Packaging Law Europe Ashgate Studies In Environmental Policy And Practice:

New Environmental Policy Instruments in the European Union Ian Bailey, 2017-07-05 The use of legislation by EU governments to define environmental standards for industry has been criticised for its poor track record in arresting the decline in the quality of Europe's environment Environmental economists in particular have proposed that legislation should be supplemented or replaced by New Environmental Policy Instruments NEPIs such as eco taxes environmental charges tradable permits and voluntary agreements This book focuses on practical experiences with NEPIs in the EU and tests their application using the case study of the Packaging and Packaging Waste Directive It traces the ways in which member states have adapted NEPIs to suit their preferred styles of environmental policy then assesses their performance and how NEPIs have both assisted and hindered the EU environmental programme It suggests options for ensuring that the environmental programme does not become fragmented by the use of NEPIs and discusses the implications of EU enlargement

Packaging Law Europe Bailey Patricia M., 2019-01-04 First published in 1999 this volume responds to the 1991 enactment by the German government of its Packaging Ordinance which led to new or revised packaging legislation throughout the European Union Problems caused by this divergent legislation led to the enactment of the Directive on Packaging and Packaging Waste in late 1994 Unfortunately the imprecision of the Directive necessary to ensure its enactment has led to further disputes At the heart of these disputes is the classic struggle between the priorities of environmental protection and economic development This book analyses the implementation of the Directive by Member States and in particular issues such as the imposition of quotas on reusable containers the use of economic instruments and environmental agreements and competition issues and state aids The book enlightens readers to the current debates regarding packaging legislation which continue today despite the enactment of EU legislation [New Environmental Policy Instruments in the European Union](#) Ian Bailey, 2003 The use of legislation by EU governments to define environmental standards for industry has been criticised for its poor track record in arresting the decline in the quality of Europe's environment Environmental economists in particular have proposed that legislation should be supplemented or replaced by New Environmental Policy Instruments NEPIs such as eco taxes environmental charges tradable permits and voluntary agreements This book focuses on practical experiences with NEPIs in the EU and tests their application using the case study of the Packaging and Packaging Waste Directive It traces the ways in which member states have adapted NEPIs to suit their preferred styles of environmental policy then assesses their performance and how NEPIs have both assisted and hindered the EU environmental programme It suggests options for ensuring that the environmental programme does not become fragmented by the use of NEPIs and discusses the implications of EU enlargement **The Routledge Handbook of Policy Styles** Michael Howlett, Jale Tosun, 2021-02-28 This Handbook provides a systematic overview of the study of policy styles provided by leading experts in the field The book unites theoretical bases and advancements in practice ranging from the

fundamentals of policy styles to its place in greater policy studies and responds to new questions regarding policy style dynamics across a range of government levels and activities including contemporary trends affecting styles such as the use of digital tools and big data in government. It is a comprehensive reference for students and scholars of public policy. Key features: consolidates and advances the contemporary body of knowledge on policy styles and defines its distinctiveness within broader policy studies; provides a detailed picture of national policy styles in a wide range of countries as well as insights concerning sectoral and other kinds of styles within countries including executive styles and styles of policy advice; systematically explores questions dealing with how policy styles impact policy goals and the realization of policies including how styles affect instruments, choices and impact; provides a guide to future comparative research pathways and cross sectoral dialogue on the concept and practice of policy styles. Voluntary Environmental Agreements Patrick ten Brink, 2017-08-25

