Embracing the Other Pearl Oliner, Samuel P. Oliner, Lawrence Baron, Lawrence Blum, 1995-07 All but buried for most of the twentieth century the concept of altruism has re emerged in this last quarter as a focus of intense scholarly inquiry and general public interest In the wake of increased consciousness of the human potential for destructiveness both scholars and the general public are seeking interventions which will not only inhibit the process but may in fact chart a new creative path toward a global community Largely initiated by a group of pioneering social psychologists early questions on altruism centered on its motivation and development primarily in the context of contrived laboratory experiments Although publications on the topic have been considerable over the last several years and now represent the work of representatives from many disciplines of inquiry this volume is distinguished from others in several ways Embracing the Other emerged primarily as a response to recent research on an extraordinary manifestation of real life altruism namely to recent studies of non Jewish rescuers of Jews during World War II It is the work of a multi disciplinary and international group of scholars including philosophers social psychologists historians sociologists and educators challenging several prevailing conceptual definitions and motivational sources of altruism The book combines both new empirical and historical research as well as theoretical and philosophical approaches and includes a lengthy section addressing the practical implications of current thinking on altruism for society at large The result is a multi textured work addressing critical issues in varied disciplines while centered on shared themes

Learning to Live Together David A. Hamburg M.D., Beatrix A. Hamburg M.D., 2004-04-08 With a view to deepening our understanding of sources of hatred and prejudice this book uses a developmental and evolutionary perspective to explore and explain the process by

which our beliefs are conveyed to the youngest members of society. Discussing the psychological obstacles to peaceful relations between groups, the authors focus on the developmental processes by which we can work to diminish ethnocentrism, prejudice, and hatred which children learn from a very early age. Until now, scholarship and practice in international relations have gravely neglected crucial psychological aspects of these terrible problems and have not yet explored the educational opportunities related to them. Addressing these promising lines of inquiry and innovation, this book fosters a more humane and less violent development in childhood and adolescence. Educators, religious leaders, developmental and social psychologists will find this a valuable resource, as will a socially concerned segment of the public who are looking for practical ways to work for peace.

Encyclopedia of Adolescence Roger J.R. Levesque, 2014-07-08. The Encyclopedia of Adolescence breaks new ground as an important central resource for the study of adolescence. Comprehensive in breadth and textbook in depth, the Encyclopedia of Adolescence, with entries presented in easy-to-access A to Z format, serves as a reference repository of knowledge in the field as well as a frequently updated conduit of new knowledge long before such information trickles down from research to standard textbooks. By making full use of Springer's print and online flexibility, the Encyclopedia is at the forefront of efforts to advance the field by pushing and creating new boundaries and areas of study that further our understanding of adolescents and their place in society. Substantively, the Encyclopedia draws from four major areas of research relating to adolescence. The first broad area includes research relating to Self Identity and Development in Adolescence. This area covers research relating to identity from early adolescence through emerging adulthood, basic aspects of development, e.g., biological, cognitive, social, and foundational developmental theories. In addition, this area focuses on various types of identity: gender, sexual, civic, moral, political, racial, spiritual, religious, and so forth. The second broad area centers on Adolescents' Social and Personal Relationships. This area of research examines the nature and influence of a variety of important relationships, including family, peer, friends, sexual, and romantic, as well as significant nonparental adults. The third area examines Adolescents in Social Institutions. This area of research centers on the influence and nature of important institutions that serve as the socializing contexts for adolescents. These major institutions include schools, religious groups, justice systems, medical fields, cultural contexts, media, legal systems, economic structures, and youth organizations. Adolescent Mental Health constitutes the last major area of research. This broad area of research focuses on the wide variety of human thoughts, actions, and behaviors relating to mental health, from psychopathology to thriving. Major topic examples include deviance, violence, crime, pathology, DSM normalcy, risk, victimization, disabilities, flow, and positive youth development.
