immediately recognizable abbreviation L is used to mark classifications originally made by Linnaeus This biography by the leading authority on Linnaeus offers a vivid portrait of Linnaeus s life and work Drawing on a wide range of previously unpublished sources including diaries and personal correspondence as well as new research it presents revealing and original accounts of his family life the political context in which he pursued his work and his eccentric views on sexuality The Man Who Organized Nature describes Linnaeus s childhood in a landscape of striking natural beauty and how this influenced his later work Linnaeus s Lutheran pastor father knowledgeable about plants and an enthusiastic gardener helped foster an early interest in botany The book examines the political connections that helped Linnaeus secure patronage for his work and untangles his ideas about sexuality These were not as often assumed an attempt to naturalize gender categories but more likely reflected the laissez faire attitudes of the era Linnaeus like many other brilliant scientists could be moody and egotistical the book describes his human failings as well as his medical and scientific achievements Written in an engaging and accessible style The Man Who Organized Nature provides new and fascinating insights into the life of one of history s most consequential and enigmatic scientists *Nature Cures* James C. Whorton, 2004 Writing with wit and with fairness to all sides Whorton offers a fascinating look at alternative health systems highlighting their history theories successes and failures His book is an engaging and authoritative history that highlights the course of alternative medicine in the U S providing valuable background to the wide range of therapies available today **Knowing Poetry** Adrian Armstrong, Sarah Kay, 2011-05-15 In the later Middle Ages many writers claimed that prose is superior to verse as a vehicle of knowledge because it presents the truth in an unvarnished form without the distortions of meter and rhyme Beginning in the thirteenth century works of verse narrative from the early Middle Ages were recast in prose as if prose had become the literary norm Instead of dying out however verse took on new vitality In France verse texts were produced in both French and Occitan with the explicit intention of transmitting encyclopedic political philosophical moral historical and other forms of knowledge In *Knowing Poetry* Adrian Armstrong and Sarah Kay explore why and how verse continued to be used to transmit and shape knowledge in France They cover the period between Jean de Meun s *Roman de la rose* c 1270 and the major work of Jean Bouchet the last of the grands rh toriqueurs c 1530 The authors find that the advent of prose led to a new relationship between poetry and knowledge in which poetry serves as a medium for serious reflection and self reflection on subjectivity embodiment and time

They propose that three major works the Roman de la rose the Ovide moralis and Boethius Consolation of Philosophy form a single influential matrix linking poetry and intellectual inquiry metaphysical insights and eroticized knowledge The trio of thought world contingency poetically represented by Philosophy Nature and Fortune grounds poetic exploration of reality poetry and community

The Advent of PhyloCode Michel Laurin, 2023-08-03 Biological nomenclature is an essential tool for storing and retrieving biological information Yet traditional nomenclature poorly reflects evolutionary theory Current biological nomenclature is one of the few fields promoting deliberately vague usage of technical terms A new code based on evolutionary studies and phylogenetic results the PhyloCode will be a major milestone in biological nomenclature Unfortunately The PhyloCode and the companion volume are highly technical publications intended for practicing systematists This book will reach a broader readership of those using nomenclature but who remain unaware of its theoretical foundations Key Features Responds to the biodiversity crisis and the recent implementation of the PhyloCode Summarizes the spectacular progress of phylogenetics which makes it both increasingly easy and crucially important to define precisely taxon names Provides a 300 year historical perspective featuring high profile characters such as Linnaeus and Darwin Summarizes for a broad readership a widely scattered highly technical and underappreciated scientific literature Documents the activities of the International Society for Phylogenetic Nomenclature a scholarly society in which the author has played a prominent role

Forests and Ecological

History of Assam, 1826-2000 Arupjyoti Saikia, 2011-02-07 This book presents a comprehensive account of the transformation of Assam s forests and ecology from early nineteenth century to the end of the twentieth century It locates present day ecological conflicts in the colonial era when contest over forest land and resource began to take new shape Arupjyoti Saikia delineates how forest resources in Assam were mapped and intergrated with mechant capitalism since the early nineteenth century He shows how imperial forestry practices led to changes in traditional resource utilization patterns The book also examines the political economy of conservation practices It explores the question of law and conservation role of institutions and organizations and the changing role of the forests in imperial economy The book argues how the making of

