Castellanos,Umeshwar Dayal,Timos Sellis,2009-08-03 In today s competitive and highly dynamic environment analyzing data to understand how the business is performing to predict outcomes and trends and to improve the effectiveness of business processes underlying business operations has become cri cal The traditional approach to reporting is no longer adequate users now demand easy to use intelligent platforms and applications capable of analyzing real time bu ness data to provide

insight and actionable information at the right time. The end goal is to improve the enterprise performance by better and timelier decision making, enabled by the availability of up-to-date high-quality information. As a response, the notion of real-time enterprise has emerged and is beginning to be recognized in the industry. Gartner defines it as using up-to-date information, getting rid of delays and using speed for competitive advantage, which is what the real-time enterprise is all about. Indeed, the goal of the real-time enterprise is to act on events as they happen. Although there has been progress in this direction and many companies are introducing products toward making this vision a reality, there is still a long way to go. In particular, the whole lifecycle of business intelligence requires new techniques and methodologies capable of dealing with the new requirements imposed by the real-time enterprise.

**The Real-Time Enterprise** Dimitris N. Chorafas, 2004-11-15. Successful management teams can identify the cost and return derived from the implementation of new technology and they can properly apply the technology toward gaining a competitive advantage. IT and business managers alike need a resource that enables them to prepare for future operating conditions, identify beneficial solutions and use high technology. [CRM in Real Time](#) Barton J. Goldenberg, 2008. This comprehensive guide to Customer Relationship Management (CRM) draws on Barton Goldenberg's 20-plus years of experience guiding firms to a successful implementation of CRM solutions and techniques. Goldenberg demonstrates how the right mix of people, process and technology can help firms achieve a superior level of customer satisfaction, loyalty and new business. Beginning with a primer for executives who need to get quickly up to speed on CRM, the book covers a full range of critical issues including integration challenges and security concerns, and illuminates CRM's key role in the 24/7/365 real-time business revolution. CRM in Real Time is an essential guide for any organization seeking to maximize customer relationships, coordinate customer-facing functions and leverage the power of the Internet as business goes real time.

[Enabling Real-Time Business Intelligence](#) Malu Castellanos, Umeshwar Dayal, Renée J. Miller, 2010-07-23. In today's competitive and highly dynamic environment, organizations need new solutions to enable them to solve modern business problems and to make decisions using integrated, trustworthy and up-to-date data. Modern real-time enterprises need to act on events as they happen. They need new, easy-to-use intelligent solutions capable of analyzing heterogeneous real-time enterprise data to provide insight and actionable information at the right time. To enable real-time enterprises, we need fundamental advancements in the science and engineering that underlie intelligent information management, including the management of streaming data, the modeling, analysis and management of unstructured data along with the integrated use of unstructured, semi-structured and structured data. We need new models and paradigms that raise the level of abstraction used in such critical technologies as ETL, data warehousing and event and business process modeling. The series of BIRTE workshops aims to provide a forum to discuss and advance the foundational science and engineering required to enable real-time business intelligence and the novel

applications and solutions that build on these foundational techniques. Following the success of our first workshop BIRTE 2006 held in Seoul Korea in conjunction with VLDB 2006 and our second workshop BIRTE 2008 held in Auckland New Zealand with VLDB 2008 our third workshop was held in Lyon France on August 24 2009 with VLDB 2009
