Pace Forward Policy Analytic And Computational Environment For Dutch Freight Transport:

An Overview of PACE-FORWARD Manuel J. Carrillo, Rand Corporation, European-American Center for Policy Analysis, Netherlands. Ministrie van Verkeer en Waterstaat, 1995 Pace-Forward Manuel J. Carrillo, R. J. Hillestad, 1996

This report describes the design and capabilities of PACE FORWARD the decision support system DSS developed to support the FORWARD Freight Options for Road Water and Rail for the Dutch study a major transportation research study that examined the benefits and costs of a broad range of policy options for mitigating the negative impacts of the expected growth in Dutch road freight transport while retaining the economic benefits The PACE FORWARD DSS was used to estimate the effects of numerous policy options and can be used to reevaluate policy options as projections change and or more data become available The model offers a spreadsheet environment containing tools and models to support policy analysis including macroeconomic effects It has integrated data and model bases and a graphical user interface Existing Dutch and international research data and models were used extensively in its design and development Transport and Environment

Eran Feitelson, E. T. Verhoef, 2001-01-01 The impact of transport on the environment is a major issue of worldwide concern This important new book presents state of the art contributions on spatial and technological aspects of transport in relation to environmental degradation together with analysis of sustainable transport policy **Optimization Models for Rail Car Fleet Management** Milos Milenkovic, Nebojsa Bojovic, 2019-09-09 Optimization Models for Rail Car Fleet Management represents the result of multi year efforts to provide readers with insights into one of the most important areas of railway transport management The book covers mathematical procedures for the effective and efficient utilization of railway freight cars developed models for optimization methods heterogeneity and partial substitutability of freight cars research and development in rail freight car fleet management models and the stochastic and dynamic nature of the supply demand and traveling time of freight cars among other topics Summarizes the authors past research efforts in the field of rail freight car fleet management Presents various approaches that include the application of a variety of optimization techniques Contains centralized decentralized distributed perspectives considered under the assumption of deterministic stochastic fuzzy and fuzzy stochastic parameters **Public Policy Analysis** Wil A. H. Thissen, Warren E. Walker, 2012-10-05 Traditional policy analysis approaches are characterized by a focus on system modeling and choosing among policy alternatives While successful in many cases this approach has been increasingly criticized for being technocratic and ignoring the behavioral and political dimensions of most policy processes In recent decades increased awareness of the multi actor multiple perspective and poly centric character of many policy processes has led to the development of a variety of different perspectives on the styles and roles of policy analysis and to new analytical tools and approaches for example argumentative approaches participative policy analysis and negotiation support As a result the field has become multi faceted and somewhat fragmented Public Policy Analysis New Developments acknowledges the variety of approaches and provides a synthesis of

the traditional and new approaches to policy analysis It provides an overview and typology of different types of policy analytic activities characterizing them according to differences in character and leading values and linking them to a variety of theoretical notions on policymaking Thereby it provides assistance to both end users and analysts in choosing an appropriate approach given a specific policy situation By broadening the traditional approach and methods to include the analysis of actors and actor networks related to the policy issue at hand it deepens the state of the art in certain areas While the main focus of the book is on the cognitive dimensions of policy analysis it also links the policy analysis process to the policymaking process showing how to identify and involve all relevant stakeholders in the process and how to create favorable conditions for use of the results of policy analytic efforts by the policy actors The book has as its major objective to describe the state of the art and the latest developments in ex ante policy analysis It is divided into two parts Part I explores and structures policy analysis developments the development and description of approaches to diagnose policy situations design policy analytic efforts and policy process conditions Part II focuses on recent developments regarding models and modeling for policy analysis placing modeling approaches in the context of the variety of conditions and approaches elaborated in Part I

FORWARD--freight Options for Road, Water, and Rail for the Dutch: Executive summary Richard John Hillestad,1996 This report presents the basic findings of the study but the interested reader should refer to the main report for a detailed discussion of the issues *Fast-forward* Richard John Hillestad,Ben D. Van Roo,Keenan D. Yoho,2009 On January 29 2009 the RAND Corporation hosted a panel discussion with three former U S Secretaries of Transportation William T Coleman Jr James H Burnley IV and Rodney Slater This wide ranging discussion held the week after President Barack Obama s inauguration and during the congressional debate over the stimulus package eventually passed as the American Recovery and Reinvestment Act of 2009 allowed the former secretaries to share their insights into transportation policymaking Preface Transport Networks in Europe Kenneth Button,Peter Nijkamp,Hugo Priemus,1998 Revision of papers presented at the European Research Conference Policies on European Networks held by the Network on European Communications and Transport Activity Research in Portugal April 17 23 1995 **Visual Interactive Policy Analysis in Transportation Planning** Cara L. Largesse,1995 **FORWARD--freight Options for Road, Water, and Rail for the Dutch: Final report** Richard John Hillestad,1996 This report describes a major transportation research study that examined the benefits and costs of a broad range of policy options for mitigating negative impacts of the expected growth in Dutch road freight transport while retaining economic benefits *Selected Rand Abstracts* Rand Corporation,1996 Includes publications previously listed in the supplements to the Index of selected publications of the Rand Corporation Oct 1962 Feb 1963 *Selected Rand Abstracts* ,1993 *FORWARD* Richard John Hillestad,1995 This study examines possible ways to mitigate the negative impacts of the projected increase in freight transportation on the Netherlands highways while attempting to retain the economic benefits from the efficient and reliable transport of goods On an aggregate level the study

gives insight into the impacts of a large number of tactics and combinations of tactics which are single actions taken to affect the freight transportation system. The various tactics fall into three main categories: direct mitigation of negative effects, more efficient freight movement by road, and inducing a modal shift to alternative modes such as railways and inland waterways. To assess the impacts of the possible changes in the transportation system, a microcomputer-based policy analysis model called Policy Analytic Computational Environment for FORWARD PACE FORWARD was developed. The user can directly interact with the model to gain insights into the effects of the various tactics on emissions, noise, safety, congestion, costs, and the national economy. PACE FORWARD is an integrative model that is composed of modules that use data, factors, and relationships from existing Dutch transportation models and databases. Results on tactic performance produced by PACE FORWARD were used to design combinations of tactics called strategies that might contribute to achieving a range of national goals. In particular, the authors found that efficiency tactics were the most promising, that selected direct mitigation measures could be used to fill in for gaps in goal achievement, and that mode shift tactics were generally not cost effective and were relatively ineffective at changing impacts. *RAOP*, 1995.