forest policy in the postcolonial period was defined by the complexities of the political matrix. It discusses plantation silvicultural practices, protection and regeneration of forests and livelihood practices. The author also analyses public debates surrounding ecology and environmental changes in conservation practices after the 1980 Act. Hanuman's Tale Philip Lutgendorf, 2007-01-11 Hanuman, the devoted monkey helper of Rama and Sita, has long been recognized as a popular character in India's ancient Ramayana epic. But more recently, he has also become one of the most beloved and worshiped gods in the Hindu pantheon, enshrined in majestic new temples but equally present in poster art, advertising and mass media. Drawing on Sanskrit and vernacular texts, classical iconography and modern TV serials and extensive fieldwork and interviews, Philip Lutgendorf challenges the academic cliché of Hanuman as a minor or folk deity by exploring his complex and growing role in South Asian religion and culture. This wide-ranging study examines the historical evolution of Hanuman's worship, his close association with Shiva and goddesses, his invocation in tantric ritual, his physical immortality and enduring presence in sacred sites, and his appeal to devotees who include scholars, wrestlers, healers, politicians and middle-class urbanites. Lutgendorf also offers a rich array of entertaining stories not previously available in English, an expanding epic cycle that he christens the Hanumayana. Arguing that Hanuman's role as cosmic middle man is intimately linked to his embodiment in a charming and provocative simian form, Lutgendorf moves beyond the Indian subcontinent to interrogate the wider human fascination with anthropoid primates as boundary beings and as potent signifiers of both Self and Other. Emerson and the Orphic Poet in America R. A. Yoder, 2023-07-28 In *Emerson and the Orphic Poet in America*, the author explores Ralph Waldo Emerson's conception of poetry and the poet within the context of a larger Romantic tradition. Emerson's work represents a critical shift in American thought, merging European Romantic ideals with an American voice. At the heart of his vision is the idea of the poet as both a visionary and a liberator of truth, a concept that Emerson inherited from a variety of traditions, including Blake's notion of the universal man and the Logos of Platonism. Emerson's invocation of the Orphic poet in his 1836 work *Nature* marks a departure from traditional American thought, positioning the poet as the one who speaks eternal truths, a voice that transcends the limitations of time and geography. His work incorporates a syncretic method, drawing from both European influences and American independence while advocating for a return to the primal source of truth. This conception places the poet at the center of life's order, a figure capable of transcending ordinary experience to reveal deeper universal truths. The study further delves into the development of Emerson's own poetic practice, noting the evolution from the grand Orphic figure in *Nature* to a more modest poet in his later works. Emerson initially saw poetry as a prophetic and divine gift, but over time, his work became more focused on the human and accessible aspects of poetry. His later writings reflect a poet who, though aware of the grandeur of Orphic ideals, recognizes the limitations of his own work, describing his voice as husky and imperfect. Despite this, Emerson still aligns himself with the greater tradition of poetic bards, finding satisfaction in their

immortal melodies The book concludes with an analysis of how Emerson's modifications of the Orphic tradition have shaped American poetry preserving its core inquiries while adapting it to a distinctly American context Through his evolving poetic practice Emerson's work continues to resonate influencing generations of American poets This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1978

The Spirit of System Richard Wellington Burkhardt, 1995 Jean Baptiste Lamarck was a biological Janus at once a highly competent taxonomist in a traditional mold and a bold almost visionary philosopher of nature who aspired to contrive an all embracing physics of the earth by sheer force of intellect Lamarck is generally remembered only for his ideas about the inheritance of acquired characters ideas he did not originate or take special credit for ideas that were only one part of his broad theory of evolution In this the first modern book length study of Lamarck Richard Burkhardt examines the origin and development of Lamarck's theory of organic evolution the major theory prior to Darwin

Inventing Human Science Christopher Fox, Roy Porter, Robert Wokler, 2023-11-15 The human sciences including psychology anthropology and social theory are widely held to have been born during the eighteenth century This first full length English language study of the Enlightenment sciences of humans explores the sources context and effects of this major intellectual development The book argues that the most fundamental inspiration for the Enlightenment was the scientific revolution of the seventeenth century Natural philosophers from Copernicus to Newton had created a magisterial science of nature based on the realization that the physical world operated according to orderly discoverable laws Eighteenth century thinkers sought to cap this achievement with a science of human nature Belief in the existence of laws governing human will and emotion social change and politics economics and medicine suffused the writings of such disparate figures as Hume Kant and Adam Smith and formed the basis of the new sciences A work of remarkable cross disciplinary scholarship this volume illuminates the origins of the human sciences and offers a new view of the Enlightenment that highlights the period's subtle social theory awareness of ambiguity and sympathy for historical and cultural difference The human sciences including psychology anthropology and social theory are widely held to have been born during the eighteenth century This first full length English language study of the Enlightenment sciences of humans explores the sources context

