Non-Epileptic Seizures in Our Experience Steven C. Schachter MD, 2020-04-01 To an outside observer Psychogenic Non Epileptic Seizures PNES look like epileptic seizures The manifestations of PNES include collapses impaired consciousness and seizure related injuries However unlike epileptic seizures which are the result of abnormal electrical discharges in the brain most PNES are an automatic psychological response to a trigger perceived as threatening Not least because the changes in the brain that underpin PNES cannot be visualised easily with clinical tests such as the EEG there are many uncertainties and controversies surrounding the condition Patients often provoke a mixture of emotions in healthcare professionals In the authors previous book *In Our Words Personal Accounts of Living with Non Epileptic Seizures* over 100 individuals with PNES and their family wrote about their experiences with the condition While some had positive care experiences many were left feeling confused angry and abandoned by the clinicians they had encountered *Non Epileptic Seizures in Our Experience Accounts of Health Care Professionals* complements the authors previous book by presenting the perspectives of over 90 members of different healthcare professions from around the world The anonymous publication

format has enabled many not only to share success stories but also to be open about difficulties and failures This volume will be an invaluable resource for both highly experienced professionals as well as relative novice and those experiencing PNES This book will challenge negative attitudes surrounding the condition improve understanding between healthcare professionals and patients and ultimately advance the quality of care provided for those with PNES Psychiatric Controversies in Epilepsy Andres Kanner,Steven C. Schachter,2010-07-28 Psychiatric Controversies in Epilepsy addresses controversial clinical issues of the psychiatric aspects of epilepsy The book explores the reasons behind the poor communication between psychiatrists and neurologists and suggests potential remedies to this important problem and two chapters are devoted to examining whether psychiatrists and neurologists are properly trained to recognize and treat conditions that both disciplines commonly encounter in clinical practice Identification of the causes behind the high rate of comorbidity between epilepsy and mood anxiety psychotic and attention deficit disorders is given high priority in the volume and a specific review of the evidence of common pathogenic mechanisms that may be operant in epilepsy and these psychiatric disorders is included Recently identified bidirectional relationship between mood disorders and epilepsy and its implication in the course and response to treatment of the seizure disorder are also explored Several chapters are devoted to rectify common misunderstandings of the use of psychotropic drugs in patients with epilepsy including the use of antidepressant and central nervous system stimulants Finally one chapter explores the possibility of organic causes of psychogenic non epileptic seizures Compiles into one source the important controversial issues of the psychiatric aspects of epilepsy which have significant implications in clinical practice Authors are internationally recognized authorities in the field of psychiatric aspects of epilepsy Quality of Life in Epilepsy Gus A Baker,Gus A. Baker,Ann Jacoby,2013-05-13 Though clinical aspects of epilepsy such as seizure control are crucially important to its management increasing attention is being given to wider quality of life issues Epilepsy continues to be an often misunderstood and stigmatising condition for the vast majority of people whose seizures can be well controlled the social and psychological repercussions are often of greater significance than the seizures themselves The increasing emphasis on the importance of non clinical outcomes in the assessment of new treatments and management strategies for chronic conditions such as epilepsy has stimulated interest in methodological issues in assessing quality of life This book reviews the recent literature on the impact of epilepsy on everyday experience and the methodological issues involved in assessing that impact It also considers the perspectives of a range of health professionals involved in caring for people with epilepsy and how through appropriate management the impact on their lives can be minimised Seminars in General Adult Psychiatry George Stein,Greg Wilkinson,2007-04 This second edition of Seminars in General Adult Psychiatry provides a highly readable and comprehensive account of modern adult psychiatry Key features of the first edition that have been retained are the detailed clinical descriptions of psychiatric disorders and historical sections to give the reader access to the classic studies of psychiatry as well as the current evidence

Additional topics covered here for the first time include liaison psychiatry psychosexual medicine clinical epidemiology and international and cultural psychiatry Clinical management is given due prominence with extensive accounts of modern drug management cognitive therapy the main psychosocial approaches and current guidelines such as those published by the National Institute for Health and Care Excellence An essential text for trainees studying for their MRCPsych this book is also a one stop reference work for established practitioners providing comprehensive coverage of the whole of adult psychiatry

Psychiatric Issues in Epilepsy Alan B. Ettinger, Andres M. Kanner, 2007 This volume is a pragmatic comprehensive guide to evaluation and management of psychiatric problems in patients with epilepsy The authors critically analyze recent findings on the relationship between seizures and psychiatric disorders and offer practical recommendations for diagnosis and treatment Numerous case studies are included This thoroughly updated edition includes new material on animal models of psychopathology in epilepsy use of psychotropic drugs in epilepsy use of antiepileptic drugs in psychiatry neuroanatomic and neurobiologic bases of psychiatric disorders neuropsychological evaluation in children with epilepsy neuropsychological testing in epilepsy surgery candidates and value and limitations of the forced normalization concept **Epilepsy Editor's**
