Protecting Participants And Facilitating Social And Behavioral Sciences Research:

Protecting Participants and Facilitating Social and Behavioral Sciences Research National Research Council, Division on Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on National Statistics, Panel on Institutional Review Boards, Surveys, and Social Science Research, 2003-07-26 Institutional review boards IRBs are the linchpins of the protection systems that govern human participation in research. In recent years high profile cases have focused attention on the weaknesses of the procedures for protecting participants in medical research. The issues surrounding participants protection in the social behavioral and economic sciences may be less visible to the public eye but they are no less important in ensuring ethical and responsible research. This report examines three key issues related to human participation in social behavioral and economic sciences research: 1 obtaining informed voluntary consent from prospective participants, 2 guaranteeing the confidentiality of information collected from participants which is a particularly challenging problem in social sciences research, and 3 using appropriate review procedures for minimal risk research. Protecting Participants and Facilitating Social and Behavioral Sciences Research will be important to policy makers, research administrators, research sponsors, IRB members, and investigators. More generally it contains important information for all who want to ensure the best protection for participants and researchers alike in the social behavioral and economic sciences.

Encouraging a critical approach in each chapter, this 4th edition includes enhanced coverage of internet sampling, mixed methods, conversation analysis, and feminist research. *Ethics and Values in Industrial-Organizational Psychology* Joel Lefkowitz, 2017-03-03 *Ethics and Values in Industrial-Organizational Psychology* was one of the first books to integrate work from moral philosophy, moral psychology, I/O psychology, and political and social economy as well as business. The second edition has added a chapter on Virtue Theory including its application in I/O, Organizational behavior, OB, and business, expands Moral Psychology to two chapters with more attention to moral emotions, effects of the dark side of personality, and the intuitionist model of moral judgment, expands the sections on social and economic justice, and expands the treatment of the Responsible Conduct of Research with a new chapter on Research Integrity. Examples from I/O research and practice as well as current business events are offered throughout. It is ideal for ethics and I/O courses at the graduate level. *Financial Cryptography and Data Security* George Danezis, Sven Dietrich, Kazuo Sako, 2012-05-10 This book contains the revised selected papers of the Second Workshop on Real Life Cryptographic Protocols and Standardization RLCPS 2011 and the Second Workshop on Ethics in Computer Security Research WECSR 2011 held in conjunction with the 15th International Conference on Financial Cryptography and Data Security FC 2010 in Rodney Bay, St. Lucia, in February-March 2011. Ethical Imperialism Zachary M. Schrag, 2010-09-01 A powerful indictment of the IRB regime University researchers in the United States seeking

to observe survey or interview people are required first to complete ethical training courses and to submit their proposals to an institutional review board IRB Under current rules IRBs have the power to deny funding degrees or promotion if their recommended modifications to scholars proposals are not followed This volume explains how this system of regulation arose and discusses its chilling effects on research in the social sciences and humanities Zachary M Schrag draws on original research and interviews with the key shapers of the institutional review board regime to raise important points about the effect of the IRB process on scholarship He explores the origins and the application of these regulations and analyzes how the rules initially crafted to protect the health and privacy of the human subjects of medical experiments can limit even casual scholarly interactions such as a humanist interviewing a poet about his or her writing In assessing the issue Schrag argues that biomedical researchers and bioethicists repeatedly excluded social scientists from rule making and ignored the existing ethical traditions in nonmedical fields Ultimately he contends IRBs not only threaten to polarize medical and social scientists they also create an atmosphere wherein certain types of academics can impede and even silence others The first work to document the troubled emergence of today s system of regulating scholarly research Ethical Imperialism illuminates the problems caused by simple universal rule making in academic and professional research This short smart analysis will engage scholars across academia
