Mets,2008-12-30 Is there a reason for the busy citizen leader to read about air and space history theory and doctrine Yes asserts David Mets because without some vision of what the future is likely to bring we enter new conflicts unarmed with any ideas and highly vulnerable to confusion and paralysis He wrote this book to help the aspirant American leader build a theory of war and air and space power including an understanding of what doctrine is and what its utility and limitations are Since its earliest days airpower has been one of the dominant forces used by the American military American airmen both Navy and Air Force have been continually striving to achieve precision strikes in high altitude at long range or in darkness The search for precision attack

from standoff distances or altitudes has been imperative to national objectives with expenditure of American lives treasure and time This work covers the whole history of American aviation with special attention to the development of smart weapons and unmanned aerial vehicles and the influence they have had on the effectiveness of airpower In a chronological treatment emphasizing theory and doctrine technology tactics and strategy Mets also details both combat experience and intellectual processes lethal and non lethal involved in the preparation of airpower In addition to the narrative discussion the work offers sidebars and feature sections that facilitate the understanding of key weapons systems and operational challenges It also offers A Dozen Book Sampler for Your Reading on Air and Space Theory and Doctrine The work concludes with a brief look at information warfare and with some speculations about the future Through this thorough consideration of the evolution of American airpower and technology Mets provides not only a map of the past but a guide to future generations of airpower and its potential for keeping the United States strong and safe Ruling Passions Richard R.
