Psychic Illness The Rise And Fall Of Evil On Earth:

Psychic Illness Gregory Alan Sweitzer, 2000-12-20 It seems that we have always struggled to define evil We've alternately described it as a metaphysical force a demonic being a philosophical argument a psychological aberration a criminal type And yet none of these seem quite on the mark Perhaps there is another explanation something else but all of the above too Perhaps evil is a natural phenomenon something that changes over time and preys upon man Perhaps it is a parasite Evil is a communicable disease a behavior borne virus transmitted through social behavior It is virus every bit as much as rabies smallpox or polio It is describable It is predictable It is vulnerable to the proofs of science Once we understand this we gain incredible new tools Suddenly we can fight back

The Modern Treatment of Nervous and Mental Diseases William Alanson White, Smith Ely Jelliffe, 1913 This volume devoted to the treatment of nervous and mental diseases is designed to meet the needs which the rapid advances in knowledge of neurology and psychiatry have created The nervous system is here regarded as a whole and as inclusive of the mind and it is maintained that disturbances of any and all of its functions mental as well as physical are proper subjects for therapeutics The present work lays emphasis upon the psychical side of life as being worth quite as much consideration as the physical It sets forth doctrines of nervous and mental hygiene reconstructive factors in social organization as applied to human ills and endeavors to present a broad front to the pessimistic nihilism in therapeutics that has been too long current in these fields because the doctor's eyes have been too closely focused on the individual examples and results of human accidents Neurology and psychiatry offer the widest possible opportunities for preventive medicine as well as for therapeutic optimism The program here presented is essentially therapeutic Planned as it has been on a broad scale the more practical issues confronting the clinician have nevertheless been fully met The editors have sacrificed philosophical views for more definite guideposts wherever in the present state of our knowledge such a course seemed wiser PsycINFO Database Record c 2005 APA all rights reserved **A Primer of psychology and mental disease** Colonel Bell Burr, 1906 *The Modern treatment of nervous and mental diseases v.1*, 1913 **Psychology** Philip G. American Crisis: The Collapse of Christian Culture William D. Howard, 2024-02-19 All Americans know we are in a state of cultural crisis but how did we get to this point It has been said if we seek an actual legal date for the fall of Judeo Christian culture in America it would be June 26 2015 the day the Supreme Court ruled that homosexual marriage was a constitutionally protected right But according to William D Howard the destruction of our country started well before that when states began changing laws and incorporating changes that had lasting repercussions on the culture as a whole In American Crisis The Collapse of Christian Culture Howard takes an in depth look at civilizations in the past provides insights on our current culture and warns of a future that can mean only the destruction of everything we hold dear But this book is not without hope Howard uses God s Word to show Christians how we can counter the social and political norms and fight for our country s moral political and social outlook As our moral high ground is being chipped away one corner at a time we need to take up the call to action and fight against the powers that seek our demise

Dynamic Thought and The Law of Vibrant Energy Henry Thomas Hamblin, William Walker Atkinson, 1917-01-01 This book will deal with Life It holds that Life is Universal that it is inherent in and manifests in different degrees in every part particle phase aspect condition place or relationship in the World of Things that we call the Universe It holds that Life manifests in two aspects or forms which are generally found by us in connection and co operation with each other but which are both probably an expression of some One Thing higher than either These two aspects or forms which together go to make up or produce that which we know as Life are known as 1 Substance or Matter and 2 Mind In this book the term Substance is used in preference to Matter owing to the fact that the term Matter has become closely identified with certain ideas of the Materialistic school of thought and has generally been regarded by the public in the light of dead

matter whereas this book holds that all Substance is Alive The term Mind is used in the sense of Mind as we know it rather than as Mind as it is or as The Cosmic Mind In some places the term Mind principle is used to convey the idea of a portion of the Great Principle of Mind of which that which we call Mind is but a small and but partially expressed portion These terms are explained and illustrated as we proceed The aspect of Energy or Force is not treated as a separate aspect or form of Life in this book for the reason that it is regarded as merely a manifestation of Mind as will appear as we proceed We have much to say regarding Motion but the writer has tried to explain and prove that at the last all Motion results from Mental Action and that all Force and Energy is Vital Mental Force and Energy This book is not intended to run along metaphysical or theological lines its field is different And so while it recognizes the importance of these branches of human thought still it finds that its own particular field is sufficient to engross its entire attention for the moment and consequently the aforesaid subjects shall not be touched upon except incidentally in connection with the subject matter of the book This being the case there will be no discussion of the origin of Life the question of creation the problems of theology and metaphysics the riddle of the Why and Wherefore of Life and the Universe The writer has his own opinions upon these questions but feels that this is not the place in which to air the same For the purposes of the book he prefers to leave every reader to his own favorite views and conceptions regarding these great subjects feeling that the views regarding Life Mind Motion and Substance that are advanced in this book may be accepted by any intelligent reader without prejudice to his or her accepted religious or philosophical views The writer sees that this something called Life exists he finds it in evidence everywhere And he sees it always in its aspects of Substance and Mind And he feels justified in regarding Life as always existing in and manifesting in these aspects always in conjunction at least Life as we know it And he finds certain apparent Laws of Life in operation in the Universe to which all Life in all of its aspects is apparently amenable And he feels justified in considering these Laws constant and invariable and unchangeable so long as the Universe as it now is exists And with the above views in mind this book will proceed to a consideration of its subject without attempting to peer behind the veil separating the Universe from its Causer Life from its Source But in justice to reader subject and writer the latter has thought it well to state that he does recognize not only the veil but That which is behind the Veil To proceed without this statement would be unfair and misleading The writer wishes to be understood positively upon this point even though the declaration may bring forth the derisive jeer of those who feel that they have outgrown this conception or else the calm superior pitying smile of those who feel that the Universe is its own Cause and Effect By Universe the writer means The whole body of Things Webster His declaration means that he believes in That which is above Things

Youth Mental Health Crises and the Broken Social Link Carl Waitz, 2024-10-01 This book critically examines the circumstances surrounding the failure of rites of passage in U S society and its relationship with the mental health crisis overtaking youth in America today The book develops a Freudian understanding of rites of initiation and the larger social link based on Freud's psychoanalytic myths read through a Lacanian lens It further surveys the deterioration of common civil identifications in the United States the advancement of consumer capitalism in the late 20th century and the development of social media in the 21st century as

each composing a tectonic shift destabilizing the traditional function of the rite of initiation As a result adolescents today have no reliable method of entering the social link through symbolic identification nor the ability to use it to bind their libido The book traces the clinical consequences of this failure to the recent waves of mass psychogenic illness in adolescents the rocketing increase in psychiatric hospitalizations and the dramatic rise in suicidal thoughts and behaviours in the past years It also offers possible pathways forward for both adolescents and psychoanalytic clinicians working with them Drawing on multiple psychoanalytic schools of thought and clinical experience this book is a vital resource for psychoanalysts psychotherapists and clinicians working with adolescents
