Proteins Of The Placenta:

Proteins of the Placenta P. Bischof, A. Klopfer, 1985-07-11 *Proteins of the Placenta* Paul Bischof, Arnold Klopfer, 1985
The Immunological Reactions of the Proteins of the Human Placenta with Special Reference to the Production of a Therapeutic Serum for Malignant Chorion-epithelioma ... Gleason Chandler Lake, 1914 **Maternal, Fetal, & Neonatal Physiology** Susan Tucker Blackburn, 2007 No further information has been provided for this title **Placental Proteins** P. Bischof, 1984-08-06 **Proteins, Peptides and Amino Acids SourceBook** John Stephen White, Dorothy Chong White, 2002-04-15 Proteins Peptides and Amino Acids SourceBook is the second in a series of reference books conceived to cover the explosive growth in commercially available biological reagents The success of our first reference work Source Book of Enzymes published in 1997 encouraged us to continue this series Choosing proteins peptides and amino acids as the subject matter for the second volume was simple given their preeminence in regulating biochemical processes and their importance to modern molecular biology The SourceBook series was inspired by our difficulty in locating a suitable replacement for a depleted reagent in the midst of an urgent research project To our dismay we found the reagent supplier out of business and the product line no longer available Other reagent catalogs on our library bookshelf offered a narrow selection and incomplete functional information We were ultimately able to locate a satisfactory alternative only by making countless inquiries and paging through innumerable product catalogs and technical data sheets We needed but could not find a single resource that cataloged available compounds organized them in a logical and accessible format provided critical technical information to distinguish one from another and told us where we could buy them Placental Proteins A. Klopfer, T. Chard, 2012-12-06 In July 1978 a group met in Aberdeen to discuss the whole range of new proteins recently isolated from the human placenta With the exception of Yuri Tatarinov all the main pioneers in the field were present and this book arose from the discussions which took place Each author was asked to bring a written manuscript corresponding to but not necessarily identical with their verbal presentation Nobody was given a specified remit for the reason that the subject is so new that it would be impossible to design the meeting or the book in advance Each speaker was left free to put on display whatever he thought was interesting or important about the newly isolated proteins Inevitably this has led to much overlap since everybody tends to follow the same path at first Nevertheless we shall probably never achieve so much agreement again Only Vernon Stevens was set a fixed title outside the immediate field of new placental proteins This arose from the very exciting possibility that the new proteins could be used to induce an autoimmune state to products of conception and thus serve as the basis for a new method of contraception There are few findings at present which bear specifically on this proposal but the experience of Vernon Stevens with hCG could serve as a model of the problems that might be encountered with SP and PAPP A **Cellular Proteins and Their Fatty Acids in Health and Disease** Asim K. Duttaroy, Friedrich Spener, 2006-03-06 In light of the increasing importance of these proteins and their ligands for our understanding of cellular

growth differentiation and development as well as of diseases such as obesity insulin resistance atherosclerosis cancer and inflammation a team of internationally renowned editors and authors have compiled here the very first comprehensive book on these topics They describe fatty acid activated transcription factors as well as membrane and soluble fatty acid transporters covering such aspects as structure and function lipid protein interaction delivery of ligands and the roles of these proteins in gene expression pertaining to the homeostatic and diseased states of cells and organs Incorporating recent findings this is indispensable for basic scientists health professionals in industry and clinics as well as postgraduate students Contributors among others N A Abumrad J E Schaffer G Schmitz N J Brunskill J Storch U Seedorf S Mandrup C N A Palmer T Perlmann H I Nebb J Bar Tana H Kondo C Wolfrum C Kerkhoff S Farmer E J Murphy J F C Glatz P Besnard J M Stewart A Meirhaeghe J Plutzky W Wahli R A Roberts

Calcium and Calcium Binding Proteins Charles Gerday, L. Bolis, R. Gilles, 2012-12-06 The idea of Professors Bolis and Gilles to gather together for a 3 days meeting in the splendid environment of Crans Montana in Switzerland a limited number of people around the subject of calcium and calcium binding proteins seemed at first particularly attractive and when they asked me to take charge of the scientific organization of the symposium I accepted with enthusiasm It rapidly became clear that the major problem would be the selection of the topics since it was impossible to cover completely and in depth such a broad and dynamic area of research In our view one imperative was to associate as intimately as possible the structural and the functional aspects of the areas covered Apart from one whole day focused on the fascinating roles played by calmodulin in cellular activities the other sessions were devoted to calmodulin related calcium binding proteins in muscle and non muscle tissues and to some selected biological

systems such as mitochondria secretory cells or sarcoplasmic reticulum in which calcium also plays a crucial role The presentations were made by leading investigators in their field Some of them do not however appear in the present volume for which there are two reasons first some of the contributions were somewhat outside the scope of the book second three speakers for valid reasons simply found no opportunity to write a manuscript in the allotted time
