Immigration and Apocalypse Yii-Jan Lin,2024-11-26 Tracing the metaphor of America as the Book of Revelation s New Jerusalem Yii Jan Lin shows how apocalyptic narratives have been used to exclude unwanted immigrants America appeared on the European horizon at a moment of apocalyptic expectation and ambition Explorers and colonizers imagined the land to be paradise the New Jerusalem of the Bible s Book of Revelation This groundbreaking volume explores the conceptualization of America as the New Jerusalem from the time of Columbus to the Puritan colonists through U S expansion and from the eras of Reagan to Trump While the metaphor of the New Jerusalem has been useful in portraying a shining God blessed refuge with open gates it has also been used to exclude attack and criminalize unwanted peoples Yii Jan Lin shows how newspapers political speeches sermons cartoons and novels throughout American history have used the language of Revelation to define immigrants as God s enemies who must be shut out of the gates This book exposes Revelation s apocalyptic logic at work in the history of Chinese exclusion the association of the unwanted with disease the contradictions of citizenship laws and the justification for building a U S Mexico wall like the wall around the New Jerusalem This book is a fascinating analysis of the religious biblical and apocalyptic in American immigration history and a damning narrative that weaves together American religious history immigration and ethnic studies and the use of biblical texts and imagery

Medical and Psychiatric Comorbidity Over the Course of Life American Psychopathological Association,2007-05-03 Compiled from presentations given at the 2004 American Psychopathological Association APPA annual meeting Medical and Psychiatric Comorbidity Over the Course of Life reviews the comorbidity of mental and chronic physical syndromes in an epidemiological and life course context offering fresh insights and identifying crucial clues gleaned from the overlapping areas or areas of mutual pathogenesis linking disparate realms of knowledge to the etiology and nosological distinctiveness of both physical and

mental disorders Once relatively ignored the study of lifetime comorbidity has the potential to suggest etiological clues and to advance our ability to prevent secondary disorders by increasing our knowledge about the course and pathology of the primary disease The etiologically relevant period beginning with the earliest causal action and ending with diagnosis helps us understand this potential and thus is vital to the study of comorbidity Divided into five main sections epidemiology risk factors mood disorders emotions and health and schizophrenia Medical and Psychiatric Comorbidity Over the Course of Life discusses critical aspects of the life course characteristics of the etiologically relevant period It can be long e g temperament a relatively enduring emotional predisposition may situate an individual more or less permanently at high risk culminating in irreversibility only after decades of induction The action of identical genes produces different disorders that may occur at different stages of life such as the comorbidity of panic disorder and cystitis It may involve critical stages i e relatively narrow periods during development such as fetal growth and puberty to which the action of a given cause is limited Critical periods of varying durations may exist throughout the course of life It may have a cumulative quality to it in which years or even decades of accumulation are required to reach the point of irreversibility e g the years long burden of lower class life or of increased allostatic burden for the causal nexus to reach sufficiency It may involve multiple causes representing different disciplines and different spheres of action spread throughout the life course Medical and Psychiatric Comorbidity Over the Course of Life will prove invaluable for practitioners in general and consultation liaison psychiatry family practice and internal medicine and psychosomatics behavioral medicine and health psychology
