This lively history of the dreaded disease weaves a tale of medical discovery into a swashbuckling adventure on the high seas. The Toronto Star Scurvy took a terrible toll in the Age of Sail killing more sailors than were lost in all naval combat combined. The threat of the disease kept ships close to home and doomed those vessels that ventured too far from port. The willful ignorance of the royal medical elite who endorsed ludicrous medical theories while ignoring the life saving properties of citrus fruit cost tens of thousands of lives and altered the course of many battles at sea. The cure for scurvy ranks among the greatest human accomplishments yet its full impact on history is little understood. From the earliest recorded appearance of the disease in the sixteenth century to the eighteenth century when a man had only half a chance of surviving the scourge to the early nineteenth century when the British conquered scurvy and successfully blockaded the French and defeated Napoleon Scurvy is a medical detective story for the ages the fascinating true story of how James Lind the surgeon James Cook the mariner and Gilbert Blane the gentleman worked separately to eliminate the dreaded affliction. It is also an evocative journey back to the era of wooden ships and sails when the disease infiltrated every aspect of seafaring life press gangs recruit mariners on the way home from a late night at the pub a voyage in search of riches ends with a hobbled fleet and half the crew heaved overboard Cook majestically travels the South Seas but suffers an unimaginable fate. Brimming with tales of ships sailors and baffling bureaucracy this is a splendid popular telling of the scurvy story. American Geographical Society Gripping full of adventure big events and human nature at its best and worst. New Scientist Excellent medical and naval history. The Naval Surgeon ; Comprising the Entire Duties of Professional Men at Sea... William Turnbull,1806 Physician to the Fleet Brian Vale,Griffith Edwards,2011 Thomas Trotter after studying medicine at Edinburgh began his naval career as a surgeon's mate in 1779 and saw continuous service up to the peace of 1802 rising as a result of great abilities and the right patronage to become Physician to the Channel Fleet and being present at the great battles of Dogger Bank in 1781 and the Glorious First of June in 1794. As Physician to the Channel Fleet he was a major player in the conquest of scurvy and the control of typhus and smallpox in the navy. After the peace he settled in Newcastle where he produced pioneering work on alcoholism and neurosis as a result of which he is regarded as one of the founders of the field of addiction studies. This book provides an intimate account of naval life in the great age of sail from the perspective of a surgeon describing the impact of Enlightenment ideas and new medical techniques and showing how improved health was a crucial factor in making possible the British fleet's great victories in this period. *The Naval Surgeon* William Johnstoun N. William Johnson NEALE,1861 **Resurrecting Dr. Moss** Paul Campbell Appleton,2008 Resurrecting Dr Moss The Life and Letters of a Royal Navy Surgeon Edward Lawton Moss MD RN 1843 1880 chronicles the life and death of Edward Lawton Moss a Royal Navy surgeon on the last great British north polar expedition of the nineteenth century Arctic historians and bibliophiles are familiar with Moss s account of the 1875 76 British Arctic Expedition published under the title Shores of the Polar Sea but little has been known about Moss himself Now thanks to Paul Appleton s painstaking research his life has taken shape in this well crafted biography Relying heavily on Moss s own letters Appleton recounts his travels in the Caribbean the Arctic and on Canada s Pacific coast creating a vivid portrait of a man he calls an example of the best traditions of British naval medicine during the Victorian era Artist author explorer and scientist Dr Moss was also a pioneering medical officer During his posting in British Columbia he played a pivotal role in founding one of the earliest medical institutions on Canada s west coast the hospital at the Esquimalt Naval Base Moss s life was cut short at the age of thirty seven when the HMS Atalanta disappeared en route from Bermuda in 1880 **The Naval Surgeon ; Comprising the Entire Duties of Professional Men at Sea...** ,1806 Naval Surgeon Edward Hodges Cree,1982 **The Naval Surgeon** William Johnstoun N. Naval Hospital, Chelsea, Mass,1943 Nelson's Surgeon:William Beatty, Naval Medicine, and the Battle of Trafalgar Laurence Brockliss,John Cardwell,Michael Moss,2005-10-06 In the lead up to the bicentenary of Trafalgar a number of important new studies have been published about the life of Nelson and his defeat of the Combined Fleet in 1805 Despite the significant role played by the health and fitness of the British crews in securing the victory little has been written hitherto about the naval surgeon in the era of the long war against France This book is intended to fill the gap Sir William Beatty 1773 1842 was surgeon of the Victory atTrafalgar An Ulsterman from Londonderry he had joined the navy in 1791 Before being warranted to Nelson s flagship Beatty had served upon ten other warships and survived a yellow fever epidemic court martial and shipwreck to share in the capture of a Spanish treasure ship After Trafalgar hebecame Physician of the Channel Fleet based at Plymouth and eventually Physician to Greenwich Hospital where he served until his retirement in 1838 As the book makes clear in drawing upon an extensive prosopographical database Beatty s career until 1805 was representative of the experience of the approximately 2 000 naval surgeons who joined the navy in the course of the war The first part of the biography provides a detailed and scholarly introduction to the professional education training and work of the naval surgeon But after 1805 Beatty became a member of the service elite and his career becomes interesting for other

reasons In the final decades of his life Beatty was far more than a senior naval physician As a Fellow of the Royal Society director of the Clerical and Medical Insurance Company and director of the London to Greenwich Railway he was a prominent figure in London s business and scientific community who used his growing wealth to build a large collection of books and manuscripts His later life is testimony to the much wider contribution that some naval and army medical officers made to the development of the new Britain of the nineteenth century In Beatty s case too the contribution was original By publishing in 1807 his carefully crafted Authentic Narrative of the Death of Lord Nelson he was instrumental in forging the myth of the hero s last hours which has become a part of the national consciousness and has helped to define for generations the concept of Britishness
