Navigating the Spectrum: My Vision for Inclusive and Exclusive Education in India KHRITISH SWARGIARY, 2025-06-01 The journey of crafting this book Navigating the Spectrum My Vision for Inclusive and Exclusive Education in India has been a profoundly reflective and insightful endeavor for me As an observer an analyst and a deeply concerned individual I have long grappled with the dual realities that define our nation s educational landscape the immense aspirations for universal access to quality education juxtaposed with the persistent often invisible barriers that exclude countless children from realizing their full potential My motivation for writing this book stems from a firm conviction that education is the bedrock of a progressive society and a truly inclusive educational

system is not merely an ideal but an urgent necessity for India's equitable development. In these pages I invite you to join me in a critical examination of how inclusive and exclusive practices manifest within the Indian educational context. I have meticulously researched and analyzed the historical trajectory, the policy frameworks that have been painstakingly developed and the formidable challenges that continue to impede the realization of true inclusion. It has been my constant endeavor to root this analysis in verified facts and academic rigor, ensuring that my perspectives are informed by a strong foundation of evidence. I have also striven to present these complex issues with clarity and depth, aiming to provide a comprehensive resource for policymakers, educators, researchers, parents, and anyone invested in the future of Indian education. This book is more than an academic exercise; it is my earnest attempt to contribute to the ongoing dialogue, to challenge existing paradigms, and to propose actionable pathways towards a more just, equitable, and ultimately more compassionate educational system for every child in our diverse nation. My hope is that by dissecting the intricacies of this subject, we can collectively move closer to a reality where every classroom in India truly embraces and celebrates the unique potential of every learner.

Khritish Swargiary 2025 Media and Its Role in Protecting the Rights of Children in Africa Oyero, Olusola, 2019-10-18
Many international and national charters and declarations have sought to define and protect the rights of children and ensure their safety. Although many African countries subscribe to these international conventions and charters, rights violations against children have not diminished, and negative actions against children are still carried out daily. Though the media have been charged with the responsibility of active involvement in protecting the interest of the child, it is important to examine how well they have fared in the performance of this duty and the challenges that occur in the process, as well as to identify future pathways to ensure that the media succeeds in this assignment. Media and Its Role in Protecting the Rights of Children in Africa is an essential research publication that examines media roles, challenges, theories, and strategies to ensuring the realization of the rights of children. Featuring a range of topics such as cyber ethics, media studies, and sustainable development, this book is essential for reporters, journalists, newscasters, broadcasters, communication specialists, government officials, activists, humanitarians, sociologists, psychologists, social workers, professionals, researchers, non-governmental organizations, policymakers, academicians, and students. **Child Protection in England, 1960-2000**

Jennifer Crane, 2018-09-25. This book is open access under a CC BY 4.0 license. This open access book explores how children, parents, and survivors reshaped the politics of child protection in late twentieth-century England. Activism by these groups often manifested in small voluntary organisations, drew upon and constructed an expertise grounded in experience and emotion that supported, challenged, and subverted medical, social work, legal, and political authority. New forms of experiential and emotional expertise were manifested in politics through consultation, voting, and lobbying, but also in the reshaping of everyday life and in new partnerships formed between voluntary spokespeople and media. While becoming subjects of and agents in child protection politics over the late twentieth century, children, parents, and survivors also faced barriers to

enacting change and the book traces how long standing structural hierarchies particularly around gender and age mediated and inhibited the realisation of experiential and emotional expertise **Child Sponsorship** B.
