Real World Economic Applications Michael B. Lehmann,1994 Real World Economic Applications Michael B. Lehmann,1992 **What is Good for General Motors?** Thomas A. Crumm,2010 Tom Crumm thinks the American auto industry can regain the world leadership it once enjoyed in design manufacturing and sales of world class quality vehicles and profitability There are nearly a million American jobs at stake and when the ideas in this book spread to component and other industries it becomes fuel for discussion of a turnaround of America s industrial sector and a turnaround of the economy General Motor s CEO Roger Smith was a visionary and fully realized that change was needed at GM Tom Crumm played a vital role in the rethinking that was to help the company steer a new course as a strategic planner he was deeply involved in the creation of the Saturn project in 1985 Many lessons may be learned from Saturn s rise and fall that could be used to further the understanding of how the American manufacturing sector can be restored to its world class position These include corporate culture and leadership or the lack of it the integration of technology and workers employee empowerment and labor relations supplier relations and vertical integration and sales philosophy and customer satisfaction The biggest threat to a worker s job is an unprofitable company Accordingly the adversarial relationship with the company was not in the best long term interest of union members The union had to change as well as the company This point and the whole discussion will be of compelling interest to all who want to know what happened to America s auto making capability Others have recently tried to explain what went wrong in the auto industry Crash Course by Paul Ingrassia for instance shows that the author had extraordinary access to behind the scenes meetings and conversations but he has little to say about engineering manufacturing or product development This book addresses just those practical areas where productive change can be made **Cheering for Self** James S. Vass Jr,James Vass Jr,2003-05-13 This book is a study of UW men s basketball fans during the 2001 2002 season and explores their proclivity to cheering for self during basketball events The term basketball event is used rather than basketball game to make clear that everything connected to and seen heard or experienced before during and after a basketball game is included The actual game itself is only part of the basketball event An undercurrent runs throughout this participant observation mini ethnography dealing with access and the relative quality of that access to basketball events being affected by ones age class race and gender The prominent role of advertising in shaping basketball events and helping to construct fans as consumers of products both commercial and institutional during the process of cheering for self is central to this idea Cheering for self is the activity engaged in by individual fans after they find things to identify or connect with through personal investment Fans cheer for self indirectly Fans cheer for the team that they identify with Through the process of cheering for self while attending the basketball event people are taught how to become fans to consume a UW product the basketball event and to consume advertisers products People have a tendency to spend their entire life trying to impress others **Business Research Sources** F. Foundations of Real-World Economics John Komlos,2019-01-11 The 2008 financial crisis the rise of Trumpism and the other populist movements which have followed in their wake have grown out of the frustrations of those hurt by the economic policies advocated by conventional economists for generations Despite this textbooks continue to praise conventional policies such as deregulation and hyperglobalization This textbook demonstrates how misleading it can be to apply oversimplified models of perfect competition to the real world The math works well on college blackboards but not so well on the Main Streets of America This volume explores the realities of oligopolies the real impact of the minimum wage the double edged sword of free trade and other ways in which powerful institutions cause distortions in the mainstream models Bringing together the work of key scholars such as Kahneman Minsky and Schumpeter this book demonstrates how we should take into account the inefficiencies that arise due to asymmetric information mental biases unequal distribution of wealth and power and the manipulation of demand This textbook offers students a valuable introductory text with insights into the workings of real markets not just imaginary ones formulated by blackboard economists A must have for students studying the principles of economics as well as micro and macroeconomics this textbook redresses the existing imbalance in economic teaching Instead of clinging to an ideology that only enriched the 1% Komlos sketches the outline of a capitalism with a human face an economy in which people live contented lives with dignity instead of focusing on GNP
