Russia is the first book to trace the significance of education in Russia from Peter the Great's reign all the way through to Vladimir Putin and the present day Individual chapters open with an overview of the political social diplomatic and cultural environment of the period in order to orient the reader Dowler then goes on to analyse the aims of education initiatives in each era before considering the ways in which Russians experienced education both as students and as teachers Each

chapter concludes with an assessment of the outcomes and consequences of education policies in the period both the successes and failures as well as the impact of education on the cultural social economic and ultimately political environments The chronologically arranged book also traces and then summarises underlying key themes like the tension between an open system of education and an estate based system the push and pull between utility and the broader goal of human development and the effects of centralized authoritarian control that for much of the period limited local initiative and starved the regions of adequate resources Hindu Nationalism, History and Identity in India Lars Tore Flåten,2016-10-04 When the Hindu nationalist Bharatiya Janata Party BJP assumed power in India in 1998 as the largest party of the National Democratic Alliance it soon became evident that it prioritized educational reforms Under BJP rule a reorganization of the National Council of Educational Research and Training occurred and in 2002 four new history textbooks were published This book examines the new textbooks which were introduced considering them to be integral to the BJP s political agenda It analyses the ways in which their narrative and explanatory frameworks defined and invoked Hindu identity Employing the concept of decontextualization the author argues that notions of Hindu cultural similarity were conveyed particularly as the textbooks paid scarce attention to social geographical and temporal contexts in their approaches to Indian history The book shows that intrinsic to the textbooks emphasis on similarity is a systematic backgrounding of any references to internal lines of division within the Hindu community Through a comparison with earlier textbooks it sheds light on the contested nature of history writing in India especially in terms of nation building and identity construction This issue is also highly relevant in India today due to the electoral success of the BJP in 2014 and the efforts of the Hindu nationalist organization Vishwa Hindu Parishad to construct a coherent Hinduism Arguing that the textbooks operate according to the BJP s ideology of Hindu cultural nationalism this book will be of interest to academics in the field of South Asian studies contemporary history the uses of history identity politics and Hindu nationalism **American History in Song** Diane Holloway,2001 Songwriters dramatically captured the details of how Americans lived thought and changed in the first half of the twentieth century This book examines 1033 songs about WWI and WWII wars presidents Women s Suffrage Prohibition the Great Depression immigration minority stereotypes new modes of transportation inventions and the changing roles of men and women America invited immigrants and went to war to ensure democracy but within its borders lyrics display intolerant attitudes toward women blacks and ethnic groups Songs covered labor strikes communism lynchings women voting and working love sex airships radio telephones the lure of movies and new movie star role models drugs smoking and the atom bomb History books cannot match the humor poignancy poetry and thrill of lyrics in describing the essence of American life as we moved from a rural white male dominated society toward an urban democracy that finally included women and minorities **History of Civilization in England** Buckle,1891 **History of Civilization in England** Henry Thomas Buckle,1861 **History of Civilization in England by Henry Thomas Buckle** ,1861 A Condensed History of the Origination D.
