Provider Of Last Resort The Story Of The Closure Of The Philadelphia General Hospital:

Provider of Last Resort Donna Gentile O'Donnell, 2005 A superb account of a little understood chapter in Philadelphia's storied health care past This is a must read for anyone interested in public policy health care delivery or history of public institutions Dr Claire M Fagin **The Bioarchaeology of Dissection and Autopsy in the United States** Kenneth C. Nystrom, 2016-08-13 Encountering evidence of postmortem examinations dissection or autopsy in historic skeletal collections is relatively rare but recently there has been an increase in the number of reported instances And much of what has been evaluated has been largely descriptive and historical The Bioarchaeology of Dissection and Autopsy brings together in a single volume the skeletal evidence of postmortem examination in the United States Ranging from the early colonial period to the early 1900s from a coffeehouse at Colonial Williamsburg to a Quaker burial vault in lower Manhattan the contributions to this volume demonstrate the interpretive significance of a historically and theoretically contextualized bioarchaeology The authors employ a wide range of perspectives demonstrating how bioarchaeological evidence can be used to address a wide range of themes including social identity and marginalization racialization the nature of the body and fragmentation and the emergence of medical practice and authority in the United States **Medical Bondage** Deirdre Cooper Owens, 2017-11-15 The accomplishments of pioneering doctors such as John Peter Mettauer James Marion Sims and Nathan Bozeman are well documented It is also no secret that these nineteenth century gynecologists performed experimental caesarean sections ovariectomies and obstetric fistula repairs primarily on poor and powerless women Medical Bondage breaks new ground by exploring how and why physicians denied these women their full humanity yet valued them as medical superbodies highly suited for medical experimentation In Medical Bondage Cooper Owens examines a wide range of scientific literature and less formal communications in which gynecologists created and disseminated medical fictions about their patients such as their belief that black enslaved women could withstand pain better than white ladies Even as they were advancing medicine these doctors were legitimizing for decades to come groundless theories related to whiteness and blackness men and women and the inferiority of other races or nationalities Medical Bondage moves between southern plantations and northern urban centers to reveal how nineteenth century American ideas about race health and status influenced doctor patient relationships in sites of healing like slave cabins medical colleges and hospitals It also retells the story of black enslaved women and of Irish immigrant women from the perspective of these exploited groups and thus restores for us a picture of their lives

The Vaccine Race Meredith Wadman, 2018-09-04 A real jewel of science history brims with suspense and now forgotten catastrophe and intrigue Wadman's smooth prose calmly spins a surpassingly complicated story into a real tour de force The New York Times Riveting The Vaccine Race invites comparison with Rebecca Skloot's 2007 The Immortal Life of Henrietta Lacks Nature The epic and controversial story of a major breakthrough in cell biology that led to the conquest of rubella and other devastating diseases Until the late 1960s tens of thousands of American children suffered crippling birth defects if their

mothers had been exposed to rubella popularly known as German measles while pregnant there was no vaccine and little understanding of how the disease devastated fetuses In June 1962 a young biologist in Philadelphia using tissue extracted from an aborted fetus from Sweden produced safe clean cells that allowed the creation of vaccines against rubella and other common childhood diseases Two years later in the midst of a devastating German measles epidemic his colleague developed the vaccine that would one day wipe out homegrown rubella The rubella vaccine and others made with those fetal cells have protected more than 150 million people in the United States the vast majority of them preschoolers The new cells and the method of making them also led to vaccines that have protected billions of people around the world from polio rabies chicken pox measles hepatitis A shingles and adenovirus Meredith Wadman's masterful account recovers not only the science of this urgent race but also the political roadblocks that nearly stopped the scientists She describes the terrible dilemmas of pregnant women exposed to German measles and recounts testing on infants prisoners orphans and the intellectually disabled which was common in the era These events take place at the dawn of the battle over using human fetal tissue in research during the arrival of big commerce in campus labs and as huge changes take place in the laws and practices governing who owns research cells and the profits made from biological inventions It is also the story of yet one more unrecognized woman whose cells have been used to save countless lives With another frightening virus measles on the rise today no medical story could have more human drama impact or urgency than **The Vaccine Race**
