## **Paideia Proposal:**

Paideia Proposal Mortimer J. Adler, 1998-10-01 The Paideia Proposal is a system of liberal education intended for all children. It was a response to what Adler characterized as the United States antidemocratic or undemocratic educational system, a holdover from the 19th century when the understanding of basic human rights fell short of 20th century expectations. The Paideia Proposal was based upon the following assumptions: 1 All children are educable; 2 Education is never completed in school or higher institutions of learning but is a lifelong process of maturity for all citizens; 3 The primary cause of learning is the activity of the child's mind which is not created by but only assisted by the teacher; 4 Multiple types of learning and teaching must be utilized in education, not just teacher lecturing or telling; and 5 A student's preparation for earning a living is not the primary objective of schooling. Adler stressed that the proposal is much more than just a return to the basic skills of reading, writing, and arithmetic. It is not simply a return to the values of classical civilization but a return to what is of enduring value. It is a democratic proposal intended for the education of all and not an elitist program as some have alleged.

Paideia Program Mortimer J. Adler, 2010-06-15 Paideia is a holistic approach to life-long learning with roots in ancient Greece. The Paideia Program is based on the belief that the human species is defined by its capacity and desire for learning. The program itself argues for a public education that is at once more rigorous and more accessible.

Paideia Problems and Possibilities Mortimer Jerome Adler, 1983 Education: Ends and Means Julius A. Sigler, 1997 In American society, the ends and means of education have been debated vigorously throughout its history. Most Americans enthusiastically and eagerly supported the development of public education in the mid 19th century. They perceived it to be a positive force for mobility and democracy. While some complained that too much Obook learning was a waste of time, most Americans were delighted with the developments of the American educational system which appeared to be a foundation for our political system.

**The Educated Person** Donal G. Mulcahy, 2008 Liberal education has long been a fascination for scholars in a variety of disciplines and is closely associated with the idea of the educated person. Seen at one time as a matter for colleges and universities, over the years it has become central to the debate surrounding general education in high school and even the earlier grades. Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct. In what way might it speak helpfully to educational challenges we face today? In what ways does it still speak helpfully to educational challenges we face today? In what ways might it be a guide as we search for a better way forward? These are the central questions that are addressed in this book. In doing so, the positions of three theorists—John Henry Newman, Mortimer J. Adler, and Jane Roland Martin—who have written about liberal education in a compelling way and from different perspectives are selected for close analysis. The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education.
