Handbook of Research on Digital Media and Creative Technologies
Harrison, Dew, 2015-03-31 Emerging technologies enable a wide variety of creative expression from music and video to innovations in visual art These aesthetics when properly explored can enable enhanced communication between all kinds of people and cultures The Handbook of Research on Digital Media and Creative Technologies considers the latest research in education communication and creative social expression using digital technologies By exploring advances in art and culture across national and sociological borders this handbook serves to provide artists theorists information communication specialists and researchers with the tools they need to effectively disseminate their ideas across the digital plane

An Introduction to Childhood and Youth Studies and Psychology Victoria Cooper, Mimi Tatlow-Golden, 2023-08-31 This exciting new book provides a novel interdisciplinary introduction to Childhood and Youth Studies and Psychology Its accessible approach illuminates holistic understandings of children and young people s lives by drawing from multiple disciplines and theoretical frameworks and wide ranging research examples including case studies from around the world featuring children and young people s perspectives throughout Weaving insights from education and cultural studies social anthropology and sociology with social cultural and developmental psychology it covers children and young people s experiences and development from infancy to young adulthood 0 23 years and their rights Chapters explore key contemporary topics such as the following Digital childhood and youth Children s embodied experiences The social and cultural origins of selves Diverse families Race and ethnicity Global childhoods Models for understanding health and disability Children s rights and agency Gender in childhood and youth An essential reading for students on childhood and youth psychology and education courses An Introduction to Childhood and Youth Studies and Psychology is also a valuable introductory resource for practitioners working with children and young people and for parents and policy makers with an interest in how we understand children and young people s lives today

A Neurological Study of Newborn Infants David J. Beintema, 2013-10-22 A Neurological Study of Newborn Infants considers the consistencies and inconsistencies of neonatal neurological signs The possibility of a relationship between pre and perinatal complications of pregnancy and later cerebral dysfunction has led to an increasing interest in the early detection of these defects in the newborn infant This book is divided into nine chapters and begins with a presentation of standardized procedures to obtain reliable information from the neurological examination The next chapters deal with the developmental course of neurological signs during the first days of life The final chapters discuss the potential effects of obstetrical and postnatal conditions on the developmental course and the consistency of neurological signs throughout the neonatal period This book is an invaluable source for developmental biologists neurologists pediatricians and obstetricians

Current Catalog National Library of Medicine (U.S.),1979 First multi year cumulation covers six years 1965 70

Ghosts of Theatre and Cinema in the Brain M. Pizzato,2006-03-15 Pizzato focuses on the staging of Self and Other as phantom characters inside the brain in the mind s eye as Hamlet says He explores the brain s anatomical evolution from animal drives to human consciousness to divine aspirations through distinctive cultural expressions in stage and screen technologies

The Performance of Trauma in Moving Image Art Dirk Cornelis de Bruyn,2014-10-02 With reference to recent neurological research into Post Traumatic Stress Disorder PTSD using new imaging technologies and models of implicit and explicit memory systems developed from this research The Performance of Trauma in Moving Image Art examines the capacity of an artist s cinema of experimental and avant garde film to perform and communicate traumatic experience De Bruyn analyses key films from the 1940s to the present that perform aspects of overwhelming experience through their approach structure content and perceptual impact mapping a trajectory from analogue to contemporary digital moving image practice He argues for the inclusion of Peter Gidal s 1970s conception of materialist film into the genre of trauma cinema through its capacity to articulate un locatability and perceptually perform dis orientation and a flashback effect all further identified here as key characteristics of digital moving image practice The discussion explores the following questions Can materialist film model traumatic memory and perform the traumatic

flashback Does the capacity to articulate trauma s un speakability and invisibility give this practice a renewed relevance in digital media s preoccupation with surface and the impact of information overload De Bruyn s phenomenological traumatic reading of materialist film steps beyond Gidal s original anti illusionist rationale to incorporate critiques effectively mounted against it by the founders of a 70s feminist psychoanalytic counter cinema This contemporary re reading further re evaluates the Minimalist turn in painting and sculpture after the Second World War arguing that this development is not essentialist or visionary but makes visible the implicit mechanisms of denial and erasure at the core of traumatic remembering For de Bruyn the initial traumatic impact of industrialization on the body s perceptual apparatus traceable through the advent of cinema and train travel is communicated by such moving image art The development of digital technology marks a new cycle of such perceptual re balancing for which materialist film is uniquely positioned and which it critically addresses
