Naval Science 2 Maritime History Nautical Sciences For Njrotc:

Naval Science 2 Richard R. Hobbs, 2014-09 Naval Science 2 3rd Edition is the new edition of a textbook that has long been a staple work for the NJROTC program. It provides a survey of early maritime history as well as the history of the U S Navy. In addition, this textbook covers the key leadership precepts and nautical sciences required by second year students in the Navy high school NJROTC program. Subjects covered include maritime geography, oceanography, meteorology, astronomy, and physical science including timely topics such as global warming, green energy, and computer science. The highly illustrated text provides the fundamental background necessary for follow-on studies in all these areas at either the senior high school or college level. **Naval Science 2** Richard R. Significantly reduced list price. Twenty essays selected from the writings of John B. Hattendorf, Ernest J. King, Professor of Maritime History at the U S Naval War College between 2001 and 2009. They represent a wide historical perspective that ranges across nearly four centuries of maritime history. A number of these pieces have been published previously but have appeared in other languages and in other countries where they may not have come to the attention of an American naval reading audience. This collection is divided into parts that deal with four major themes: the broad field of maritime history, general naval history with specific focus on the classical age of sail from the mid-seventeenth century to the end of the Napoleonic Wars in 1815, the wide scope of American naval history from 1775 to the end of the twentieth century, and finally the realm of naval theory and its relationship to naval historical studies. They are reprinted with only minor alterations as
