Recent Developments In Poultry Nutrition:

Recent Developments in Poultry Nutrition D.J.A. Cole, W. Haresign, 2013-10-22 Recent Developments in Poultry Nutrition is a collection of studies that cover important developments in poultry nutrition. The book presents 23 papers that deal with the various areas of concerns in poultry nutrition. The coverage of the text includes materials that deal with poultry diet such as metabolizable energy evaluation of poultry diets, the impact of declaration of the metabolizable energy value of poultry feeds and the influence of fiber on digestibility of poultry feeds. The book also deals with egg production issues including the influence of nutritional factors on hatchability, eggshell formation and quality and dietary phosphorus for laying hens. The text will be of great use to researchers and professionals in the poultry industry. Consumers will also find this book interesting since it discusses topics that can directly affect them.

Recent Developments in Poultry Nutrition 2 J. Wiseman, 1999 Developments in poultry science continue at an ever increasing rate. In parallel, poultry production has from comparatively humble beginnings little more than 50 years ago emerged to become one of the world's major livestock enterprises with consumption of poultry meat and eggs increasing in virtually every country. Accordingly, it is crucial that those involved in all aspects of the industry are kept informed of relevant issues. This volume brings together in one volume all those recent papers which have considered various aspects of poultry science and production which were presented at the annual University of Nottingham Feed Manufacturers Conferences.

Advances in Poultry Nutrition Research Amlan Kumar Patra, 2021-07-07 Due to the wide acceptance of poultry meat and eggs, poultry farming is the fastest growing global livestock industry. Nutrition plays a vital role in economic production and the maintenance of proper poultry health. Therefore, there is a great need to update balanced nutrient requirements for new breeds, utilize alternative feed resources, evaluate newer feed additives to optimize production while excluding antimicrobial feed additives and maintain overall health. The first section of this book contains six chapters that discuss the utilization of unconventional feeds, nanominerals to reduce mineral proportions in diets and water intake affected by environmental temperature. The second section contains six chapters that describe proper nutritional management to improve gut health and immunity, the prevention of common diseases and the amelioration of heat stress in poultry.

Advances in poultry nutrition Professor Todd J. Applegate, 2024-09-10 Reviews the development of novel feed sources as feed for poultry, focussing on the use of essential oils, macroalgae, microalgae and corn fermented protein. Addresses the recent advances in understanding the role of individual nutrients and additives in poultry nutrition. Considers the range of methods and techniques implementable to maintain the safety of poultry feed and prevent mycotoxin contamination.
