Protoliterary Steps Toward An Anthropology Of Culture:

The Protoliterary Karl Ludwig Pfeiffer, 2002 This is a broad ranging and ambitious attempt to rethink aesthetic and literary studies in terms of an anthropology of symbolic media generally Central to the author's argument is the proposition that the idea of literature at least as it has been understood in the West since the eighteenth century as the paradigm for artistic experience is both limited and limiting In its place the author offers a more general theory of aesthetic experience appropriate to a wide range of media in the term's broadest sense and geared toward performativity and bodily experience The author develops the idea of the protoliterary as a cultural aesthetic discourse prior to and external to the literary as traditionally conceived in Western aesthetics Manifestations of the protoliterary tend to occur within forms of multimedia theatricalization in which suggestive images of the body loom large The appeal of the protoliterary lies in its ability to function on both cognitive and somatic levels thereby neutralizing such distinctions as self society and reality fiction The author's argument is indebted to John Dewey's belief in a basic human need for aesthetic experience a need that can be met in a variety of ways from tattoos and scarification through sports parades and cosmetics to literature opera and film From this basis the book theorizes a history of the development of separate hierarchical arts in the West while suggesting that independent histories of single arts and artistic experience are no longer desirable or even possible Although the genesis of particular forms of media are inextricably linked to specific historical sociological and technological conditions their potential functions and effects are not tied to those conditions nor should they be

Travelling Concepts for the Study of Culture

Birgit Neumann, Ansgar Nünning, 2012-10-01 Bringing together innovative and internationally renowned experts this volume provides concise presentations of the main concepts and cutting edge research fields in the study of culture rather than the infinite multitude of possible themes More specifically the volume outlines different models for the study of culture explores avenues for interdisciplinary exchange assesses key concepts and traces their travels across various disciplinary historical and national contexts To trace the travelling of concepts means to map both their transfer from one discipline approach or culture of research to another and also to identify the transformations which emerge through these processes of transfer The volume serves to show that working with travelling concepts provides a unique strategy for research and research design which can open up a wide range of promising perspectives for interdisciplinary exchange It offers an exemplary overview of an interdisciplinary and international approach to the travelling concepts that organize structure and shape the study of culture In doing so the volume serves to initiate a dialogue that exceeds disciplinary and national boundaries and introduces a self reflexive dimension to the field thus affording a recognition of how deeply disciplinary premises and nation specific research traditions affect different approaches in the study of culture

From Chaos to Catastrophe? K. Ludwig Pfeiffer, 2018-03-19 This book focuses on the tensions between processes of consciousness and their products like worldviews theories models of thought etc Staying close to their technical meanings in chaos and catastrophe theory chaotic processes are described in mainly neurobiological and evolutionary terms while products are delineated in their evolutionary logic Given both a relative opacity of processes of the mind and of the outside world the dramatic quality of the processes a certain closeness to hysterical and schizophrenic tendencies and within the context of the weakening orientating power of worldviews an alarming catastrophic potential emerge As a consequence the book aims at a comparative cost benefit analysis of the transitionality between chaotic processes of consciousness and the often catastrophic implications of their products within historical frameworks The central thesis consists in the increasing failure in the orientation of action which cannot be contained by systems of ethics Materials for this analysis are mainly drawn from texts normally called literary in which the tension between biographical and historical dimensions provides profiles of chaos and catastrophe

A Short Media History of English Literature Ingo Berensmeyer, 2022-08-01 This book explores the history of literature as a history of changing media and modes of communication from manuscript to print from the codex to the computer and from paper to digital platforms It argues that literature has evolved and continues to evolve in sync with material forms and formats that engage our senses in multiple ways Because literary experiences are embedded in and enabled by media the book focuses on literature as a changing combination of material and immaterial features The principal agents of this history are no longer genres authors and texts but configurations of media and technologies In telling the story of these combinations from prehistory to the present Ingo Berensmeyer distinguishes between three successive dominants of media usage that have

shaped literary history performance representation and connection Using English literature as a test case for a long view of media history this book combines an unusual bird s eye view across periods with illuminating readings of key texts It will prove an invaluable resource for teaching and for independent study in English or comparative literature and media studies

