N. Priestman, Derek Kennet, 2023-10-31 This monograph comprises the final publication of a study supported by the British Institute of Persian Studies and undertaken by Seth Priestman and Derek Kennet at the University of Durham The work presents and analyses an assemblage of just under 17 000 sherds of pottery and associated paper archives resulting from one of the largest and most comprehensive surveys ever undertaken on the historic archaeology of southern Iran The survey was undertaken by Andrew George Williamson 1945 1975 a doctoral student at Oxford University between 1968 and 1971 at a time of great progress and rapid advance in the archaeological exploration of Iran The monograph provides new archaeological evidence on the long term development of settlement in Southern Iran in particular the coastal region from the Sasanian period to around the 17th century The work provides new insights into regional settlement patterns and changing ceramic distribution trade and use A large amount of primary data is presented covering an extensive area from Minab to Bushehr along the coast and inland as far as Sirjan This includes information on a number of previously undocumented archaeological sites as well as a detailed description and analysis of the ceramic finds which underpin the

settlement evidence and provide a wider source of reference By collecting carefully controlled archaeological evidence related to the size distribution and period of occupation of urban and rural settlements distributed across southern Iran Williamson aimed to reconstruct the broader historical development of the region Due to his early death the work was never completed The key aims of the authors of this volume were to do justice to Williamson's remarkable vision and efforts on the one hand and at the same time to bring this important new evidence to ongoing discussions about the development of southern Iran through the Sasanian and Islamic periods *Pre-Columbian Foodways* John Staller, Michael Carrasco, 2009-11-24 The significance of food and feasting to Pre-Columbian Mesoamerican cultures has been extensively studied by archaeologists anthropologists and art historians Foodways studies have been critical to our understanding of early agriculture political economies and the domestication and management of plants and animals Scholars from diverse fields have explored the symbolic complexity of food and its preparation as well as the social importance of feasting in contemporary and historical societies This book unites these disciplinary perspectives from the social and biological sciences to art history and epigraphy creating a work comprehensive in scope which reveals our increasing understanding of the various roles of foods and cuisines in Mesoamerican cultures The volume is organized thematically into three sections Part 1 gives an overview of food and feasting practices as well as ancient economies in Mesoamerica Part 2 details ethnographic epigraphic and isotopic evidence of these practices Finally Part 3 presents the metaphoric value of food in Mesoamerican symbolism ritual and mythology The resulting volume provides a thorough interdisciplinary resource for understanding food feasting and cultural practices in Mesoamerica **Archaeological Theory and Scientific Practice** Andrew Jones, 2001-12-06 Is archaeology an art or a science This question has been hotly debated over the last few decades with the rise of archaeological science At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory The discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals *Geomaterials Under the Microscope* Jeremy Ingham, 2010-12-15 The first comprehensive guide to the petrography of geomaterials making the petrographers specialist knowledge available to practitioners educators and students worldwide interested in modern and historic construction materials Archaeology Kevin Greene, 2002 A substantially revised and expanded edition of one of the most widely used and respected general introductions to the field of archaeology *Resistance at the Edge of Empires* Cameron A. Dariali: The 'Caspian Gates' in the Caucasus from Antiquity to the Age of the Huns and the Middle Ages
Eberhard Sauer, 2020-04-30 The Huns invading through Dariali Gorge on the modern day border between Russia and Georgia in AD 395 and 515 spread terror across the late antique world Was this the prelude to the apocalypse Prophecies foresaw a future Hunnic onslaught via the same mountain pass bringing about the end of the world Humanity's fate depended on a gated barrier deep in Europe's highest and most forbidding mountain chain Centuries before the emergence of such apocalyptic beliefs the gorge had reached world fame It was the target of a planned military expedition by the Emperor Nero Chained to the dramatic sheer cliffs framing the narrow passage the mythical fire thief Prometheus suffered severe punishment his liver devoured by an eagle It was known under multiple names most commonly the Caspian or Alan Gates Featuring in the works of literary giants no other mountain pass in the ancient and medieval world matches Dariali's fame Yet little was known about the materiality of this mythical place A team of archaeologists has now shed much new light on the major gorge blocking fort and a barrier wall on a steep rocky ridge further north The walls still standing today were built around the time of the first major Hunnic invasion in the late fourth century when the Caucasus defences feature increasingly prominently in negotiations between the Great Powers of Persia and Rome In its endeavour to strongly fortify the strategic mountain pass through the Central Caucasus the workforce erased most traces of earlier occupation The Persian built bastion saw heavy occupation for 600 years Its multi faith medieval garrison controlled Trans Caucasian traffic Everyday objects and human remains reveal harsh living conditions and close connections to the Muslim South as well as the steppe world of the north The Caspian Gates explains how a highly strategic rock has played a pivotal role in world history from Classical Antiquity into the twentieth century
