Practical Reason and Norms Joseph Raz, 1999-09-09 Practical Reason and Norms focuses on three problems In what way are rules normative and how do they differ from ordinary reasons What makes normative systems systematic What distinguishes legal systems and in what consists their normativity All three questions are answered by taking reasons as the basic normative concept and showing the distinctive role reasons have in every case thus paving the way to a unified account of normativity Rules are a structure of reasons to perform the required act and an exclusionary reason not to follow some competing reasons Exclusionary reasons are explained and used to unlock the secrets of orders promises and decisions as well as rules Games are used to exemplify normative systems Inevitably the analysis extends to some aspects of normative discourse which is truth apt but with a diminished assertoric force *Reason's Traces* Matthew Kapstein, 2001-06-15 Reason s Traces addresses some of the key questions in the study of Indian and Buddhist thought the analysis of personal identity and of ultimate reality the interpretation of Tantric texts and traditions and Tibetan approaches to the interpretation of Indian sources Drawing on a wide range of scholarship Reason s Traces reflects current work in philosophical analysis and hermeneutics inviting readers to explore in a Buddhist context the relationship between philosophy and traditions of spiritual

Distribution Law Theodore L. Banks, 1998-12-01 *EU Cartel Enforcement* Andreas Scordamaglia-Tousis, 2013-08-01 There has been a long standing debate on the compatibility of EU competition law with fundamental rights protection particularly as the latter is enshrined in the due process requirements of the European Convention on Human Rights ECHR This book a signal contribution to that debate assesses two questions of paramount concern first whether the current level of fundamental rights protection in cartel enforcement falls within the accepted ECHR standards and second how the often conflicting objectives of effectiveness and adequate protection of fundamental rights could optimally be achieved Following a detailed survey of relevant EU institutional substantive and procedural law rules the author offers a set of persuasive normative responses to both questions Proceeding from an in depth

analysis of the pertinent rights and legal nature of competition proceedings under EU and ECHR law the author goes on to examine such elements of the perceived incompatibility as the following investigatory powers vested in competition authorities the privilege against self incrimination right to privacy fair trial probatory requirements degree of use of presumptions in EU practice Article 6 ECHR guarantees pertaining to the presumption of innocence proving coordination of competitive behaviour proving restriction of competition admissibility of evidence before EU Courts and the Commission assessment of the attribution of liability rules EU fining rules judicial review of cartel decisions by EU Courts and national sanctioning rules The author s extraordinarily thorough presentation is rounded off with a remarkably comprehensive bibliography that lists in addition to books and articles newspaper articles EU regulations and directives soft law guidelines and best practices EU and ECtHR case law EU Advocate General opinions European Commission decisions and European Ombudsman decisions General conclusions stress the necessity of introducing further reforms to enhance the effectiveness and legitimacy of fundamental rights in the context of competition proceedings Few books have taken such a thorough and far reaching approach to the reconciliation of effective public enforcement and fundamental rights or of effective deterrence with the principles of legality non retroactivity presumption of innocence and ne bis in idem In the depth of its appraisal of the entire spectrum of enforcement components from a fundamental rights perspective the book is without peers It will be warmly welcomed by any parties interested in the intersection of competition law and human rights

Emotions as Original

Existences Demian Whiting, 2020-09-25 This book defends the much disputed view that emotions are what Hume referred to as original existences feeling states that have no intentional or representational properties of their own In doing so the book serves as a valuable counterbalance to the now mainstream view that emotions are representational mental states Beginning with a defence of a feeling theory of emotion Whiting opens up a whole new way of thinking about the role and centrality of emotion in our lives showing how emotion is key to a proper understanding of human motivation and the self Whiting establishes that emotions as types of bodily feelings serve as the categorical bases for our behavioural dispositions including those associated with moral thought virtue and vice The book concludes by advancing the idea that emotions make up our intrinsic nature the characterisation of what we are like in and of ourselves when considered apart from how we are disposed to behave The conclusion additionally draws out the implications of the claims made throughout the book in relation to our understanding of mental illness and the treatment of emotional disorders

Hollnagel believes this assumption is false and that safety cannot be attained only by eliminating risks and failures The alternative is to understand why things go right and to amplify that The ETTO Principle looks at the common trait of people at work to adjust what they do to match the conditions It proposes that this efficiency thoroughness trade off ETTO is normal While in some cases the adjustments may lead to adverse outcomes these are due to the same processes that produce successes *How to Choose the Right Vocation* Holmes Whittier Merton,1917
