*Steroid Receptor Methods* Benjamin A. Lieberman, 2001-08-10 A distinguished team of principal investigators and their associates describe in step by step detail a cross section of the latest research techniques available for studying the endocrine system As a basis for sophisticated biochemical analysis of receptor properties the contributors provide methods for the production and purification of a variety of receptors including progesterone glucocorticoid and androgen Other protocols allow the reader to experiment with DNA binding characteristics hormone binding assays and the use of combinatorial chemistry for drug discovery A series of novel methods utilizing the latest advances in immunochemistry yeast two hybrid screening and fluorescence are included for the detection and analysis of a variety of cellular proteins that influence steroid receptor effectiveness

**Receptor Purification** Gerald Litwack, 1990-10-30 Receptor Purification is a unique practical two volume guide to the purification of most receptor types including receptors for neurotransmitters polypeptide hormones steroid hormones and a variety of other ligands involved in many biological processes Today s methods of receptor purification have evolved from years of research on the mechanisms of receptor actions where they were needed to discover receptor properties and ultimately for use in cloning Receptor Purification provides a comprehensive source of techniques to enable the purification of cloned receptors as well as a handy reference on purification of receptors from cells and tissues in a physiological context Designed to give investigators the best possible selection of approaches to a purification problem alternative methods are provided where applicable In addition Receptor Purification features chapters on specific agents such as covalent binding ligands that will greatly simplify some purification processes Many of the leading laboratories whose work has led to the purification of a wide variety of receptors are represented in the contributions to these two volumes In some chapters information has been added on the applications of purified receptors while others focus on the cloning of the receptors The purification of receptors is group based on functional ligands The first volume is devoted to the purification of receptors that bind neurotransmitters and a wide variety of polypeptide hormones Volume 2 covers the steroid receptors and associated proteins such as vitamin D 3 and retinoic acid receptors Other polypeptide receptors such as those involved in
