Recent Work In Rural Archaeology:

Recent Work in Rural Archaeology ,1975 A Life in Norfolk's Archaeology: 1950-2016 Peter

Wade-Martins,2017-11-03 A personal history of Peter Wade Martins archaeological endeavour in Norfolk set within a national context. It covers the writer's early experiences as a volunteer the rise of field archaeology as a profession and efforts to conserve archaeological heritage The Archaeology of the Roman Economy Kevin Greene,1986 The Archaeology of Medieval England and Wales John Steane,2014-10-30 In the preceding 25 years to this book s publication in 1985 there was an extensive and unprecedented burst of archaeological activity in evidence from below ground deposits above ground structures and artefacts During the boom of the late 1960s and 1970s which led to go much central town redevelopment it was buried remains which yielded the most dramatic information. In the recession of the 1980s it was realised that upstanding remains had a lot to offer as well and they were being subject to ever more sophisticated study techniques. This book examines those recent developments in archaeology and assesses their bearing on the study of medieval English and Welsh history. Taking a series of important themes such as government religion and the countryside the book offers a chronological approach from the coming of the Vikings 850 AD to the Reformation in 1530 This approach focuses on the impact of man on the urban and rural landscape An important text for students of ancient history.

Archaeology, Economy and Society David A. Hinton, 2002-03-11 Many books have been written on particular aspects of medieval archaeology or on particular parts of the period but synthesis across the whole spectrum has not been attempted before The aim of this book is to examine the contribution that archaeology can make to an understanding of the social economic religious and other developments that took place in England from the migrations of the fifth and sixth centuries to the beginning of the Renaissance showing how society and economy evolved in that time span Drawing on the latest available material the book takes a chronological approach to the archaeological material of the post Roman period in order to emphasize the changes that can be observed in the physical evidence and some of the reasons for them that can be suggested The environment in which people functioned and how they expressed themselves for example in their houses and burial practices their pottery and their clothes show how they were constrained by social customs and economic pressures

The Oxford Handbook of Anglo-Saxon Archaeology Helena Hamerow, David A. Hinton, Sally Crawford, 2011-03-31 Written by a team of experts and presenting the results of the most up to date research The Handbook of Anglo Saxon Archaeology will both stimulate and support further investigation into a society poised at the interface between prehistory and history An Archaeology of Natural Places Richard Bradley, 2013-04-15 This volume explores why natural places such as caves mountains springs and rivers assumed a sacred character in European prehistory and how the evidence for this can be analysed in the field It shows how established research on votive deposits rock art and production sites can contribute to a more imaginative approach to the prehistoric landscape and can even shed light on the origins of monumental

architecture The discussion is illustrated through a wide range of European examples and three extended case studies An Archaeology of Natural Places extends the range of landscape studies and makes the results of modern research accessible to a wider audience including students and academics field archaeologists and those working in heritage management

