Psychiatry Areas Of Promise And Advancement A Bicentennial Volume Of The University Of Pennsylvania:

Psychiatry, Areas of Promise and Advancement, 1977 **Psychiatry** John Paul Brady, 1977 Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 The British Library General Catalogue of Printed Books 1976 to 1982 British Library, 1983 **Punishment and Restorative Crime-handling** Aleksandar Fatić, 1995

The general aim of this work is to examine the main features of some of the most influential contemporary theories of criminal justice to look at their conceptual and methodological relative advantages and shortcomings and to try to glean in them a direction for the devising of a more promising more optimising way of accounting for crime and deviance as well as for prospects of successful social control The general contention of the work is that the key question to be asked in this respect is what value ought to lie at the base of all such explanatory attempts The general answer with which the restorative theory of crime handling espoused herein deals is that this value ought to be trust All those arrangements which can generally be characterised as trust enhancing appear to be optimising as well and to contribute in a constructive way to the resolution of conflicts Punishment on the other hand does not appear to be trust enhancing on the contrary it seems to play an essentially trust degrading role in most contexts and thus creates an atmosphere and consequences which do not suggest the possibility of both effective and humane social control mechanisms It has been the aim of theories of social control for decades to avoid excessive punitiveness and maximise the consensus which is built around the particular policies to that effect Yet most such theories have ended up neglecting the role of trust and emphasising justice instead Another contention of the arguments contained herein is to the effect that justice ought not to play such a prominent role in any theory of social control which aspires to be trust enhancing Following the unavoidable directions of arguments advanced over decades the arguments herein deal with theories such as retributivism and utilitarianism communitarianism and republicanism thereby bordering on political and even on sociological theory Yet they do not remain on the level of presenting arguments for and against these theories the value of what is argued here against such theories if there is any value in it lies in its contribution to the fuller illumination of the real role of trust in a social theory of crime control which would derive strongly from the popular conflict resolution theories but which at the same time would seek to avoid some of their greatest calamities To what extent this work might have succeeded in accomplishing that end however is of course up to the reader to judge *The British National Bibliography* Arthur James Wells, 1979 **National Union Catalog**, 1978 Digest of Neurology and Psychiatry Institute of Living, 1977 Library of Congress Catalogs Library of Congress, 1979 Subject Catalog Library of Congress, **Subject Catalog, 1977** Library of Congress, 1977 **American Book Publishing Record** R.R.