Where is Language? Ruth Finnegan,2020-06-11 Language is central to human experience and our understanding of who we are whether written or unwritten sung or spoken But what is language and how do we record it Where does it reside Does it exist and evolve within written sources in performance in the mind or in speech For too long ethnographic aesthetic and sociolinguistic studies of language have remained apart from analyses emerging from traditions such as literature and performance Where is Language argues for a more complex and contextualized understanding of language across this range of disciplines engaging with key issues including orality literacy narrative ideology performance and the human communities in which these take place Eminent anthropologist Ruth Finnegan draws together a lifetime of ethnographic case studies reading and personal commentary to explore the roles and nature of language in cultures across the world from West Africa to the South Pacific By combining research and reflections Finnegan discusses the multi modality of language to provide an account not simply of vocabulary and grammar but one which questions the importance of cultural settings and the essence of human communication itself *Partial Answers* ,2005

Words and Images on the Screen Ágnes Pethő,2009-03-26 The screen has never been merely a canvas for the images to be displayed but also to quote Jean Luc Godard a blank page a surface for inscriptions and a stage for all kinds of linguistic occurrences be their audible or visual Word did not come into the world of cinema at the time of the talkies but has been a primordial medial companion that has shaped the cinematic experience from its very beginnings This volume offers a collection of essays that question the role of words and images in the context of moving pictures covering a wide area of their interconnectedness How can we analyse literary adaptations What is the role of adaptations in the evolution of specific national cinemas In what way are written texts used in films Is the model of the word and image relations used in silent films still applicable today What major paradigms can be discerned within the multiplicity of ways Jean Luc Godard s cinema plays with words and images Are these models of modernist or postmodern cinema reflected in films of other directors like R W Fassbinder How do avant garde works deal with the word and image debate What are the connections of animation or computer games with verbal text and narrative What is the phenomenon of jet setting and how does it connect to the ideological implications of the relations between the culture of books and films What happens when Hamlet is completely rewritten reflecting the ideology of late capitalism What happens from the point of view of literariness or rejection of literariness when films are made vehicles of national propaganda How do words get mediated through images These are some of the questions addressed in the present volume by in depth case studies of cinematic intermediality or more general surveys regarding cinema s long lasting liaisons with language or literature Ethnic Ventriloquism Mita Banerjee,2008 To read the foundational texts of the American Renaissance as well

as other canonical nineteenth century texts as instances of literary minstrelsy may at first seem counterintuitive not only in the apparent confounding of popular and literary cultures but also in the relative significance such a reading would accord to the ethnic difference portrayed in these narratives Yet such a reversal of perspective is precisely what this book suggests Are the strolling Indian in Thoreau's *Walden* the Native physician in *The Scarlet Letter* or the unkempt Mexican girl in Kate Chopin's *The Awakening* really only incidental to these literary narratives Proposing the concept of ethnic ventriloquism this study argues that the commitment of nineteenth century America to democratic self renewal may be much more indebted to ethnic sources than it would at first appear America's pledge to democracy may in fact be an instance of a white subject speaking in an ethnic voice a literary instance of brownface redface yellowface or blackface The aim of this re-reading of nineteenth century American literature is to recover the referent of such ethnic ventriloquism to imagine the moment where the real owner of the ethnic voice appears alongside the white ventriloquist to contemplate the logic of national self definition of which he may not only be the source but in a reversal of roles between ventriloquist and ventriloquist's dummy the mastermind

Moving Images, Mobile Viewers Renate Brosch, 2011 Vision and movement seem to have shifted center stage in modes of experience in the last century as a result of their joint effect slow contemplative gazes at static images seem to be increasingly displaced by distracted vernacular ways of seeing Looking out of the window of a speeding car receiving photographs of Earth from outer space watching the flickering images of the TV screen scrolling through a text zooming in on a location in Google Earth or sending images via mobile phones or webcams all these are unique visual experiences that were impossible before various inventions in the 20th century originated completely new kinds of movement The double meaning of moving images is meant to signal the specificity of motion to these images and at the same time to express the emotional power of those visual images which are able to transcend the constant stream of images in contemporary perception Series Kultur und Technik Schriftenreihe des Internationalen Zentrums für Kultur und Technikforschung der Universität Stuttgart Vol 20 *Annual Report on English and American Studies*, 2002 **Oral Tradition**, 2005
