Reason And The World:

Semantics for Reasons Bryan R. Weaver, Kevin Scharp, 2019-06-27 *Semantics for Reasons* is a book about what we mean when we talk about reasons. It not only brings together the theory of reasons and natural language semantics in original ways but also sketches out a litany of implications for metaethics and the philosophy of normativity. In their account of how the language of reasons works, Bryan R. Weaver and Kevin Scharp propose and defend a view called Question Under Discussion (QUD) Reasons Contextualism. They use this view to argue for a series of novel positions on the ontology of reasons: indexical facts, the reasons to be rational, debate, moral reasons, and the reasons first approach.

The Reason why the Colored American is Not in the World's Columbian Exposition Ida B. Wells-Barnett, Robert W. Rydell, 1999 Expressly intended to demonstrate America's national progress toward utopia, the 1893 World's Columbian Exposition in Chicago pointedly excluded the contributions of African Americans. For them being left outside the gates of the White City merely underscored a more general exclusion from America's bright future. Exhibits at the fair were controlled by all-white committees, and those that acknowledged African Americans at all, such as the famous Aunt Jemima pancake exhibit, ridiculed and denigrated them. Many African Americans saw the racist policies of the World's Columbian Exposition as mirroring, framing, and reinforcing the larger horrors confronting blacks throughout the United States, where white supremacy meant segregation, second-class citizenship, and sometimes mob violence and lynching. In response to the politics of exclusion that governed the fair and of its larger implications, several prominent African Americans resolved to publish a pamphlet that would catalog the achievements of African Americans since the abolition of slavery while articulating the persistent political economy of apartheid in the American South. The authors of this remarkable document included the antilynching crusader Ida B. Wells, the former slave and abolitionist Frederick Douglass, the educator Irvine Garland Penn, and the lawyer and newspaper publisher Ferdinand L. Barnett. An eloquent statement of protest and pride, *The Reason Why the Colored American Is Not in the World's Columbian Exposition* reminds us that struggles over cultural representation are nothing new in American life. Robert Rydell's introduction provides insight into the sometimes conflicting strategies employed by African Americans as they strove to represent themselves at a cultural event that was widely regarded as a defining moment in American history.

Rationality and Feminist Philosophy Deborah K. Heikes, 2010-07-01 Exploring the history of the concept of rationality, Deborah K. Heikes argues that feminism should seek to develop a virtue theory of rationality.

The World's Work, 1919 A history of our time

Ordered by Love Thomas Ward, 2022-11 John Duns Scotus (1265-1308), beatified by Pope St. John Paul II in 1993, is widely recognized as one of the most original and influential philosophers and theologians of the Middle Ages. *Ordered by Love* offers a sympathetic exploration of a wide range of Scotus's thought. Topics covered include his understanding of the relationship between faith and reason, his doctrine of individuation by haecceity (thisness), his theory of the univocity of the concept of being, his emphasis on God's freedom and its supposed consequences for moral theory, his defense of Mary's

immaculate conception and his teaching on the primacy of Christ

Educating for Democracy Alan M. Olson, David M. Steiner, Irina S. Tuuli, 2004-08-04 The central conflicts of the world today are closely related to cultural traditional and religious differences between nations As we move to a globalized world these differences often become magnified entrenched and the cause of bloody conflict Growing out of a conference of distinguished scholars from the Middle East Europe and the United States this volume is a singular contribution to mutual understanding and cooperative efforts on behalf of peace The term *paideia* drawn from Greek philosophy has to do with responsible education for citizenship as a necessary precondition for effective democracy The problems discussed here are crucial but not simple How can we find shared ethical principles on which to build international consensus How can religious tolerance make inroads in societies accustomed to restrictive fundamentalism What might bring about the dogmatization of education in the Middle East as a necessary condition for free and rational inquiry and the broader vistas required by democracy All of these issues highlight the underlying question What is education really for Finally the volume confronts the promises and perils of economic globalization Noting that one third of the world's population lives in abject poverty business has become a battlefield where ethics and trust are clearly at stake

