**Archetype, Culture, and the Individual in Education** Clifford Mayes, 2020-03-16 In *Archetype Culture and the Individual in Education* The Three Pedagogical Narratives Clifford Mayes presents a unique approach to understanding how Jungian principles can inform pedagogical theory and practice In a time when what the educational historian Lawrence Cremin called the military industrial educational complex and its standardized education are running roughshod over the psyche and spirit of students Mayes deploys depth psychology especially the work of Jung to advance an archetypal approach to teaching and learning Mayes demonstrates how catastrophic it is to students when the classroom is governed by forces that objectify the individual in a paralysing stranglehold He argues that one's life narrative is significantly impacted by one's narrative as a learner thus schooling that commodifies learning and turns the student into an object has neuroticizing effects that will spread throughout that student's entire life In Part I Mayes explores the interaction between archetypes and various types of time ultimately focusing on the individual but always mediated by the cultural unconscious In Parts II and III he brings together education with post Jungian and post Freudian psychology examining transference countertransference in the classroom the Jungian idea of the shadow applied to educational processes Jung's

unique vision of the symbol and its importance for educational theory and Jung's transcendent function as a prime educational modality Mayes concludes by looking to the future of archetypal pedagogy This groundbreaking work in the emerging field of Jungian pedagogy is invaluable reading in Jungian Studies depth psychological theory educational theory and for teachers and psychotherapists *Catalog of Copyright Entries. **Creases in Culture** Dennis Patrick Slattery, 2014-01-15 This collection of essays written over a period of years entertains the shared place of psyche and poetics Dr Slattery has explored the manner in which the psyche is poetic and how

poetry is deeply psycho mythical Influenced in part by the archetypal psychologist James Hillman s idea of the poetic basis of mind that comprises the soul s foundation Slattery s writing moves into the interactive field in which myth is the ground for both psyche and poetry The essays develop a further understanding of what has been called mythopoiesis the fundamental myth making and shaping capacity of the soul Martha Graham in Love and War Mark Franko,2012-06-05 Often called the Picasso Stravinsky or Frank Lloyd Wright of the dance world Martha Graham revolutionized ballet stages across the globe Here Franko reframes Graham s most famous creations by showing how she wove together strands of love passion politics and myth to create an American school of choreography and dance Developing the Whole Student Clifford Mayes,2019-12-31 This book proposes a new way of categorizing curricula in the holistic educational tradition This is an idea that goes back in the Western tradition at least as far as Plato and Lao Tzu in the Eastern tradition It is certainly present in Spinoza and Schopenhauer It is called a holarchy The idea of a holarchy gives rise to Integrative Curriculum Theory which with major modifications draws on Ken Wilber s in his evolutionary model of the development of consciousness at personal cultural and ontological realms Integrative Curriculum Theory will 1 Prove a useful addition to the holistic repertoire of systematic and above all humane terminologies and technologies for making and evaluating specific curricula as well as for theorizing the curriculum at a time when scientistic technist and profit driven views of education have commandeered the podium policy and praxis and 2 address some areas of concern that with certain holistic models of education and 3 address some problems in Wilber s integral model of psychological cultural and spiritual evolution The Mind-Brain Continuum Susan Gordon,2023-01-01 This insightful book proposes a holistic theory of the development of self drawing on interdisciplinary literature in existential phenomenology neurophenomenology intracrinology endocrinology and naturopathic medicine The psychoneurointracrine hypothesis bridges the gap between the mind and brain providing a framework to explain the complex system that facilitates development of one s sense of self and well being The book challenges assumptions in present day neuroscience and psychiatry placing the mind and brain on a continuum of health and growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications In this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneurointracrine activity and links it to female neurology and the development of one s sense of self She brilliantly places this activity which serves as a mind body bridge within the frameworks of neurophenomenology and non linear dynamics Her psychoneurointracrine hypothesis is a tour de force one that is holistic integrating intracrinology with psychology and neurology This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a paradigm that impacts science s understanding of behavior experience consciousness and human agency Stanley Krippner PhD Affiliated Distinguished Faculty California Institute of Integral Studies San Francisco CA In her fascinating book Susan Gordon develops a novel theory about the biological connection between mind brain and organism Drawing on empirical

research on the role of the female hormonal system in basal states of self and mood she shows that the biochemistry of the endocrine system must be viewed as an indispensable foundation for the emergence of embodied self awareness The homeostasis and hormonal balance of the organism is integral to the sense of well being and the development of meaning but it is also continually modulated and influenced by the subject s experience of his or her world In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical organismic processes at the root of the mind Thomas Fuchs MD PhD Karl Jaspers Professor of Philosophy and Psychiatry University of Heidelberg DE

**The I and the Not-I** Mary Esther Harding, 2020-05-05 This book provides a very accessible general introduction to the Jungian concept of ego development and Jung s theory of personality structure the collective unconscious anima animus shadow archetypes

**Embodied Spirituality in a Sacred World** Michael Washburn, 2012-02-01 Anyone seeking a deeper understanding of human spirituality will find something of value in Michael Washburn s new book Drawing on a rich variety of psychoanalytic Jungian and existential phenomenological sources and on both Western and Asian spiritual texts Embodied Spirituality in a Sacred World provides a theoretical foundation for the idea that human development follows a spiral path Washburn shows that ego development early in life requires us to turn our backs on original sources of our existence and therefore that spiritual development later in life requires us to spiral back to these sources on the way to whole psyche integration He elucidates the underlying causes and pivotal events that set development on its spiral course and traces six major dimensions of experience as they unfold along the spiral path the unconscious the energy system the ego system the perceived other the experiential body and the life world In providing a theoretical foundation for the idea of the spiral path Washburn defends the idea against its critics and helps explain why the idea has been compelling to so many people in diverse traditions
