Joan Aruz, Sarah B. Graff, Yelena Rakic

Nautical Quarterly 29 Spring 1985:

The Maine Lobster Boat Daniel Sheldon Lee, 2022-09-15 The modern lobster boat has evolved slowly over decades to become the craft it is today seaworthy strong fast and trusted implicitly by the lobstermen and women to get the job done and get them home each and every time through the most terrifying and sometimes life threatening conditions that the sea can dish up Where do lobster boats come from What is the origin of their design Who builds them How do they work The story of the Maine lobster boat needs to be told before the storied history of this iconic American craft slips away forever into the past on the heels of what may be the last surviving traditional lobster boat builders Filled with colorful characters old maritime tales and fascinating details this a definitive look at the origins and lore of Maine s most ubiquitous vessel

Smith, Jr.,2010-04-13 The USS Carondelet had a revolutionary ship design and was the most active of all the Union s Civil War river ironclads From Fort Henry through the siege of Vicksburg and from the Red River campaign through the Battle of Nashville the gunboat was prominent in war legend and literature This history draws on the letters of Ensign Scott Dyer Jordan and Rear Adm Henry Walke s memoirs

Cultures in Contact Joan Aruz,Sarah B. Graff,Yelena Rakic,2013 The exhibition Beyond Babylon Art Trade and Diplomacy in the Second Millennium B C held in 2008 2009 at The Metropolitan Museum of Art demonstrated the cultural enrichment that emerged from the intensive interaction of civilizations from western Asia to Egypt and the Aegean in the Middle and Late Bronze Ages During this critical period in human history powerful kingdoms and large territorial states were formed Rising social elites created a demand for copper and tin as well as for precious gold and silver and exotic materials such as lapis lazuli and ivory to create elite objects fashioned in styles that reflected contacts with foreign lands This quest for metals along with the desire for foreign textiles was the driving force that led to the establishment of merchant colonies and a vast trading network throughout central Anatolia during the early second millennium B C Texts from palaces at sites from Hattusa modern Bogazk y in Hittite Anatolia to Amarna in Egypt attest to the volume and variety of interactions that took place some centuries later creating the impetus for the circulation of precious goods stimulating the exchange of ideas and inspiring artistic creativity Perhaps the most dramatic evidence for these far flung connections emerges out of tragedy the wreckage of the oldest known seagoing ship discovered in a treacherous stretch off the southern coast of Turkey near the promontory known as Uluburun Among its extraordinary cargo of copper glass and exotic raw materials and luxury goods is a gilded bronze statuette of a goddess perhaps the patron deity on board who failed in her mission to protect the ship To explore the themes of the exhibition art trade and diplomacy viewed from an international perspective a two day symposium and related scholarly events allowed colleagues to explore many facets of the multicultural societies that developed in the second millennium B C Their insights which dramatically illustrate the incipient phases of our intensely interactive world are presented largely in symposium order beginning with broad regional overviews and examination of particular archeological contexts and then drawing attention to specific artists and literary evidence for interconnections In this introduction however their contributions are viewed from a somewhat more synthetic perspective one that focuses attention on the ways in which ideas in this volume intersect to enrich the ongoing discourse on the themes elucidated in the exhibition

The CSS Arkansas Myron J. Smith, Jr.,2014-01-10 While the Monitor and Merrimack are the most famous of the Civil War ironclads the Confederacy had another ship in its flotilla that carried high hopes and a metal hull The makeshift CSS Arkansas completed by Lt Isaac Newton Brown and manned by a mixed crew of volunteers gave the South a surge of confidence when it launched in 1862 For 28 days of summer the ship engaged in five battles with Union warships falling victim in the end only to her own

primitive engines The saga of the CSS Arkansas represents the last significant Rebel naval activity in the war s Western theater **Air University Quarterly Review** ,1987 Coastal Shrines and Transnational Maritime Networks across India and Southeast Asia Himanshu Prabha Ray,2020-07-26 This book breaks new ground by examining trans oceanic connectivity through the perspective of coastal shrines and maritime cultural landscapes across the Bay of Bengal and the South China Sea It covers a period of expanding networks and cross cultural encounters from the 3rd century BCE to the 13th century CE The book examines the distinctiveness of these shrines and highlights their interconnections and their role in social integration in South and Southeast Asia By drawing on data from shipwreck sites the author elaborates on the material and religious intersections and transmissions between cultures across the seas Many of these coastal shrines survived into the colonial period when they came to be admired for their aesthetic value as monuments As nation states of the region became independent these shrines were often inscribed on UNESCO s World Heritage List on account of their Outstanding Universal Values The book argues that in the 21st century there is a need to promote the cultural connectivity of the past as transnational heritage on UNESCO s global platform to preserve and protect our shared heritage The volume will be essential reading for academics and researchers of archaeology anthropology museum and heritage studies history of South and Southeast Asia religious studies cultural studies and Asian studies **Nautical Research Journal** ,1984 **Hamish MacCunn (1868-1916): A Musical Life** Jennifer L. Oates,2016-04-22 Hamish MacCunn s career unfolded amidst the restructuring of British musical culture and the rewriting of the Western European political landscape Having risen to fame in the late 1880s with a string of Scottish works MacCunn further highlighted his Caledonian background by cultivating a Scottish artistic persona that defined him throughout his life His attempts to broaden his appeal ultimately failed This along with his difficult personality and a series of poor professional choices led to the slow demise of what began as a promising career As the first comprehensive study of MacCunn s life the book illustrates how social and cultural situations as well as his personal relationships influenced his career While his fierce loyalty to his friends endeared him to influential people who helped him throughout his career his refusal of his Royal College of Music degree and his failure to complete early commissions assured him a difficult path Drawing upon primary resources Oates traces the development of MacCunn s music chronologically juxtaposing his Scottish and more cosmopolitan compositions within a discussion of his life and other professional activities This picture of MacCunn and his music reveals on the one hand a talented composer who played a role in establishing national identity in British music and on the other a man who unwittingly sabotaged his own career