Chaos and Cosmos Karen Lang, 2018-08-06 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky's approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer's contemporaneous publications on the substance and function of scientific concepts and on Einstein's theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant's uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe's inspiration for both Alois Riegl's notion of age value and Walter Benjamin's conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge

Reason's Inquisition Christopher A. Colmo, 2023-08-29 *Reasons Inquisition* On Doubtful Ground is an exploration in the literature of political philosophy before and after Alfarabi and ranging from Thucydides to Leo Strauss and Eric Voegelin These studies most of them previously

unpublished open inquiries into theory and practice reason and revelation and the relation between thinkers ancient and modern Readers may be surprised to see the Platonist Alfarabi presented as a critic of Plato's theory in the name of practice while Alfarabi and Hobbes are shown to have a common interest in a theory commensurate with action Strauss Voegelin and Lucien Febvre all explore the problem of reason and revelation in relation to the limits of human knowledge An ambitious study of Shakespeare's Macbeth explores the ambiguity of both nature and knowledge in relation to male and female good and evil present and future The contrast between ancients and moderns is explicit in questions of the modern aspects of Marlowe's Doctor Faustus and of Rousseau's reversal of Plato Kierkegaard and Heidegger bring radical modernity into focus against a Platonic background in the closing essay These diverse essays attempt to follow the thinkers and themes explored in turning a critical gaze upon reason itself Routledge Library Editions: Hegel Various,2021-08-26 Originally published between 1982 and 1991 the 3 volumes in this set Reflect the diversity in Hegelianism and every branch of philosophy which he contributed to Examine Hegel's work in relation to Marx and Wittgenstein Discuss Hegel's social theory Examine British Hegelian thinking and the lines of its development Offer an interpretation of Hegelian theory that is relevant for the understanding of modern republican constitutions **Kant's Prolegomena to Any Future Metaphysics** Immanuel Kant,2022-05-10 Prompted by Hume's skepticism Kant addresses the question of whether and how metaphysics is possible Metaphysicians have yet to agree on one definite proposition or even to establish a basis for agreement upon judgments Kant distinguishes between a priori and a posteriori cognitions and between analytic and synthetic judgments Knowledge we gain from experience is a posteriori and what we can know independent of experience is a priori A synthetic judgment is one whose predicate contains information not contained in the subject and an analytic judgment is one whose predicate is a mere analysis of the subject Kant claims that mathematics natural science and metaphysics all lay claim to synthetic a priori propositions propositions that are necessarily but not trivially true and can be known prior to experience Since mathematics and pure natural science are well established fields he proposes to examine how their synthetic truths are possible a priori in the hope that this examination will shed light on the possibility of metaphysics as a science **Life's Ultimate Questions** Ronald H. Springsted,2015-02-09 While the question Is faith reasonable has continually occupied philosophers and theologians little attention has been paid to what faith itself is The Act of Faith remedies this neglect by looking at what it means for a person of Christian faith to believe Eric Springsted contrasts modern views of faith with the Christian tradition running from Augustine through Aquinas and Calvin In reviewing such thinkers as Locke and Hume Springsted discovers that behind modern discussions of the reasonableness of faith lie key assumptions about the human self including the views that the good is a matter of choice and that we can exercise objective uninvolved reason According to Springsted however the church has not viewed faith in this way His survey of the Augustinian tradition shows that the self our most esteemed Christian thinkers had in mind when talking about faith was a moral self one defined by character and self involvement Christian faith is at root a participation in the good and reasoning within faith is reasoning within the life of God Drawing on contemporary philosophers and theologians like John Henry Newman and Simone Weil Springsted builds a fresh understanding of faith for today He shows how the inner act of faith is ultimately a radical willingness to be open to God and he argues that the faithful self is one that develops within a community that shapes its members through the morally formative activities of interaction teaching and sacramental practice **Evangelical Dictionary of Theology (Baker Reference Library)** Walter A.
