Adverbs and Modality in English Leo Hoyer,2014-06-03 This new study on modality in English represents a departure from more traditional approaches to the subject where the modal auxiliaries have been the usual focus of attention by examining in detail the nature of their association with different categories of modal adverb Modality is notoriously complex but the present work offers an accessible introduction to the topic a comprehensive account of modal adverb co occurrence and a reappraisal of the English modal system The descriptive framework draws fresh insights from syntactic semantic and pragmatic approaches to the study of language and communication and from recent work in corpus linguistics The book includes contrastive reference to the expression of modality in Spanish and a discussion of modality in such applied contexts as language teaching A major feature is its reliance on authentic spoken and written language data The study is suitable for undergraduate and postgraduate students of linguistics English language communications studies and related disciplines

Metaphor from the Ground Up Daniel C. Strack,2019-02-20 Metaphor from the Ground Up introduces Conceptual Filtering Theory a theory of mental processing that describes figurative language communication in terms of conceptual domain projection and contextual disambiguation In an attempt to match theoretical observations from cognitive semantics and pragmatics with related knowledge about mental processes from cognitive neuroscience CFT first examines the distributed nature of conceptualization and then uses this background information to explain metonymic binding and metaphoric mapping Once the perceptual origins of metonymy and metaphor have been demonstrated CFT offers a detailed account of how salient aspects of conceptualization differentially combine to achieve predictable inferencing results in linguistic communication In addition CFT characterizes the role of contextual effects in pruning salient inferencing options and demonstrates how situational frames can be manipulated to guide semantic outcomes The book as a whole will assert that figurative language processing cannot be characterized in terms of a generically constituted base system that receives inputs and spits out predictable results according to logical probability in a situational vacuum Rather it is a dynamic context sensitive process that continually reweights the underlying system so as to rapidly select situation relevant lines of inferencing from among a variety of salient inferencing options

Interfaces with English Aspect Debra Ziegeler,2006-01-01 The field of verbal aspect has been a focus for the derivation of a multiplicity of theoretical approaches ranging over decades of linguistic research From the point of view of recent studies though there has been relatively little emphasis on the nature of the interaction of aspect with other categories and the ways in which our knowledge of aspect acts as a primary semantic contributor to the creation of other basic verbal parameters such as tense and modality This book aims to cross some of the categorial borders using a collection of studies on the interfaces of English

aspect with other grammatical domains The studies in the book have been assembled in order to answer two central issues surrounding the nature of English aspect the possibility of the historical co existence of a perfective and imperfective grammatical distinction in English and the derivation of modality as an inference arising out of specific conflicts and combinations of lexical and grammatical aspect In answering these questions a data driven rather than a theory driven approach is favoured and the general principles of Gricean pragmatics and grammaticalisation are applied to a wide range of empirical sources to propose alternative explanations to some long established problems of English historical linguistics and semantics

Adjectives in Germanic and Romance Petra Sleeman,Freek Van de Velde,Harry Perridon,2014-02-15 Although the Germanic and Romance languages are two branches of the same language family and although both have developed the adjective as a separate syntactic and morphological category the syntax morphology and interpretation of adjectives is by no means the same in these two language groups and there is even variation within each of the language groups One of the main aims of this volume is to map the differences and similarities in syntactic behavior morphology and meaning of the Germanic and Romance adjective and to find an answer to the following question Are the dissimilarities the result of autonomous developments in each of the two branches of the Indo European language family or are they caused by language contact

Tense in English Renaat Declerck,2015-07-03 First published in 1991 this book looks at tense in English one of the most controversial areas of grammar Prior to the book's original publication the problems and interest in the subject had led to an impressive number of books and articles Yet despite the amount of work produced nothing approaching a consensus had emerged merely a series of conflicting theories and analyses Here Renaat Declerck provides a framework for a theoretical instrument which will enable the linguist to interpret the data correctly The book is primarily theoretical in nature but offers descriptive theory and a discussion of the various tenses which will make it a valuable tool for those teaching English Theoretical and applied linguists will find this an important contribution to the debate on tense and a worthy starting point for future research The book is not written from the viewpoint of any particular linguistic theory and does not presuppose any knowledge of tense theory it is a readable and reliable guide to the area

Middle and Modern English Corpus Linguistics Manfred Markus,Yoko Iyeiri,Reinhard Heuberger,2012 This book brings together a variety of approaches to English corpus linguistics and shows how corpus methodologies can contribute to the linking of diachronic and synchronic studies The articles in this volume investigate historical changes in the English language as well as specific aspects of Middle and Modern English and moreover of English dialects The contributions also discuss the development of English corpus linguistics generally and its potential in the future Special focus is given to the continuity between Middle and Modern English much in line with the linking in previous studies of Middle English and Old English under the generic term medievalism This volume highlights the continual development of

English from the medieval to modern period Text, Time, and Context Richard P. Meier, Helen Aristar-Dry, Emilie Destruel, 2009-10-20

Carlota S Smith was a key figure in linguistic research and a pioneering woman in generative linguistics. This selection of papers focuses on the research into tense aspect and discourse that Smith completed while Professor of Linguistics at the University of Texas at Austin. Smith's early work in English syntax is still cited today and her early career also yielded key research on language acquisition by young children. Starting in the mid 1970s after her move to UT she embarked on her most important line of research. In numerous papers the first of which was published in 1975 and in a very important 1991 book *The Parameter of Aspect* Smith analyzed how languages encode time and how they encode the ways events and situations occur over time. Smith's work on the expression of time in language is notable because of its careful analyses of a number of quite different languages including not only English and French but also Russian, Mandarin, and Navajo. Inspired by a year in France in the early 1970s, Smith began to analyze the differing ways in which languages encode time and how they encode the ways events and situations occur over time. In doing so she developed her signature two component theory of aspect. This model of temporal aspect provided an excellent framework for graduate students seeking to analyze the temporal systems of an array of languages including underdescribed languages that are so much the focus of research in UT's Linguistics Department. Selected by Carlota Smith herself and by her longtime friends and colleagues, this book contains her 1980 piece on temporal structures in discourse, her 1986 comparison of the English and French aspectual systems, a 1996 paper on the aspect system in Navajo, an increasingly endangered language which Smith worked to preserve, and her 1980 and 1993 papers on the child's acquisition of tense and aspect. Smith, who died in 2007, was a trailblazer in her field whose broad interests fed into her scholarly research. She was an avid reader who sought to bring the analytic tools of linguistics to the humanistic study of literature by examining the syntactic and pragmatic principles which underlie literary effects. Her research on rhetorical and temporal effects in context was integrated into her last book *Modes of Discourse* (2003). The current volume of articles covers much of her most fruitful work on the way in which language is used to express time and will be essential reading for many working and studying in linguistics generally and in semantics particularly.

Transatlantic Perspectives on Late Modern English Marina Dossena, 2015-02-15

The volume presents an innovative approach to studies in Late Modern English by giving attention to variation and change in varieties of English on both sides of the Atlantic. As new corpora become available, scholarly interests broaden their horizons to encompass varieties the history of which has only just begun to be investigated and which are likely to yield significant findings. The contributors, whose long experience in the field of English historical linguistics ensures in-depth investigations, employ state-of-the-art tools for the analysis of specific phenomena and to set these in the light of a more encompassing framework concerning different text types and sociolinguistic considerations. While usage guides and dictionaries prove remarkable in their contribution to the definition of what is not acceptable in specific social circles, the language of ordinary users also takes centre stage in studies

of correspondence journals and travelogues The volume is expected to appeal to scholars and students interested in the linguistic history of English as seen in contexts on which until now relatively little light has been shed Forum ,1986
