Guangdong and Chinese Diaspora Yow Cheun Hoe, 2013-06-26 China's rapid economic growth has drawn attention to the Chinese diasporic communities and the multiple networks that link Chinese individuals and organizations throughout the world Ethnic Chinese have done very well economically and the role of the Chinese Diaspora in China's economic success has created a myth that their relations with China is natural and primordial and that regardless of their base outside China and generation of migration the Chinese Diaspora are inclined to participate enthusiastically in China's social and economic agendas This book seeks to dispel such a myth By focusing on Guangdong the largest ancestral and native homeland it argues that not all Chinese diasporic communities are the same in terms of mentality and orientation and that their

connections to the ancestral homeland vary from one community to another Taking the two Cantonese speaking localities of Panyu and Xinyi Yow Cheun Hoe examines the hierarchy of power and politics of these two localities in terms of their diasporic kinsfolk in Singapore and Malaysia in comparison with their counterparts in North America and Hong Kong The book reveals that particularly in China s reform era since 1978 the arguably primordial sentiment and kinship are less than crucial in determining the content and magnitude of linkages between China and the overseas Chinese Rather it suggests that since 1978 business calculation and economic rationale are some of the key motivating factors in determining the destination and degree of diasporic engagement Examining various forms of Chinese diasporic engagement with China this book will appeal to students and scholars of Chinese Diaspora Chinese culture and society Southeast Asian culture and society and ethnicity

China's Relations with Japan in an Era of Economic Liberalisation Dong Dong Zhang, 1998 The main purpose of this book is to explore the influences of reform on changes in China s economic relations with Japan after the late 1970s There are three reasons for investigating the links between Chinese reform and bilateral economic relations at this particular juncture in history First in the past two decades reform has meant that China has enjoyed faster economic growth than Japan This has transformed the pattern of bilateral economic relations hitherto characterised by an industrial Japanese economy and a resource based Chinese economy a result of Japan s successful industrialisation and China s failure to industrialise in the previous hundred years Second reform has brought about the deepening of the interdependence between the Chinese economy and the world economy Through links with the world economy the Chinese economy has not only come to rely on foreign countries for technology capital markets and management skills but has itself become a growth pole exerting a strong impact on world economic growth In the reform era economic relations between China and Japan have been woven into regional and global economic networks of trade and investment Third reform has transformed the management of China s domestic and external economic activities