Kingdom, Civitas, and County Stephen Rippon, 2018-04-19 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English re conquest and replaced with the counties with which we are familiar today **The Farming of Prehistoric Britain** P. Agrarian History of England and Wales: Volume 1, Prehistory to AD 1042 Stuart Piggott, Joan Thirsk, 2011-04-28 This volume surveys the evolution of the man made landscape in Britain over the period of some three millennia before the Roman The Celtic World Miranda Green, 2012-12-06 The Celtic World is a detailed and comprehensive study of the Celts from the first evidence of them in the archaeological and historical record to the early post Roman period The strength of this volume lies in its breadth it looks at archaeology language literature towns warfare rural life art religion and myth trade and industry political organisations society and technology The Celtic World draws together material from all over pagan Celtic Europe and includes contributions from British European and American scholars Much of the material is new research which is previously unpublished The book addresses some important issues Who were the ancient Celts Can we speak of them as the first Europeans In what form does the Celtic identity exist today and how does this relate to the ancient Celts For anyone interested in the Celts and for students and academics alike The Celtic World will be a valuable resource and a fascinating read Plants in Neolithic Britain and Beyond Andrew S. Fairbairn, 2000-12-01 Plant centred issues are fundamental in the definitions and explanations of the Neolithic as a phenomenon The meeting of the Neolithic Studies Group from which this volume developed aimed to provide a forum for the wide range of approaches now applied to Neolithic archaeobotany at site and landscape scales of resolution The Landscape Archaeology of Anglo-Saxon England N. J. Higham, Martin J. Ryan, 2010 The Anglo Saxon period was crucial to the development of the English landscape but is rarely studied The essays here provide radical new interpretations of its development Traditional opinion has perceived the Anglo Saxons as creating an entirely new landscape from scratch in the fifth and sixth centuries AD cutting down woodland and bringing with them the practice of open field agriculture and establishing villages Whilst recent scholarship has proved this simplistic picture wanting it has also raised many questions about the nature of landscape development at the time the changing nature of systems of land management and strategies for settlement The papers here seek to shed new light on these complex issues Taking a variety of different approaches and with topics ranging from the impact of coppicing to medieval field systems from the representation of the landscape in manuscripts to cereal production and the type of bread the population preferred they offer striking new approaches to the central issues of landscape change across the seven centuries of Anglo Saxon England a period surely foundational to the rural landscape of today NICHOLAS J HIGHAM is Professor of Early Medieval and Landscape History at the University of Manchester MARTIN J RYAN lectures in Medieval History at the University of Manchester Contributors Nicholas J Higham Christopher Grocock Stephen Rippon Stuart Brookes Carenza Lewis Susan Oosthuizen Tom Williamson Catherine Karkov David Hill Debby Banham Richard Hoggett The Agrarian History of England and Wales: Volume 2, 1042-1350 H. Peter Murphy Finberg, Joan Thirsk, 1967 This 1988 volume examines the agrarian history of England and Wales from Edward the Confessor to the outbreak of the Black Death in 1348 Reflections: 50 Years of Medieval Archaeology, 1957-2007: No. 30 Roberta

Gilchrist, Andrew Reynolds, 2018-12-13 This volume celebrates the 50th anniversary of the Society for Medieval Archaeology established in 1957 presenting reflections on the history development and future prospects of the discipline The papers are drawn from a series of conferences and workshops that took place in 2007 08 in addition to a number of contributions that were commissioned especially for the volume They range from personal commentaries on the history of the Society and the growth of the subject see papers by David Wilson and Rosemary Cramp to historiographical regional and thematic overviews of major trends in the evolution and current practice of medieval archaeology All the publications are fully refereed with the aim of publishing at the highest academic level reports on sites of national and international importance and of encouraging the widest debate The series objectives are to cover the broadest chronological and geographical range and to assemble a series of volumes which reflect the changing intellectual and technical scope of the discipline The End of Roman Britain Michael E. Jones, 1998 Jones offers a lucid and thorough analysis of the economic social military and environmental problems that contributed to the failure of the Romans drawing on literary sources and on recent archaeological evidence

Companion Encyclopedia of Archaeology Graeme Barker,1999 This comprehensive fully illustrated Companion answers the need for an in depth archaeology reference that provides authoritative coverage of this complex and interdisciplinary field The work brings together the myriad strands and the great temporal and spatial breadth of the field into two thematically organized volumes In twenty six authoritative and clearly written essays this Companion explores the origins aims methods and problems of archaeology Each essay is written by a scholar of international standing and Environment, Society and Landscape in Early Medieval England Tom Williamson, 2015 illustrations complement the text The origins of England's regional cultures are here shown to be strongly influenced by the natural environment and geographical features The Anglo Saxon period was crucial in the development of England's character its language and much of its landscape and culture were forged in the period between the fifth and the eleventh centuries Historians and archaeologists have long been fascinated by its regional variations by the way in which different parts of the country displayed marked differences in social structures settlement patterns and field systems In this controversial and wide ranging study the author argues that such differences were largely a consequence of environmental factors of the influence of climate soils and hydrology and of the patterns of contact and communication engendered by natural topography He also suggests that such environmental influences have been neglected over recent decades by generations of scholars who are embedded in an urban culture and largely divorced from the natural world and that an appreciation of the fundamental role of physical geography in shaping human affairs can throw much new light on a number of important debates about early medieval society The book will be essential reading for all those interested n the character of the Anglo Saxon and Scandinavian settlements in early medieval social and territorial organization and in the origins of the England's medieval landscapes Tom Williamson is Professor of LandscapeHistory University of East Anglia he has written widely on landscape
