Reboot World:

American Reboot Will Hurd,2023-03-14 In American Reboot Hurd called the future of the GOP by Politico provides a detailed blueprint Robert M Gates Secretary of Defense 2006 2011 for America grounded by what Hurd calls pragmatic idealism a concept forged from enduring American values to achieve what is actually achievable **The Worlds of J. R. R.**

Tolkien John Garth,2020-06-09 An illustrated journey into the life and imagination of one of the world s best loved authors Tolkien s Worlds provides a unique exploration of the relationship between the real and the fantastical and is an essential companion for anyone who wants to follow in Tolkien s footsteps **Level Zero** Jaron Lee Knuth,2011-11-06 The never

ending wars pollution and overpopulation of the near future have caused the outdoors to become uninhabitable and the government is forced to create a new world a virtual existence that allows civilization to continue Shopping malls schools concert venues and religious gathering places all exist in the infinite confines of this new reality yet the most popular domain for most teenagers is the one that houses the endless array of digital games When the sequel to a popular title is released to the public for a special beta test a group of players eagerly log in to try out the new experience What seems like harmless violence quickly turns all too consequential when the players realize the game s biggest error They can t log out Forced to battle their way through an endless army of monsters programmed to kill their avatars the players must fight against the clock and find a way out of the game before the real world catches up to them Cyberlibertarianism David

Golumbia,2024-11-12 An urgent reckoning with digital technology s fundamentally right wing legal and economic underpinnings In a timely challenge to the potent political role of digital technology Cyberlibertarianism argues that right wing ideology was built into both the technical and social construction of the digital world from the start Leveraging more than a decade of research David Golumbia traces how digital evangelism has driven the worldwide shift toward the political right concealing inequality xenophobia dishonesty and massive corporate concentrations of wealth and power beneath the utopian presumption of digital technology as an inherent social good Providing an incisive critique of the push for open access and open source software and the legal battles over online censorship and net neutrality Cyberlibertarianism details how the purportedly democratic internet has been employed as an organizing tool for terror and hate groups and political disinformation campaigns As he unpacks our naively utopian conception of the digital world Golumbia highlights technology s role in the advancement of hyperindividualist and antigovernment agendas demonstrating how Silicon Valley corporations and right wing economists antiestablishment figures such as Julian Assange Elon Musk Peter Thiel Edward Snowden and Mark Zuckerberg and seemingly positive voices such as John Perry Barlow Cory Doctorow the Electronic Freedom Foundation and Wikipedia all have worked to hamper regulation and weaken legal safeguards against exploitation Drawing from a wide range of thought in digital theory economics law and political philosophy as well as detailed research and Golumbia s own experience as a software developer Cyberlibertarianism serves as a clarion call to reevaluate the fraught

politics of the internet In the hope of providing a way of working toward a more genuinely democratic and egalitarian future for digital technology this magisterial work insists that we must first understand the veiled dogmas from which it has been constructed Retail e book files for this title are screen reader friendly

Building Imaginary Worlds Mark J.P. Wolf, 2014-03-14 Mark J P Wolf's study of imaginary worlds theorizes world building within and across media including literature comics film radio television board games video games the Internet and more Building Imaginary Worlds departs from prior approaches to imaginary worlds that focused mainly on narrative medium or genre and instead considers imaginary worlds as dynamic entities in and of themselves Wolf argues that imaginary worlds which are often transnarrative transmedial and transauthorial in nature are compelling objects of inquiry for Media Studies Chapters touch on a theoretical analysis of how world building extends beyond storytelling the engagement of the audience and the way worlds are conceptualized and experienced a history of imaginary worlds that follows their development over three millennia from the fictional islands of Homer's Odyssey to the present internarrative theory examining how narratives set in the same world can interact and relate to one another an examination of transmedial growth and adaptation and what happens when worlds make the jump between media an analysis of the transauthorial nature of imaginary worlds the resulting concentric circles of authorship and related topics of canonicity participatory worlds and subcreation's relationship with divine Creation Building Imaginary Worlds also provides the scholar of imaginary worlds with a glossary of terms and a detailed timeline that spans three millennia and more than 1 400 imaginary worlds listing their names creators and the works in which they first appeared

Capitalism and Environmental Collapse Luiz Marques, 2020-08-17 This book intends to be an alert to the fact that the curve measuring environmental costs against the economic benefits of capitalism has irreversibly entered into a negative phase The prospect of an environmental collapse has been evidenced by the sciences and the humanities since the 1960s Today it imposes its urgency This collapse differs from past civilizations in that it is neither local nor just civilizational It is global and occurs at the broadest level of the biosphere accelerated by the convergence of different socio environmental crises such as Earth energy imbalance climate change and global warming Sea level rise Decrease and degradation of forests Collapse of terrestrial and aquatic biodiversity Floods droughts wildfires and extreme weather events Degradation of soils and water resources Increase in pollution caused by fossil fuels and coal Increase in waste production and industrial intoxication The book is divided in two parts In the first part it presents a comprehensive review of scientific data to show the already visible effects of each of the different environmental crises and its consequences to human life on Earth In the second part Luiz Marques critically discusses what he calls the three concentric illusions that prevent us from realizing the gravity of the current socio environmental crises the illusion of a sustainable capitalism the illusion that economic growth is still capable of providing more well being and the anthropocentric illusion Finally Marques argues that fitting back into the biosphere will only be possible if we dismantle the expansive socioeconomic gear that has shaped our societies since the 16th

century by moving from a Social Contract to a Natural Contract which takes into account the whole biosphere According to him the future society will be post capitalist or it will not be a complex society and even perhaps we must fear no society at all This book is backed up with the latest and best science and has made the complexities understandable for the average reader all in a context of hope for the future William J Ripple PhD Distinguished Professor of Ecology Director of the Alliance of World Scientists Oregon State University

The Lost Peace Richard Sakwa,2023-10-24 The end of the Cold War was an opportunity our inability to seize it has led to today s renewed era of great power competition 1989 heralded a unique prospect for an enduring global peace as harsh ideological divisions and conflicts began to be resolved Now three decades on that peace has been lost With war in Ukraine and increasing tensions between China Russia and the West great power politics once again dominates the world stage But could it have been different Richard Sakwa shows how the years before the first mass invasion of Ukraine represented a hiatus in conflict rather than a lasting accord and how since then we have been in a Second Cold War Tracing the mistakes on both sides that led to the current crisis Sakwa considers the resurgence of China and Russia and the disruptions and ambitions of the liberal order that opened up catastrophic new lines of conflict This is a vital strongly argued account of how the world lost its chance at peace and instead saw the return of war in Europe global rivalries and nuclear brinkmanship
