Lifestyle by Nature Betty Holston Smith Ed.D,2019-04-06 How are you If your truest first thoughts in pondering this question are something like I could be better this nature based lifestyle change book might help To be healthy you must take care of all of you because the total you is made up of your entire self including your body mind spirit soul your everything If one part of you is not up to par in some way or another it s impossible for your everything else to be totally healthy You have tried everything your friends your doctors and even the advertisement industry recommended for improving your health But nothing has worked except to make you a frustrated person Close your eyes right now and allow your conscious mind to contemplate your health situation Be honest You are not the healthiest that you can or should be In fact you are in dire straits according to how you feel and what your medical team says about your health I

know all of this about you because I was you so many years ago Like you for years I followed the same type of diet herd that you have been following And like you after trying everything I had no clue about what to try next However I found a clue Over forty years I lived the importance of and learned to replicate nature s wisdom on nutrition and movement in my unhealthy lifestyle Her focus was on naturally changing lifestyles not on temporary quick fixes And in the process she provided me with all types of support to do so I carefully recorded her step by step wisdom and provided the details inside Ditch your next quick fix cosmetic diet and put your trust in nature s simple but trustworthy lifestyle change wisdom

as one of its legs how many legs does a dog have Five of course is the correct answer for a math test Intelligent people say five because it is valid in mathematical systems and contemporary thinking and is highly regarded and rewarded by our society However we don't solely live our lives or think in mathematical systems Our natural sense of reason can consider what we know from our actual contact with a real normal dog too That's when our multitude of other natural senses come into play senses of touch motion color texture language sound smell consciousness community trust contrast and love They each provide further information and help our sense of reason make more sense and a more informed decision They enable our thinking to register that a tail is different than a leg that a dog has four legs not five no matter what might be correct in mathematical logic It is a grave mistake for anyone not to take seriously the difference between 4 leg and 5 leg ways of knowing and our learned prejudice for the latter As this book shows when they are not in balance the schism between their two different ways of registering the world is significant Four leg knowing is a magnificent psychological and physiological phenomenon with deep natural system roots into the eons the heart of Earth and our psyche It brings our widely diverse multiplicity of natural sensory experiences into our awareness Five leg knowing produces important awareness through abstract imagination labels and stories However when it does not also seek and contain 4 leg knowledge it results not only in our desensitization but in the separation of our thinking from the regenerative powers of Earth's natural systems within and around us This profound loss produces the many destructive side effects of our artificial world that we can not readily solve Four leg versus 5 leg discord creates an entrenched conflict in our psyche between how we think and how nature works This is a point source of the stress and contamination our society produces in the integrity of people and the environment It generates our many disorders and troubles that are seldom found in nature It is important to recognize is that by financially and socially rewarding us for getting good grades or for making the grade by using nature isolated 5 leg thinking our socialization habitually bonds conditions programs or ad Past and Present Thomas Carlyle, 1844 PEAK EVOLUTION: Beyond Peak Performance and Peak Experience Lauren Holmes, 2010-05-31 This is the second edition of the powerful peak evolution paradigm shift It is the means to leave a lifetime legacy more profound more meaningful more impactful and more valuable to world progress than you thought yourself capable of contributing Peak Evolution offers a breakthrough new approach to achieving the most evolved states known to mankind It is a means to have right now the advanced functionality of the future human which will not be prevalent for generations Peak Evolution serves as an explanation and beacon for people who have spontaneously begun to evolve ahead of the general population and a road map for those who wish to proactively speed evolution Peak Evolution is a how to book for achieving beyond your innate potential by harnessing natural evolutionary forces attempting to ensure the survival and peak performance of all living systems The multitude of systems inside of our bodies or outside of us in a biological ecosystem for example are both kept in balance by these natural evolutionary forces It is therefore only logical to deduce that those same evolutionary forces are also acting upon us directly

Our cultures have simply interfered with our ability to comply with and capitalize on these forces Peak Evolution identifies ten signals of those powerful evolutionary forces operating in your life so you can harness that flow to function and achieve goals beyond your potential Your capabilities are extended by the knowledge intelligence mechanisms processes and creativity of nature When you align your internal drives with nature s drives you cannot help but shift into overdrive You are perpetually pulled beyond your previous potential into a state of accelerating evolution or peak evolution.
