Statistical Reasoning for the Behavioral Sciences Richard J. Shavelson, 1996 According to Richard Shavelson the goal of any good statistics book is for readers not only to learn the meaning of statistical concepts but also to be able to use these concepts to solve problems This new revised edition of Statistical Reasoning is written with a two pronged objective

conceptual and procedural knowledge of statistics Extensive use of verbal as well as visual exposition and an uncommonly wide use of figures that parallel what is being explained in the text aids the learning process and provides in the author's words a motion picture of the concepts at work In addition the book motivates the study of statistics with research design in areas such as psychology education and sociology and illustrates the usefulness of statistics for research in these fields

Developing Students' Statistical Reasoning Joan Garfield, Dani Ben-Zvi, 2008-09-08 Increased attention is being paid to the need for statistically educated citizens statistics is now included in the K 12 mathematics curriculum increasing numbers of students are taking courses in high school and introductory statistics courses are required in college However increasing the amount of instruction is not sufficient to prepare statistically literate citizens A major change is needed in how statistics is taught To bring about this change three dimensions of teacher knowledge need to be addressed their knowledge of statistical content their pedagogical knowledge and their statistical pedagogical knowledge i e their specific knowledge about how to teach statistics This book is written for mathematics and statistics educators and researchers It summarizes the research and highlights the important concepts for teachers to emphasize and shows the interrelationships among concepts It makes specific suggestions regarding how to build classroom activities integrate technological tools and assess students learning This is a unique book While providing a wealth of examples through lessons and data sets it is also the best attempt by members of our profession to integrate suggestions from research findings with statistics concepts and pedagogy The book's message about the importance of listening to research is loud and clear as is its message about alternative ways of teaching statistics This book will impact instructors giving them pause to consider Is what I'm doing now really the best thing for my students What could I do better J Michael Shaughnessy Professor Dept of Mathematical Sciences Portland State University USA This is a much needed text for linking research and practice in teaching statistics The authors have provided a comprehensive overview of the current state of the art in statistics education research The insights they have gleaned from the literature should be tremendously helpful for those involved in teaching and researching introductory courses Randall E Groth Assistant Professor of Mathematics Education Salisbury University USA

on these concepts in the problems Employ a six step procedure for describing all statistical tests from the simplest to the most complex Provide end of chapter tables to summarize the hypothesis testing procedures introduced Emphasize how to choose the best procedure with a discussion of procedure choice in the examples problems that require choosing the procedure and endpapers that provide guidelines for choosing procedures Focus on power with a separate chapter and power analyses procedures in each chapter Discuss the rationale for why emphasizing random sampling from populations is emphasized in the classroom but not in actual experiments Provide detailed explanations of factorial designs interactions and ANOVA to help students understand the statistics used in professional journal articles The new edition features a more user friendly approach Designed to be used seamlessly with Excel all of the in text analyses are conducted in Excel while the book's CD contains files for conducting analyses in Excel as well as text files that can be analyzed in SPSS SAS and Systat Two large real data sets integrated throughout one focusing on the effectiveness of Zyban and gum on smoking and the other on the effects of children on marriage
