*Just Trade* Berta Esperanza Hernández-Truyol, Stephen Joseph Powell, 2009 In the mid 1940s once the full impact of World War II was assessed the world witnessed major legal developments in both modern trade and human rights Since then volumes have been written about modern trade law and human rights law has seen an equal amount of attention While these topics constitute two of the most active spheres in international law follow similar intellectual trajectories and often feature

the same key actors and arenas neither field has actively engaged with the other They co exist in relative isolation at best peppered by occasional hostile debates It has come to be a given that pro trade laws are not good for human rights and legislation that protects human rights hampers vibrant international trade In a bold departure from this canon Just Trade makes a case for reaching a middle ground between these two fields acknowledging their co existence and the significant points at which they overlap Using actual examples from many of the thirty five nations of the Western Hemisphere the authors one a human rights scholar and the other specializing in trade law carefully combine their expertise to examine human rights policies involving conscripted child labor sustainable development promotion of health equality of women human trafficking indigenous peoples poverty citizenship and economic sanctions never overlooking the very real human rights problems that arise from international trade However instead of viewing the two kinds of law as isolated polar and sometimes hostile opposites Berta Esperanza Hernandez Truyol and Stephen J Powell make powerful suggestions for how these intersections may be navigated to promote an international marketplace that embraces both liberal trade and liberal protection of human rights
