Service Science Research, Strategy and Innovation: Dynamic Knowledge Management Methods Delener, N.,2012-01-31 This book explores areas such as strategy development service contracts human capital management leadership management marketing e government and e commerce Provided by publisher Applications, Tools and Techniques on the Road to Exascale Computing K. De Bosschere,E.H. D'Hollander,G.R. Joubert,2012-05-09 Single processing units have now reached a point where further major improvements in their performance are restricted by their physical limitations This is causing a slowing down in advances at the same time as new scientific challenges are demanding exascale speed This has meant that parallel processing has become key to High Performance Computing HPC This book contains the proceedings of the 14th biennial ParCo conference ParCo2011 held in Ghent Belgium The ParCo conferences have traditionally concentrated on three main themes Algorithms Architectures and Applications Nowadays though the focus has shifted from traditional multiprocessor topologies to heterogeneous and manycores incorporating standard CPUs GPUs Graphics Processing Units and FPGAs Field Programmable Gate Arrays These platforms are at a higher abstraction level integrated in clusters grids and clouds The papers presented here reflect this change of focus New architectures programming tools and techniques are also explored and the need for exascale hardware and software was also discussed in the industrial session of the conference This book will be of interest to all those interested in parallel computing today and progress towards the exascale computing of tomorrow *Innovative Developments in Design and Manufacturing* Paulo Jorge da Silva Bartolo,Mateus Artur Jorge,Fernando da Conceicao Batista,Henrique Amorim Almeida,Joao Manuel Matias,Joel

Correia Vasco, Jorge Brites Gaspar, Mario Antonio Correia, Nuno Carpinteiro Andre, Nuno Fernandes Alves, Paulo Parente Novo, Pedro Goncalves Martinho, Rui Adriano Carvalho, 2009-09-22 Essential reading on the latest advances in virtual prototyping and rapid manufacturing Includes 110 peer reviewed papers covering 1 Biomanufacturing 2 CAD and 3D data acquisition technologies 3 Materials 4 Rapid tooling and manufacturing 5 Advanced rapid prototyping technologies and nanofabrication 6 Virtual environments and

Model Reduction Methods for Vector Autoregressive Processes Ralf Brüggemann, 2012-09-25 1 1 Objective of the Study Vector autoregressive VAR models have become one of the dominant research tools in the analysis of macroeconomic time series during the last two decades The great success of this modeling class started with Sims 1980 critique of the traditional simultaneous equation models SEM Sims criticized the use of too many incredible restrictions based on supposed a priori knowledge in large scale macroeconometric models which were popular at that time Therefore he advocated largely unrestricted reduced form multivariate time series models unrestricted VAR models in particular Ever since his influential paper these models have been employed extensively to characterize the underlying dynamics in systems of time series In particular tools to summarize the dynamic interaction between the system variables such as impulse response analysis or forecast error variance decompositions have been developed over the years The econometrics of VAR models and related quantities is now well established and has found its way into various textbooks including inter alia Lütkepohl 1991 Hamilton 1994 Enders 1995 Hendry 1995 and Greene 2002 The unrestricted VAR model provides a general and very flexible framework that proved to be useful to summarize the data characteristics of economic time series Unfortunately the flexibility of these models causes severe problems In an unrestricted VAR model each variable is expressed as a linear function of lagged values of itself and all other variables in the system

Handbook of Research on Software Quality Innovation in Interactive Systems Cipolla-Ficarra, Francisco Vicente, 2021-03-19 The inclusion of experts in communicability in the software industry has allowed timeframes to speed up in the commercialization of new technological products worldwide However this constant evolution of software in the face of the hardware revolution opens up a host of new horizons to maintain and increase the quality of the interactive systems following a set of standardized norms and rules for the production of interactive software Currently we see some efforts towards this goal but they are still partial solutions incomplete and flawed from the theoretical as well as practical points of view If the quality of the interactive design is analyzed it is left to professionals to generate systems that are efficient reliable user friendly and cutting edge The Handbook of Research on Software Quality Innovation in Interactive Systems analyzes the quality of the software applied to the interactive systems and considers the constant advances in the software industry This book reviews the past and present of information and communication technologies with a projection towards the future along with analyses of software software design phrases to use and the purposes for software applications in interactive systems This book is ideal for students professors researchers programmers analysts of systems computer engineers interactive designers managers of software

quality and evaluators of interactive systems

Defense Innovation Handbook Adedeji B. Badiru, Cassie

Barlow, 2018-09-03 Innovation is the lifeline of national development This handbook is a collection of chapters that provide techniques and methodologies for achieving the transfer of defense targeted science and technology development for general industrial applications The handbook shows how to translate theory and ideas into practical applications Experts from national defense institutions government laboratories business and industry contributed chapters to this handbook The handbook also serves as an archival guide for nations communities and businesses expecting to embark upon science and technology transfer to industry Included are several domestic and international case examples of practical innovation Since the dawn of history nations have engrossed themselves in developing new tools techniques and methodologies to protect their geographical boundaries From the crude implements used by prehistorical people to very modern technologies the end game has been the same That is to protect the homeland Even in times of peace efforts must be made to develop new machinery equipment processes and devices targeted for the protection of the nation The emergence of organized nations and structured communities facilitated even more innovative techniques of national defense Evolution revolution and innovation have defined human existence for millennia From the Ice Age to the Stone Age the Bronze Age the Iron Age and to the modern age innovation rudimentary as it may be in many cases has determined how humans move from one stage to the next This comprehensive handbook provides a clear guide on the nuances of initiating and actualizing innovation Both the qualitative and quantitative aspects of innovation are covered in the handbook Features Uses a systems framework to zero in on science and technology transfer Focuses on leveraging technical developments in defense organizations for general societal applications Coalesces the transfer strategies collated from various sources and practical applications Represents a world class diverse collection of science and technology development utilization and transfer Highlights a strategy for government academia and industry partnerships