Voluntary environmental agreements (VEAs) generally agreements between government and business have been regarded by many as a key new instrument for meeting environmental objectives in a flexible manner. Their performance to date has however also led to considerable criticism with several parties arguing that they are methods for avoiding real action that goes beyond business as usual. Is either of these positions justified? The aim of this book is to highlight and learn the lessons from existing experience looking not just at results but also at specific elements of agreements and also at the process of the agreement itself. Lessons are drawn from experience from across the world covering the full range of environmental challenges and from the perspective of key stakeholder groups. Importantly the book also presents tools for assessing and improving existing agreements and includes recommendations and guidelines for future agreements in key areas such as climate change. It also deals at length with the problem of how such agreements might be used in developing and transitional economies. The overall view of the book is that there is a real potential for the future use of VEAs as part of the policy mix and as a tool for sharing the responsibility for meeting environmental objectives. For the agreements to play this role however significant steps are needed to ensure that they are effective, efficient, equitable and appropriately linked to a portfolio of other instruments. The book is divided into four sections. First existing agreements their development and efficacy are considered second the prospects for voluntary agreements in developing and transitional economies are discussed third a range of authors examine the role of VEAs as part of the policy mix to combat climate change and finally the book concludes with an examination of how new tools for evaluating and improving VEAs could be utilized in the future. Voluntary Environmental Agreements will be of interest not only to academics, governments and businesses wishing to understand this specific instrument but also to those already

implementing or considering applying VEAs to meet their environmental objectives

European legislation on waste management is the Extended Producer Responsibility EPR principle For example all economic operators placing packaging onto the EU market are responsible for its proper management and recovery However in general the collection and treatment of urban waste is the responsibility of local authorities It has therefore been necessary to establish a system of financial compensations between producers and waste management operators Analysing the legal and institutional schemes of several member states and accounting for all the costs and benefits to their local authorities due to selective collection and sorting this book provides an accurate illustration of how the EPR principle has been translated into practice *The British National Bibliography* Arthur James Wells,2000 **Food Words** Peter Jackson,2013-06-27 Food Words is a series of provocative essays on some of the most important keywords in the emergent field of food studies focusing on current controversies and on going debates Words like choice and convenience are often used as explanatory terms in understanding consumer behavior but are clearly ideological in the way they reflect particular positions and serve specific interests while words like taste and value are no less complex and contested Inspired by Raymond Williams Food Words traces the multiple meanings of each of our keywords tracking nuances in different academic commercial and policy contexts Mapping the dynamic meanings of each term the book moves forward from critical assessment to active intervention an attitude that is reflected in the lively sometimes combative style of the essays Each essay is research based and fully referenced but accessible to the general reader With a foreword by eminent food scholar Warren Belasco Professor of American Studies at the University of Maryland Baltimore County and written by an inter disciplinary team associated with the CONANX research project Consumer culture in an age of anxiety Food Words will be essential reading for food scholars across the arts humanities and social sciences Storage and Scarcity Giorgio Osti,2016-06-10 In an era of abundance at least part of humanity has stopped thinking about the future provision of basic vital resources such water energy and food Storage actions with all their variants whether real or imagined are sources of innovation in the provision and treatment of crucial resources This book deals with cases of water food energy and biodiversity storage as a response to a new era of scarcity Examining multilevel storage policies consumers practices and local organisations author Giorgio Osti explores a variety of examples such as the need to stock agriculture produce the industry and practices of food conservation the role of artificial water basins in controlling floods and droughts and the development of batteries able to compensate for the intermittence of renewable energy sources Storage and self sufficiency can be achieved in many technical ways at different territorial levels and according to different policies or philosophies Being more a grasshopper or an ant the two extreme positions depends not only on the technologies available but also on different analyses of the environment and different attitudes to the future This book offers an environmentalist perspective that uncovers hidden or absent activities of ultramodern societies that will be useful to students of environmental sociology as well as those researching and studying at the interface of environmental studies and geography *Sustainable Value Chain Management* Dr François Maon,Mr

Sankar Sen, Professor Joëlle Vanhamme, Professor Adam Lindgreen, 2013-11-28 The way organizations manage their value chain has changed dramatically over the past decade Today organizations take account of economic issues but they also adopt a broader perspective of their purpose including social and environmental issues Yet despite its global spread sustainable value chain management remains an uncertain and poorly defined ambition with few absolutes The social and environmental issues that organizations should address can easily be interpreted as including virtually everything Current literature on the topic seeks to understand the effects and management of initiatives dealing with diversity human rights safety philanthropy community and environment However the penetration of social and environmental considerations into value chain management is described as desire lacking reality thereby making the idea a patchy success The objective of this research anthology is to investigate different angles of sustainable value chain management The book s 27 chapters fill holes and explore new fields in this area
