Psychotherapy with Suicidal People Antoon A. Leenaars, 2004-05-14 Almost a million people die by suicide every year. WHO estimate. The sheer numbers have made suicide prevention a major health target but effective prevention is not straightforward. Suicide is a complex event more complex than most of us imagine, calling for an equally complex response. Psychotherapy with Suicidal People provides a multi-component approach with rich clinical data including many case histories to guide the reader. Based on decades of research from across the globe, Antoon A. Leenaars takes the reader into the mind of the suicidal person from the young to the elderly, from the anonymous to the famous. There is no better way to know and thus to treat a person. A plethora of special features makes this volume an international classic and includes reflections of many suicidologists such as Heraclitus, Plato, Sigmund Freud, Emile Durkheim and Edwin Shneidman. A unique window on the clinical mind of the author. Empirically supported definition with applications across age, gender, historical time as well as culture. The report of the International Working Group on Ethical and Legal Issues in Suicidology. Psychotherapy with Suicidal People: A Person-centred Approach is essential reading for clinical psychologists, psychiatrists and their trainees and all clinicians who work with suicidal people.

The Italian Psychiatric Experience Alessandro De Risio, 2019-09-17 The 1978 Italian Psychiatric Reform was welcomed as a significant advancement in the care of the mentally ill as it involved for the first time ever the complete shutdown of psychiatric hospitals in a major Western country. Today Italian psychiatry is totally different from that of the rest of the world due to its complete commitment to community care. The transition towards the community model was appraised by many relevant international organisations such as the World Health Organisation as a fundamental step towards a better quality of life, well-being and social functioning of persons with mental diseases. This passage wasn't easy, however, and the closure of Italian psychiatric hospitals was accompanied by notable setbacks in the treatment of the most severely affected persons who often faced the inadequacy of a crisis management system of care rejecting interventions in the long term. In past decades, pro-reform authors also tended to refuse criticism of such obstacles due to their extreme commitment towards the principles that inspired their practice. This book provides a much-needed appraisal of the 1970s Italian Psychiatric Reform. With an independent viewpoint, it highlights the often overlooked shortcomings of the reform while also presenting a multi-faceted view in contrast with the single vision attitude often adopted in existing studies on this topic.

Martin, Caryn E. Tegtmeier, 2017-07-14 Injury recidivism is a continuing health problem in the modern clinical setting and has been part of medical literature for some time However it has been largely absent from forensic and bioarchaeological scholarship despite the fact that practitioners work closely with skeletal remains and in many cases skeletal trauma The contributors to this edited collection seek to close this gap by exploring the role that injury recidivism and accumulative trauma plays in bioarchaeological and forensic contexts Case examples from prehistoric historic and modern settings are included to highlight the avenues through which injury recidivism can be studied and analyzed in skeletal remains and to illustrate the limitations of studying injury recidivism in deceased populations [American Journal of Psychiatry 1844-1994](#) American Psychiatric Association, 1994-01-30 This covers the American Journal of Psychiatry from 1844 to 1994 [KELLOCK PSYCH TEXTBOOKS \[Two\]](#) Karen Kellock , 2024-06-06 [KELLOCK PSYCH TEXTBOOKS FOR A LOST GENERATION MANUAL FOR SUPERIOR MEN VOLUME TWO](#) Extended Versions by Karen Kellock [NEW PSYCH THEORY](#) by Karen Kellock Ph D Psychology Proverb Author The cause of mental illness is other people be shocked into a new world view seeing mental illness in a new light Elite Review Koestler 1962 shows all discoveries blend art with science Vivid poetic images combined with rock solid psychology show the tyranny of groups vs the individual collective insanity the contagion of lunacy What does it take to be a champion in a sea of sharks That s the essence of this work The writing is subtle witty clever and highly accurate The therapy open the book anywhere Mansell Pattison M D Postdoctoral Sponsor at