Ancient Ocean Crossings Stephen C. Jett,2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia

and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre-Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

Western Strategic Interests in Saudi Arabia (RLE Saudi Arabia) Anthony Cordesman, 2020-07-26 Saudi Arabia's strategic relations with the West involve clear and direct common strategic interests in the Gulf and in the Near East While they compete in terms of trade and oil prices they share a common commitment to private enterprise and to maintaining a stable balance of world trade Saudi Arabia often differs with given Western states in terms of specific strategic interests and tactics but these differences are rarely significant enough to prevent close cooperation Even the differences over the Arab-Israeli peace issue are largely ones of timing and tactics Saudi Arabia must preserve friendly relations with Syria and is vulnerable to attacks by Arab radicals and Iran It has also differed with the US over the specific approach that should be taken to achieving an Arab-Israeli peace settlement but it has consistently pushed for a peace settlement within the Arab world This book first published in 1987 analyses the interrelations between Western and Saudi strategic concerns and argues forcibly that pressure from the Israeli lobby within US domestic politics must not be allowed to interfere within the proper provisioning of the Saudi armed forces especially the air force

Milliken's Bend Linda Barnickel, 2013-04-15 At Milliken's Bend Louisiana a Union force composed predominantly of former slaves met their Confederate adversaries in one of the bloodiest small engagements of the war This important fight received some attention in the North and South but soon drifted into obscurity In Milliken's Bend Linda Barnickel uncovers the story of this long forgotten and highly controversial battle The fighting at Milliken's Bend occurred in June 1863 about fifteen miles north of Vicksburg on the west bank of the Mississippi River where a brigade of Texas Confederates attacked a Federal outpost Most of the Union defenders had been slaves less than two months before The new African American recruits fought well despite their minimal training and Milliken's Bend helped prove to a skeptical northern public that black men were indeed fit for combat duty Soon after the battle accusations swirled that Confederates had executed some prisoners taken from the

Colored Troops The charges eventually led to a congressional investigation and contributed to the suspension of prisoner exchanges between the North and South Barnickel s compelling and comprehensive account of the battle illuminates not only the immense complexity of the events that transpired in northeastern Louisiana during the Vicksburg Campaign but also the implications of Milliken s Bend upon the war as a whole The battle contributed to southerner s increasing fears of slave insurrection and heightened their anxieties about emancipation In the North it helped foster a commitment to allow free blacks and former slaves to take part in the war to end slavery And for African Americans both free and enslaved Milliken s Bend symbolized their never ending struggle for freedom

Civil War Monitor In *Continental Reckoning* renowned historian Elliott West presents a sweeping narrative of the American West and its vital role in the transformation of the nation In the 1840s by which time the United States had expanded to the Pacific what would become the West was home to numerous vibrant Native cultures and vague claims by other nations Thirty years later it was organized into states and territories and bound into the nation and world by an infrastructure of rails telegraph wires and roads and by a racial and ethnic order with its Indigenous peoples largely dispossessed and confined to reservations Unprecedented exploration uncovered the West's extraordinary resources beginning with the discovery of gold in California within days of the United States acquiring the territory following the Mexican American War As those resources were developed often by the most modern methods and through modern corporate enterprise half of the contiguous United States was physically transformed *Continental Reckoning* guides the reader through the rippling multiplying changes wrought in the western half of the country arguing that these changes should be given equal billing with the Civil War in this crucial transition of national life As the West was acquired integrated into the nation and made over physically and culturally the United States shifted onto a course of accelerated economic growth a racial reordering and redefinition of citizenship engagement with global revolutions of science and technology and invigorated involvement with the larger world The creation of the West and the emergence of modern America were intimately related Neither can be understood without the other With masterful prose and a critical eye West presents a fresh approach to the dawn of the American West one of the most pivotal periods of American history *National Trade and Professional Associations of the U.
