Although we have no good definition of health all people have their own ideas of whether they are healthy or not Based on personal experience and knowledge each person comes to accept that within themselves there is a normal range of feelings and performance departure from which could be considered abnormal or unhealthy Despite the many amazing technological advances made over recent decades it cannot be said that access to advanced medical care is the main determining factor in the healthiness or otherwise of a society Even in these modern times most diseases and health problems are non curable in the strict sense and the scope for effective prevention of disease is more limited than some enthusiasts suggest Individuals must appreciate the limitations of modern medical care and while seeking to use the care available to best possible effect accept that the responsibility for trying to prevent major disease rests in their own hands In this book we have tried to present a balanced and realistic picture of the many factors that must be taken into account if optimum disease prevention and health maintenance are to be achieved The health of your family is your responsibility An understanding of what can go wrong how it can be prevented or how it can best be coped with can only be helpful to you *Library Journal* ,1982

Whether he is revealing how to beat high cholesterol with blueberries, combat hot flashes with black beans, bash blood sugar spikes with almonds, or help relieve agonizing back pain with pineapple, Dr Duke's food remedies help treat and prevent the whole gamut of health concerns, from minor such as sunburn and the common cold to more serious like arthritis and diabetes. Dr Duke has assigned a rating to each remedy according to his evaluation of the available scientific studies and anecdotal reports.
