

CRYSTALS FOR PSYCHIC CONNECTIONS

The background of the entire image shows two individuals, a man on the left and a woman on the right, in profile, facing each other with their hands raised in a meditative gesture. Bright, glowing blue and white light emanates from their foreheads and hands, creating a sense of psychic energy. The overall color palette is dark blue and purple, with a subtle geometric pattern of white lines forming a low-poly mesh at the bottom.

Psychic Connections:

Psychic Connections Lois Duncan, William George Roll, 1995 A few centuries ago said Bill Roll natural science museums threw out their collections of meteorites because astronomers were convinced there were no stones in the sky And it wasn't too long ago that physicists asserted that the atom was the smallest bit of matter Now there is a whole science called quantum physics based on the study of subatomic particles It's incredible the number of miracles we accept today without question that yesterday's teachers of science told us were impossible When I considered that statement I realized he was right There was a time when the idea of the telephone seemed impossible yet today few people are without one The same holds true of a radio And as a child I would have found the concept of television too ridiculous even to contemplate yet now I take it for granted that at the push of a button a blank screen will come alive with all sorts of activity If we can accept our ability to communicate with friends from a distance through the use of telephones and radios and the fact that a picture can be broken into bits and transported invisibly through space to reassemble itself in our living room why should we find it hard to accept the possibility that a thought might be transmitted from one mind to another as in telepathy Lois Duncan from *Psychic Connections A Journey into the Mysterious World Of Psi* Past our ability to obtain information by using the five basic senses sight hearing smell touch and taste lies what *Psychic Connections A Journey into the Mysterious World of Psi* is a nonfiction work about parapsychology which introduces readers to the fascinating world of ESP or extrasensory perception Based on laboratory research and documented case histories it addresses such subjects as astral projection out of body experiences NDEs near death experiences apparitions and hauntings poltergeists psychokinesis channeling and mediumship clairvoyance levitation precognition telepathy psychic healing and practical applications of ESP such as the use of psychic detectives by law enforcement agencies Containing photographs a glossary an index and a list of sources *Psychic Connections* is the basic book on parapsychology Compelling and thought provoking it belongs on every thinking person's bookshelf *Psychic Connections* Carolyn Gelone, 2015-02-13 If you have ever wondered about the supernatural things in life read this book It is one person's experiences with the psychic world Maybe you have had a dream that came true or a person call you at the exact time you were thinking of them Maybe you followed a thought to go a different way to work and something amazing happened on the way Everyone has a sense of intuition do you listen to yours The author Carolyn Gelone has worked with the psychic readings of Edgar Cayce In searching for answers to her questions about life and its spiritual dimensions she realized that she was living in the midst of many events that were answers to her questions Follow her journey as she becomes more and more aware of the blending of the visible and invisible worlds And get ready to remember the times in your life when you knew what was happening was more than just a coincidence If you like a touch of the mysterious you'll like *PSYCHIC CONNECTIONS Exoconsciousness* Sergio Rijo, 2024-01-10 Embark on a transformative journey with *Exoconsciousness Alien Encounters and the Evolution of Human Awareness* This riveting exploration delves into