The Rumbling Island Zai Whitaker, 2008-06-16 The forests of India are not only home to a wide variety of animals and birds but they also teem with committed conservationists naturalists and nature lovers And after having spent many years with wildlife these men and women have fascinating stories to tell Cliff Rice is one such animal explorer He lived for two years in the mountains of Kerala befriending the Nilgiri tahr an endangered species of mountain goat with fistfuls of salt Ralph Morris one of the first British coffee planters in the Biligirirangan Hills went on a tiger beat and chased a pair of tigers towards his daughter Monica who was given little pebbles

to throw at them if defence became necessary Sally Walker spent years with tiger cubs in zoos and proved that kindness is more effective than fierce authority Rom Whitaker set off on an international hunt for giant crocodiles which took him from Orissa to Egypt and Manish Chandi tells a fascinating tale about Meroe the rumbling Nicobar island where he studied sea turtles and other wildlife **Places of Nature in Ecologies of Urbanism** Anne Rademacher, K.

Sivaramakrishnan, 2017-03-01 If twenty first century urbanization is understood as a problem its regional epicenter is the cities in Asia Facing unprecedented diversity in scale scope and environmental dynamics in the Asian urban experience scholars will need an approach that can truly capture the significance of place and context The challenge as this volume illustrates can be met by the analytic of ecologies of urbanism Eschewing a rigid single ecology the contributors identify multiple forms of nature in biophysical cultural and political terms that have discernable impact on power relations and human social action The case studies in this book including leopards in Mumbai a network of tubewells in northern India an island that grows through reclamation in Hong Kong and a railway continuum linking Khon Kaen and Bangkok all attest to the versatility of ecologies of urbanism Guided by urban processes rather than geopolitical boundaries Places of Nature in Ecologies of Urbanism offers a picture of urban Asia that is composed of varied ecologies of urbanism This intellectually adventurous work displays a deep cultural ethical sensibility in its close attention to geographically variegated forms of place making A first rate contribution to urban scholarship on Asia and beyond Vinay K Gidwani Department of Geography Environment and Society and Institute for Global Studies University of Minnesota This volume derives from a several year collaborative effort to bring scholars from different disciplines together to reflect on the constructed shifting and contested meanings of the forward slash separating Urban Natures The essays in this volume are bold rigorous original and sometimes even witty Without losing track of the intellectual genealogies that enable their collective effort the authors in Places of Nature in Ecologies of Urbanism give us new tools for imagining urban Asia s possible futures William Glover Department of History University of Michigan The Seasons' Musings Ebenezer Smith, 1888 The Book Review , 2001 **The Huxleys** Alison Bashford, 2022-11-16 This is a long overdue biography of the Huxleys the Victorian natural historian T H Huxley Darwin s Bulldog and his grandson the scientist conservationist and zoologist Julian Huxley Both T H and Julian suffered from depression thinking and writing about the condition and genetic inheritance in highly curious ways And between them they communicated to the world the great modern story of the theory of evolution by natural selection Because the grandson modeled himself so self consciously on the grandfather celebrated historian Alison Bashford writes seamlessly about these omnivorous intellects together almost as if they were one very long lived man whose vital dates bookended the colossal shifts in world history from the age of sail to the Space Age and from colonial wars to world wars to the cold war The myriad questions that the Huxleys grappled with make them the perfect dynasty companions for time travel over the age of evolution What is the nature of time and how old is the Earth itself What is the connection between human history and natural history

How are humans animals and how are we not What is the deep past and the distant future of humankind Can and should we actively seek to improve future generations What might the planet look like 10 000 years hence This momentous biography traces the problems and wonders of the modern world that the Huxleys themselves raised postured and pondered over lives that spanned the age of evolution

Speaking with Nature Norman Wirzba, 2024-10-29 From one of the world's leading historians comes the first substantial study of environmentalism set in any country outside the Euro American world By the canons of orthodox social science countries like India are not supposed to have an environmental consciousness They are as it were too poor to be green In this deeply researched book Ramachandra Guha challenges this narrative by revealing a virtually unknown prehistory of the global movement set far outside Europe or America Long before the publication of Rachel Carson's *Silent Spring* and well before climate change ten remarkable individuals wrote with deep insight about the dangers of environmental abuse from within an Indian context In strikingly contemporary language Rabindranath Tagore Radhakamal Mukerjee J C Kumarappa Patrick Geddes Albert and Gabrielle Howard Mira Verrier Elwin K M Munshi and M Krishnan wrote about the forest and the wild soil and water urbanization and industrialization Positing the idea of what Guha calls livelihood environmentalism in contrast to the full stomach environmentalism of the affluent world these writers activists and scientists played a pioneering role in shaping global conversations about humanity's relationship with nature Spanning more than a century of Indian history and decidedly transnational in reference this book offers rich resources for considering the threat of climate change today
