## Reasons To Remember:

**Reasons** Eric Wiland, 2012-05-17 When we say we act for a reason what do we mean And what do reasons have to do with being good or bad Introducing readers to a foundational topic in ethics Eric Wiland considers the reasons for which we act You do things for reasons and reasons in some sense justify what you do Further your reasons belong to you and you know the reasons for which you act in a distinctively first personal way Wiland lays out and critically reviews some of the most popular contemporary accounts of how reasons can function in all these ways accounts such as psychologism factualism hybrid theories constitutivist theories and finally Anscombean views of reasons Reasons also includes a brief guide to further reading to help readers master this important topic in contemporary writing in ethics and the philosophy of action **The**

*Reasons from Within* Alan H. Goldman, 2009-11-26 Do the reasons we have for acting as we do derive from

our concerns and desires or are there objective values in the world that we are rationally required to pursue and protect Alan H Goldman argues for the internalist or subjectivist view of practical reasons on the grounds that it is simpler more unified and more comprehensible than the rival objectivist position He provides a naturalistic account of practical rationality in terms of coherence within sets of desires or motivational states and between motivations intentions and actions Coherence is defined as the avoidance of self defeat the defeat of one's own deepest concerns The demand for coherence underlies both practical and theoretical reason and derives from the natural aims of belief and action In clarifying which desires create reasons drawing on the literature of cognitive psychology Goldman offers conceptual analyses of desires emotions and attitudes Reasons are seen to derive ultimately from our deepest occurrent concerns These concerns require no reasons themselves but provide reasons for many more superficial desires In defense of this theory Goldman argues that rational agents need not be morally motivated or concerned for their narrow self interest Objective values would demand such concern They would be independent of our desires but would provide reasons for us to pursue and protect them They would require rational agents to be motivated by them But Goldman argues we are not motivated in that way and it makes no sense to demand that our informed and coherent desires be generally other than they are We need not appeal to such objective values in order to explain how our lives can be good and meaningful Reasons from Within will appeal to anyone interested in the nature of values and reasons particularly students of philosophy psychology and decision theory **First concurrent resolution on the budget--fiscal year 1984** United States. Congress. Senate. Committee on the Budget, 1983

**Non-means-tested Entitlement Reform Programs** United States. Congress. House. Committee on the Budget. Task Force on Entitlements, Uncontrollables, and Indexing, 1983 Sartre, Imagination and Dialectical Reason Austin Hayden Smidt, 2019-06-28 There are perpetual debates about the extent of freedom in politics Are we free to choose Are we overdetermined by our material conditions Some hybrid between the two What is more how are we to comprehend ourselves

as creators of history if freedom itself is a problematic concept And what would it mean if self comprehension were foreclosed by this problematic In this text Austin Hayden Smidt analyzes an oft overlooked text by Jean Paul Sartre in order to ground a logical framework for exploring this paradox In Critique of Dialectical Reason Sartre sought to develop an historical and structural heuristic one that would enable future theorists and activists alike to assess the pressing problems facing the various milieux of capitalist life Through this heuristic his intent was to develop an orientation enabling humans to transform their world in their perpetual creation of themselves and vice versa However the stylistic difficulties of the text as well as a general agreement among previous interpreters has prevented the richness of the investigation from taking root This book sets a new course and invites further collaboration as together we create society as a work of art     Believable Evidence Veli Mitova,2017-05-25 Believable Evidence argues that evidence consists of true beliefs This claim opens up an entirely overlooked space on the ontology of evidence map between purely factualist positions such as those of Williamson and Dancy and purely psychologist ones such as that of Conee and Feldman Veli Mitova provides a compelling three level defence of this view in the first contemporary monograph entirely devoted to the ontology of evidence First once we see the evidence as a good reason metaethical considerations show that the evidence must be psychological and veridical Second true belief in particular allows epistemologists to have everything they want from the concept of evidence Finally the view helps us locate the source of the normative authority of evidence The book challenges a broad range of current views on the ontology of reasons and their normative authority making it a must read for scholars and advanced students in metaethics and epistemology     *Moral Rights and Their Grounds* David Alm,2018-12-07 Moral Rights and Their Grounds offers a novel theory of rights based on two distinct views The first the value view of rights argues that for a person to have a right is to be valuable in a certain way or to have a value property This special type of value is in turn identified by the reasons that others have for treating the right holder in certain ways and that correlate with the value in question David Alm then argues that the familiar agency view of rights should be replaced with a different version according to which persons rights and thus at least in part their value are based on their actions rather than their mere agency This view which Alm calls exercise based rights retains some of the most valuable features of the agency view while also defending it against common objections concerning right loss This book presents a unique conception of exercise based rights that will be of keen interest to ethicists legal philosophers and political philosophers interested in rights theory     **Prescribing Scenarios at a Glance** Emma Baker,Daniel Burrage,Dagan Lonsdale,Andrew Hitchings,2014-08-04 Prescribing Scenarios at a Glance is an innovative resource which allows medical students and junior doctors to practise prescribing skills safely for themselves Supporting those who wish to develop their prescribing knowledge and clinical reasoning this book features 50 acute and on call scenarios in a hospital setting Users will be able to practise skills such as initiating a prescription planning management reviewing therapy and identifying adverse drug reactions and interactions Prescribing Scenarios at a Glance Contains case

*Reason and Conduct in Hume and his Predecessors*  
S. Tweyman, 2012-12-06 Can reason play a significant role in making moral distinctions and in generating moral precepts In this book I attempt to provide Hume's answers to these questions in the light of his employment of the Experimental Method his doctrine of perceptions and his analysis of reason In addition to this attention is paid to some of Hume's rationalist predecessors most notably Samuel Clarke and William Wollaston in order to assess Hume's critique of the rationalists Regarding the preparation of this book I wish to thank Professor Ronald J Butler who introduced me to Hume's writings Professors W J Huggett R F McRae and F E Sparshott each read the original draft of this book and provided me with extremely valuable comments and criticisms My wife Barbara Tweyman and my mother Fay Tweyman provided me with constant support throughout the time I was preparing this book and for this as well as for many other things I will always be grateful My father in law the late Joseph Millstone a man I dearly loved and respected also provided me with support during the time I was working on this book His death is for me an incalculable loss and his memory is something I will always cherish