also shows how Lacan's understanding of the schizophrenic as having a defective relation to language can also explain four other characteristics of schizophrenic behavior: the fragmented body image, lack of realistic evaluation of the world, so-called bisexuality, and confusion of birth and death. Third, De Waelhens gives a Hegelian interpretation of the pre-Oedipal experience of the child. He makes use of Freud's study on his grandchild using a bobbin and later the words *fort da* (away here) to demonstrate that a transitional object allows the child to take distance from its attachment to the mother so that it can start to separate itself from the mother. Taking distance is, according to De Waelhens, introducing the Hegelian negative, which is the birth of the subject. Fourth, De Waelhens gives a dialectic reading of the history of German and French psychiatry. He shows the epistemological contradictions in the work of some of the great nineteenth-century psychiatrists relying too exclusively on a biological model of schizophrenia. In his contribution to this volume, Wilfried Ver Eecke draws several lessons from evaluating the literature on schizophrenia. He argues that epistemologically neither a biological nor a psychological method of reasoning can capture all the factors that can play a role in the creation of schizophrenia. He relies heavily, but not exclusively, on the Finnish studies of Tienari, Myrman, and Wahlberg and their colleagues to provide statistical evidence that non-biological factors also play an important role in causing schizophrenia. He relies heavily, but again not exclusively, on the study by Karon and VandenBos to demonstrate statistically the efficiency of psychodynamically inspired therapy of schizophrenics. Ver Eecke also addresses an apparent inconsistency in De Waelhens' presentation of Lacan's theory of schizophrenia. Where De Waelhens seemed to argue at one time that the mother figure was the crucial figure to explain schizophrenia, leading to a defective relation to the body, and at another time that it was the role of the father which was crucial, leading to a defective relation to language and the symbolic, there Ver Eecke argues that the defective function of each influences the function of the other. He then draws a conclusion for the therapy of schizophrenics: to be helpful, a therapist will have to address both deficiencies. The problem for treating schizophrenics is that correcting an unconscious deficiency to the body, a deficiency in the imaginary, requires a totally different kind of intervention than an attempt to correct a symbolic deficiency, a deficiency in the paternal function. A correction of the imaginary requires a kind of maternal mirroring; a correction of the symbolic requires making a distinction or a prohibition stick. One further difficulty arises: Psychotherapy uses language in its treatment. However, language in schizophrenics is deficient. We can therefore expect that language will be inefficient. This is so unless the therapist uses language first to make a repair at the imaginary level and only thereafter makes an attempt to make a correction in the symbolic. In analyzing successful therapeutic techniques reported by several therapists, Ver Eecke discovers that all of them first try to repair the imaginary before they attempt to make corrections to the symbolic.

Modern Philosophies of Human Nature P. Langford, 2012-12-06

General Argument: My aim is to survey some of the most influential philosophical writers on human nature from the time that Augustine codified Christian belief to the present. During this period, philosophical opinions about human nature underwent a transformation from the God

centered views of Augustine and the scholastics to the human centered ideas of Nietzsche Freud and Sartre While one aim has simply been to provide a handy survey I do have three polemical purposes One is to oppose the notion that the modernism of more recent writers was produced by methodological innovations According to both Freud and Sartre as well as other key figures like Lacan and Heidegger their views were the product of new methods of investigating human nature namely those of psychoanalysis and the phenomenological reduction Psychoanalysis claimed to use the interpretation of both dreams and the relationship between analyst and patient to penetrate the unconscious Phenomenology has claimed that trained philosophers are able to obtain a privileged view of consciousness by a special act of thought called the phenomenological reduction which enables them to view consciousness without preconceptions On many issues my sympathies are with Nietzsche rather than with Freud or phenomenology This is also the case regarding methodology Nietzsche saw quite clearly that the possibility of popularising the views he himself held came from the decline of Christianity My rejection of exclusive reliance upon the methodologies of psychoanalysis and phenomenology is based on two lines of argument

Netflix, Dark Fantastic Genres and Intergenerational Viewing Djoymi Baker, Jessica Balanzategui, Diana Sanders, 2023-07-04 Focusing on Netflix's child and family orientated platform exclusive content this book offers the first exploration of a controversial genre cycle of dark science fiction horror and fantasy television under Netflix's Family Watch Together TV tag Using a ground breaking mix of methods including audience research interface and textual analysis the book demonstrates how Netflix is producing dark family telefantasy content that is both reshaping child and family friendly TV genres and challenging earlier broadcast TV models around child appropriate family viewing It illuminates how Netflix encourages family audiences to watch together through intergenerational dynamics that work on and offscreen The chapters in this book explore how this Netflixication of family television developed across landmark examples including Stranger Things A Series of Unfortunate Events The Dark Crystal Age of Resistance and even Squid Game The book outlines how Netflix is consolidating a new dark family terrain in the streaming sector which is unsettling older concepts of family viewing leading to considerable audience and critical confusion around target audiences and viewer expectations This book will be of particular interest to upper level undergraduates graduates and scholars in the fields of television studies screen genre studies childhood studies and cultural studies
