now approached on the first person basis of a phenomenological understanding of subjective experience In such approaches phenomena like incorporation phantasy emotion and the unconscious are discussed afresh These topics important for modern phenomenology as well as for psychoanalysis are examined in the context of the constitution of the human person as well as of our intersubjective world The analyses are also interdisciplinary making use of connections with modern medicine psychiatry and psychotherapy The systematic investigations are enriched by historical analysis and research in the internal development of the disciplines involved The volume presents recent work of internationally recognized researchers phenomenologically oriented philosophers psychoanalysts and psychotherapists who work in the common field of the two disciplines The editors hope that this selection will encourage further systematic collaboration between phenomenology and psychoanalysis
